

Instructions for Contributors

Aims and Scope: *JINS* is the official journal of the International Neuropsychological Society, an organization of over 3,700 international members from a variety of disciplines. Our editorial board is comprised of internationally known experts with a broad range of interests. *JINS* publishes empirically-based articles covering all areas of neuropsychology and the interface of neuropsychology with other areas, such as cognitive neuroscience. Theoretically driven work that has clinical implications is of particular interest. To assure maximum flexibility and to promote diverse mechanisms of scholarly communication, the following formats are available.

Regular Research: Maximum of 5,000 words (not including abstract, tables, figures, or references) and a 200 word abstract. Regular Research papers are original, creative, high quality papers covering all areas of neuropsychology; focus may be experimental, applied or clinical.

Brief Communication: Maximum of 2,500 words (not including abstract, tables, figures, or references) and a 150 word abstract, with a maximum of two tables or two figures, or one table and one figure, and 20 references. Brief Communications are shorter research articles.

Neurobehavioral Grand Rounds: Maximum of 5,000 words with an informative literature review (not including abstract, tables, figures, or references) and a 200 word abstract. Neurobehavioral Grand Rounds are unique case studies, which are usually published with an introduction by an expert in the field to put the case into a more global perspective.

Critical Review: Maximum of 7,000 words (not including abstract, tables, figures, or references) and a 200 word abstract. Critical Reviews are reviews by experts on important topics in neuropsychology. Critical Reviews must be preapproved by the Department Editor. For consideration, please e-mail your abstract to jins@unm.edu.

Short Review: Maximum of 2,500 words (not including abstract, tables, figures, or references) and a 100 word abstract. Short Reviews are conceptually-oriented snapshots of the current state of a research area by experts in that area. Short Reviews must be preapproved by the Department Editor. For consideration, please e-mail your abstract to jins@unm.edu.

Dialogues: Maximum of 2,000 words for each segment (not including abstract, tables, figures, or references) and a 100 word abstract, with a maximum of two tables or two figures, or one table and one figure and 20 references. Dialogues provide a forum for two distinct positions on controversial issues in a point-counterpoint form. Dialogues must be preapproved by the Department Editor. For consideration, please e-mail your abstract to jins@unm.edu.

Symposia: Maximum of 5,000 words (not including abstract, tables, figures, or references) and a 200 word abstract. Symposia consist of several thematically linked research articles which present empirical data. Symposia must be pre-approved by the Department Editor. For consideration, e-mail your proposal to jins@unm.edu to receive prior approval.

Letters to the Editor: Maximum of 500 words (not including table, figure, or references) with up to five references, one table, or one figure. Letters to the

Editor respond to recent articles in the *Journal of the International Neuropsychological Society*.

Book Reviews: Maximum of 1000 words in length. Include name and affiliations, a title for the review, the author(s)/editor(s), title, publisher, date of publication, number of pages and price. Book Reviews are invited by the Book Review Editor. For consideration, e-mail jins@unm.edu.

Manuscript Preparation and Style: Unless otherwise specified, the guideline for preparation of manuscripts is the *Publication Manual of the American Psychological Association* (6th edition).

Manuscripts will be returned if they exceed length requirements.

Scientific articles, including Regular Research Articles, Brief Communications, Symposia and Special Series, should include the following in the order shown: Title Page, Abstract, Introduction, Methods, Results, Discussion, References, Appendixes, Acknowledgments, Tables, Figure Legends, and Figures.

The use of abbreviations, except those that are widely used, is strongly discouraged. They should be used only if they contribute to better comprehension of the manuscript. Acronyms should be spelled out at first mention. Metric system (SI) units should be used. Pages should be numbered sequentially beginning with the Title Page.

The Title Page should contain the following: the full title of the manuscript, the full names and affiliations (department, institution, city, state) of all authors, a contact address with telephone and fax numbers and e-mail address, and the word count for abstract and for manuscript (excluding title page, abstract, references, tables, and figures).

A running head should appear in the upper right hand corner of every page. It should begin with the lead author's last name followed by the abbreviated title and end with the page number.

