

SEED SCIENCE RESEARCH

SPECIAL ISSUE

Includes papers presented at the
International Workshop, Desiccation Tolerance and
Sensitivity of Seeds and Vegetative Plant Tissues

CAB INTERNATIONAL

SEED SCIENCE RESEARCH

Seed Science Research is an international journal specifically addressing basic scientific research on seeds published quarterly by CAB INTERNATIONAL

Editor

M Black, London, UK

Associate Editors

C M Karssen, Wageningen, Netherlands
R D Hill, Manitoba, Canada

Review Board

J D Bewley, Guelph, Canada

K J Bradford, Davis, USA

C M Bray, Manchester, UK

D Côme, Paris, France

A Cumming, Leeds, UK

M Delseny, Perpignan, France

G Egley, Stoneville, USA

M Fenner, Southampton, UK

G B Fincher, Glen Osmond, Australia

B Frankland, London, UK

J Greenwood, Guelph, Canada

P J Grime, Sheffield, UK

A C Leopold, Ithaca, USA

A Marcus, Philadelphia, USA

A Mayer, Jerusalem, Israel

B McKersie, Guelph, Canada

D Osborne, Oxford, UK

N Pinfield, Bristol, UK

R J Probert, Ardingly, UK

E H Roberts, Reading, UK

P Schopfer, Freiburg, Germany

C W Vertucci, Fort Collins, USA

E Vigil, Beltsville, USA

M K Walker-Simmons, Pullman, USA

T Wang, Norwich, UK

Seed Science Research is a medium for original articles on the physiology, biochemistry and molecular biology of seeds, covering seed and embryo development, maturation, dormancy, germination, viability, longevity, vigour, reserve mobilization, and the early stages of establishment. Papers on microbial effects, ecology,

ecophysiology and 'applied' research (e.g. priming, pelleting, biotechnology) will also be included if they have a sound theoretical base or a high physio-biochemical content and/or relevance. The journal includes review articles, both commissioned and contributed, and letters (see Notes for Authors).

Authors should submit original manuscript and artwork plus two copies to Professor M Black, Division of Life Sciences, King's College London, Campden Hill Road, London, W8 7AH, UK (see Notes for Authors)

Orders and enquiries concerning subscriptions should be sent to

Seed Science Research

Research Papers

- Bianco, J , Garelo, G & Le Page-Degivry, M T** Release of dormancy in sunflower embryos by dry storage involvement of gibberellins and abscisic acid 57
- Bradford, K J & Haigh, A M** Relationship between accumulated hydrothermal time during seed priming and subsequent seed germination rates 63
- Dahal, P & Bradford, K J** Hydrothermal time analysis of tomato seed germination at suboptimal temperature and reduced water potential 71
- Lanteri, S , Saracco, F., Kraak, H L & Bmo, R J** The effects of priming on nuclear replication activity and germination of pepper (*Capsicum annuum*) and tomato (*Lycopersicon esculentum*) seeds 81
- Le Deunff, Y & Loiseau, J** Dry matter accumulation into zygotic seed, a model and its application to artificial seeds 89
- West, M M., Oekenden, I. & Lott, J. N. A.** Leakage of phosphorus and phytic acid from imbibing seeds and grains 97

Short Communication

- Baker, E H & Bradford, K J** The fluorescence assay for Maillard product accumulation does not correlate with seed viability 103

- International Workshop on Desiccation Tolerance and Sensitivity of Seeds and Vegetative Plant Tissues** 109
- Berjak, P , Bradford, K. J., Kovach, D A. & Pammenter, N. W** Differential effects of temperature on ultrastructural responses to dehydration in seeds of *Zizania palustris* 111
- Bohicchio, A , Rizzi, E , Balconi, C , Vernieri, P & Vazzana, C** Sucrose and raffinose contents and acquisition of desiccation tolerance in immature maize embryos 123
- Finch-Savage, W E & Blake, P S.** Indeterminate development in desiccation-sensitive seeds of *Quercus robur* L 127
- Gee, O H , Probert, R. J & Coomber, S A** 'Dehydrin-like' proteins and desiccation tolerance in seeds 135
- Hoekstra, F A , Haigh, A M , Tetteroo, F A A & van Roekel, T** Changes in soluble sugars in relation to desiccation tolerance in cauliflower seeds 143
- Jiang, L & Kermode, A R** Role of desiccation in the termination of expression of genes for storage proteins 149

Continued

Osborne, D J & Boubriak, I I. DNA and desiccation tolerance	175
Pammenter, N. W , Berjak, P., Farrant, J. M , Smith, M. T & Ross, G Why do stored hydrated recalcitrant seeds die?	187
Salmen Espindola, L , Nom, M., Corbineau, F. & Côme, D. Cellular and metabolic damage induced by desiccation in recalcitrant <i>Araucaria angustifolia</i> embryos	193
Tetteroo, F. A A., Bomal, C , Hoekstra, F. A & Karssen, C M. Effect of abscisic acid and slow drying on soluble carbohydrate content in developing embryoids of carrot (<i>Daucus carota</i> L) and alfalfa (<i>Medicago sativa</i> L)	203
Vertucci, C. W , Crane, J., Porter, R. A & Oelke, E. A. Physical properties of water in <i>Zizania</i> embryos in relation to maturity status, water content and temperature	211
von Teichman, I & van Wyk, A E. Structural aspects and trends in the evolution of recalcitrant seeds in dicotyledons	225
Wechsberg, G. E., Bray, C. M & Probert, R J Expression of 'dehydrin-like' proteins in orthodox seeds of <i>Ranunculus sceleratus</i> during development and water stress	241
Xu, N. & Bewley, J D. Desiccation and the switch from seed development to germination Alfalfa embryos can synthesize storage proteins after germination if maturation drying is prevented	247
Short Communication	
Fu, J R., Jin, J. P., Peng, Y. F & Xia, Q H. Desiccation tolerance in two species with recalcitrant seeds <i>Clausena lansium</i> (Lour) and <i>Litchi chinensis</i> (Sonn)	257
Comment	
Berjak, P & Pammenter, N W Recalcitrance is not an all-or-nothing situation	263