Abstract and Mesh Terms (Keywords) begin on page 2 and should include a brief statement of the problem, the method, the key findings, and the conclusions. Six mesh or key words not duplicated in the title should be provided, see <http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?db=mesh>.

The Introduction should begin on page 3.

The Methods section should include the following: Compliance with institutional research standards for animal or human research (including a statement that the research was completed in accordance with the Helsinki Declaration http://www.wma.net/e/policy/17-c_e.html).

Appendices and Supplemental Materials may be submitted. If the material is intended for print, include it in the single .doc manuscript file. If the material will appear only online, please submit it in a separate .doc file.

The Acknowledgements Section should include a disclosure of all financial support and indicate there are no conflicts of interest. Financial support: Please provide details of the sources of financial support for all authors, including grant numbers. For example, "This work was supported by the National Institutes of Health (grant number XXXXXXXX)". Multiple

grant numbers should be separated by a comma and space, and where research was funded by more than one agency the different agencies should be separated by a semi-colon, with "and" before the final funder. Grants held by different authors should be identified as belonging to individual authors by the authors' initials. For example, "This work was supported by the Wellcome Trust (A.B., grant numbers XXXX, YYYY), (C.D., grant number ZZZZ); the Natural Environment Research Council (E.F., grant number FFFF); and the National Institutes of Health (A.B., grant number GGGG), (E.F., grant number HHHH)." Where no specific funding has been provided for research, please provide the following statement "This research received no specific grant from any funding agency, commercial or not-for-profit sectors."

Tables and Figures should be numbered in Arabic numerals. Figures should be numbered consecutively as they appear in the text. Any indication of features of special interest should also be included. Figures should be twice their intended final size and authors should do their best to construct figures with notation and data points of sufficient size to permit legible photo reduction to one column of a two-column format.

Please upload your figure (s) in either a .doc or .pdf format. Color figures are accepted with no cost. When uploading figures (color or black and white) they need only be a high enough resolution for the reviewers and editors to identify the information you are trying to convey.

The approximate position of each table and figure should be provided in the manuscript: [INSERT TABLE 1 HERE]. Tables and figures should be on separate pages. Tables should have short titles and all figure legends should be on separate pages.

Special Note Regarding Figures: If you plan to use figures or tables that have been redrawn or modified from other publications, and you are not the copyright holder, please obtain permission for this re-use. Authors should err on the side of caution and seek advice from the editorial office if they are uncertain whether to seek permission.

References: References should be in American Psychological Association, 6th Edition, style (see the examples presented below).

Text references should be cited as follows: ". . . Given the critical role of the prefrontal cortex (PFC) in working memory (Cohen et al., 1997; Goldman-Rakic, 1987; Perlstein et al., 2003a, 2003b) . . ." with multiple references in alphabetical order. Another example is: "For example, Cohen et al. (1994,1997), Braver et al. (1997), and Jonides and Smith (1997) demonstrated . . ." References cited in the text with two authors should list both names. References cited in the text with three, four, or five authors, list all authors at first mention; with subsequent citations, include only the first author's last name followed by et al. References cited in the text with six or more authors should list the first author et al. throughout. In the reference section, for works with up to seven authors, list all authors. For eight authors or more, list the first six, then ellipses followed by the last author's name. Examples of the APA reference style are as follows:

Online/Electronic Journal Article with DOI:

Dikmen, S., Machamer, J., Fann, J. & Temkin, N. (2010). Rates of Symptom Reporting Following Traumatic Brain Injury. *Journal of the International*

Scientific Article:

Book Chapter:

Mahone, E.M. & Slomine, B.S. (2008). Neurodevelopmental Disorders. In Morgan, J.E. & Ricker (Eds.), *Textbook of Clinical Neuropsychology* (pp. 105–127). New York: Taylor & Francis.

Report at a Scientific Meeting:

Weintraub, S. (2012, June). Profiles of dementia: Neuropsychological, neuroanatomical and neuropathologic phenotypes. International Neuropsychological Society, Oslo, Norway.

Manual, Diagnostic Scheme, etc.:

American Psychiatric Association (1994). *Diagnostic and Statistical Manual of Mental Disorders* (4th ed.). Washington, DC: American Psychiatric Association Press.

English Editing: The Research and Editing Consulting Program (RECP) within the International Neuropsychological Society's International Liaison Committee is designed to provide English language editing and statistical consulting to international colleagues who wish to publish their research in English language journals. For additional information see <http://www.the-ins.org/the-research-and-editing-consulting-program>.

Originality and Copyright: To be considered for publication in the *Journal of the International Neuropsychological Society* a manuscript cannot have been published previously, nor can it be under review for publication elsewhere. Papers with multiple authors are reviewed with the assumption that all authors have approved the submitted manuscript and concur with its submission to the *Journal of the International Neuropsychological Society*.

Special Note Regarding Copyright: If you plan to include material that has been published elsewhere and is under copyright of a third party, you will need to obtain permission to re-use this material in your article. This includes material re-drawn or modified from other publications where you are not the copyright holder. A form is provided for this purpose, alternatively, many publishers use an online system for such requests. It is the responsibility of the authors to obtain permissions to re-use material from elsewhere. Upon acceptance of your manuscript, original copies of permissions to re-use material that has been published elsewhere will be requested.

Forms:

Author Disclosure Form: Upon submission of your manuscript, you will be sent an e-mail requesting a signed Author Disclosure form. The Author Disclosure form will be included in the e-mail along with instructions on how to fax or e-mail the form to the *JINS* office. This form includes an attestation that the manuscript is original and not under review in another journal, research was conducted in compliance with institutional guidelines, and any potential conflicts of interest have been reported.

Only the corresponding author's signature is required. This disclosure form pertains to all authors, and the corresponding author's signature documents that the corresponding author has obtained all pertinent information from all authors. It is the corresponding author's ethical responsibility to explicitly check with each of his/her co-authors to ensure that any real or apparent conflict of interest is appropriately disclosed. The intent of this disclosure is not to prevent an author with a significant financial or other relationship from publishing their work in *JINS*, but rather to provide readers with information on which they can make their own judgments.

Transfer of Copyright Agreement: A transfer of copyright agreement with certain specified rights reserved by the author must be signed and returned to the Editor by the corresponding author of accepted manuscripts, prior to publication. This is necessary for the wide distribution of research findings and the protection of both author and society under copyright law.

Upon acceptance of your manuscript, you will be sent an e-mail requesting a signed Transfer of Copyright

Agreement. The Transfer of Copyright agreement will be included in the e-mail along with instructions on how to fax or e-mail the form to the *JINS* office.

Manuscript Submission and Review: The *Journal of the International Neuropsychological Society* uses online submission and peer review. The website address for submissions is: <http://mc.manuscriptcentral.com/cup/jins>, and complete instructions are provided. Prior to online submission, please consult <http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?db=mesh> for 6 keywords or mesh terms that do not appear in the title. Accurate mesh terms will increase the probability that your manuscript will be identified in online searches. The website will automatically acknowledge receipt of the manuscript and provide a manuscript reference number. The Editor-in-Chief will assign the manuscript to an Associate or Department Editor and at least two other reviewers. Every effort will be made to provide the author with a review within 6 to 10 weeks of manuscript assignment. If the Editor requests that revisions be made to a manuscript before publication, a maximum of 3 months will be allowed for preparation of the revision, except in unusual circumstances.

Rights and Permissions: For information regarding rights and permissions concerning *JINS*, contact Marc Anderson (mranderson@cambridge.org), or Adam Hirschberg (ahirschberg@cambridge.org).

Proofs: The publisher reserves the right to copyedit manuscripts. The corresponding author will receive PDFs for final proofreading. These should be checked and corrections returned within 2 days of receipt. The publisher reserves the right to charge authors for excessive corrections.

Offprints and PDF Files: The corresponding author will receive a free pdf. This pdf can also be mounted on the authors' web pages. Offprints must be ordered when page proofs are returned. The offprint order form with the price list will be sent with your PDF.

OPEN ACCESS PAPERS

Please see the Open Access Transfer of Copyright Agreement for the proper procedures at (<http://journals.cambridge.org/action/displayMoreInfo?jid=INS&type=tr>). The processes will depend on your source of funding, permissions to use material owned by an outside source, etc.

Journal of the International Neuropsychological Society

Volume 19

Number 2

February 2013

RESEARCH ARTICLES

- 119 Changes in Naming and Semantic Abilities With Aging From 50 to 90 years
C. Verhaegen and M. Poncelet
- 127 Neuropsychological Profiles of Children with Aqueeductal Stenosis and Spina Bifida Myelomeningocele
L.E. Hampton, J.M. Fletcher, P. Cirino, S. Blaser, L.A. Kramer, and M. Dennis
- 137 Affective Decision-Making on the Iowa Gambling Task in Children and Adolescents with Fetal Alcohol Spectrum Disorders
K. Kully-Martens, S. Treit, J. Pei, and C. Rasmussen
- 145 Predictors of 1-Month and 1-Year Neurocognitive Functioning from the UCLA Longitudinal Mild, Uncomplicated, Pediatric Traumatic Brain Injury Study
T. Babikian, D. McArthur, and R.F. Asarnow
- 155 Prospective Memory and Antiretroviral Medication Non-Adherence in HIV: An Analysis of Ongoing Task Delay Length Using the Memory for Intentions Screening Test
A.J. Poquette, D.J. Moore, B. Gouaux, E.E. Morgan, I. Grant, S.P. Woods, and The HNRP Group
- 162 The Impact of Semantic Dementia on Everyday Actions: Evidence from an Ecological Study
N. Bier, C. Bottari, C. Hudon, S. Joubert, G. Paquette, and J. Macoir
- 173 Influence of Cognitive Function on Speech and Articulation Rate in Multiple Sclerosis
J.D. Rodgers, K. Tjaden, L. Feenaughty, B. Weinstock-Guttman, and R.H.B. Benedict
- 181 Decision Making after Traumatic Brain Injury: A Temporal Discounting Paradigm
R.Ll. Wood and L. McHugh
- 189 More than Intelligence: Distinct Cognitive/Behavioral Clusters Linked to Adaptive Dysfunction in Children
A. Papazoglou, L.A. Jacobson, and T.A. Zabel
- 198 Using the Repeatable Battery for the Assessment of Neuropsychological Status (RBANS) Effort Index to Predict Treatment Group Attendance in Patients with Schizophrenia
R.C. Moore, T. Davine, A.L. Harmell, V. Cardenas, B.W. Palmer, and B.T. Mausbach
- 206 Motor Contingency Learning and Infants with Spina Bifida
H.B. Taylor, M.A. Barnes, S.H. Landry, P. Swank, J.M. Fletcher, and F. Huang
- 216 Major Depressive Disorder, Cognitive Symptoms, and Neuropsychological Performance among Ethnically Diverse HIV+ Men and Women
R.P. Fellows, D.A. Byrd, and S. Morgello; for the Manhattan HIV Brain Bank

BOOK REVIEWS

- 226 *Self-Regulation: Brain, Cognition, and Development*, by Andrea Berger
A.K. Heffelfinger
- 227 *Specialty Competencies in Clinical Neuropsychology: A Primer on Common Practices*, by Gregory J. Lamberty & Nathaniel W. Nelson
B.L. Roper

CORRIGENDA

- 229 Theory of Mind in Children with Traumatic Brain Injury
M. Dennis, N. Simic, H.G. Taylor, E.D. Bigler, K. Rubin, K. Vannatta, C.A. Gerhardt, T. Stancin, C. Roncadin, and K.O. Yeates
- 230 Emotional Expression and Socially Modulated Emotive Communication in Children with Traumatic Brain Injury
M. Dennis, N. Simic, H.G. Taylor, E.D. Bigler, K. Rubin, K. Vannatta, C.A. Gerhardt, T. Stancin, C. Roncadin, and K.O. Yeates
