Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 18 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 20, 2017 (18 issues):
Internet/print package: £1367/\$2621 Americas only/€2190 EU only
Internet only: £989/\$1877 Americas only/€1573 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing

interests. The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Monitoring and surveillance

Labelling completeness and sodium content of packaged foods in India
C Johnson, SR Thout, S Mohan, E Dunford, C Farrand, JHY Wu, FJ He, R Shivashankar, J Webster, A Krishnan, V Garg, PK Maulik, D Prabhakaran and B Neal 2839

Assessment and methodology

Adapting the standardised computer- and interview-based 24 h dietary recall method (GloboDiet) for dietary monitoring in Latin America
S Bel-Serrat, V Knaze, G Nicolas, DM Marchioni, J Steluti, A Mendes, SP Crispim, RM Fisberg, RA Pereira, MC Araujo, R Sichieri, EM Yokoo, T Sánchez-Pimienta, TC Aburto, LS Pedraza and N Slimani 2847

Developing multidimensional measures of healthy food access among low-income adults in Cleveland, Ohio, USA
SA Flocke, P Ohri-Vachispati, E-J Shon, ES Trapl, E Borawski, K Matlack and DA Freedman 2859

Table Talk: development of an observational tool to assess verbal feeding communications in early care and education settings
T Swindle, JM Rutledge, B Dix and L Whiteside-Mansell 2869

Nutritional status and body composition

Vitamin D insufficiency/deficiency is associated with insulin resistance in Brazilian children, regardless of body fat distribution
LC Milagres, NP Rocha, MDS Filgueiras, FMD Albuquerque, APP Castro, MC Pessoa, MDCG Peluzio and JFD Novaes 2878

Vitamin D supplementation and vitamin D status in children of immigrant background in Norway
AA Madar, TE Gundersen, AM Haug and HE Meyer 2887

Behavioural nutrition

Strategies for public health initiatives targeting dairy consumption in young children: a qualitative formative investigation of parent perceptions
ME Jung, JE Bourne, A Buchholz and KA Martin Ginis 2893

Nutrition Facts Panel use is associated with diet quality and dietary patterns among Latinos with type 2 diabetes
G Kollannoor-Samuel, S Segura-Pérez, FM Shebl, NL Hawley, G Damio, J Chhabra, S Vega-López, ML Fernandez and R Pérez-Escamilla 2909

Food appearances in children's television programmes in Iceland
S Olafsdottir and C Berg 2920

Nutritional epidemiology

Trends in dietary fat and fatty acid intakes and related food sources among Chinese adults: a longitudinal study from the China Health and Nutrition Survey (1997–2011)
X Shen, A Fang, J He, Z Liu, M Guo, R Gao and K Li 2927

Secular trends in dietary patterns of young children in Brazil from 1996 to 2006
AEM Rinaldi and WL Conde 2937

Economics and environment

Household income is associated with food and nutrient intake in Japanese schoolchildren, especially on days without school lunch
N Murayama, H Ishida, T Yamamoto, S Hazano, A Nakanishi, Y Arai, M Nozue, Y Yoshioka, S Saito and A Abe 2946

Lower education predicts poor response to dietary intervention in pregnancy, regardless of neighbourhood affluence: secondary analysis from the ROLO randomised control trial
EC O'Brien, G Alberdi, AA Geraghty and FM McAuliffe 2959

The mismatch between observational measures and residents' perspectives on the retail food environment: a mixed-methods approach in the Heart Healthy Hoods study
J Díez, R Valiente, C Ramos, R García, J Gittelsohn and M Franco 2970

The school environment and sugar-sweetened beverage consumption among Guatemalan adolescents
KM Godin, V Chacón, J Barnoya and ST Leatherdale 2980

Interventions

Effects of the Healthy Start randomized intervention on dietary intake among obesity-prone normal-weight children
JF Rohde, SC Larsen, L Ångquist, NJ Olsen, M Stougaard, EL Mortensen and BL Heitmann 2988

Effects of lipid-based nutrient supplements v. micronutrient powders on nutritional and developmental outcomes among Peruvian infants
SL Matias, A Vargas-Vásquez, R Bado Pérez, LA Valdivia, OA Vivanco, AR Martín and JPN Ruiz 2998

Public policies

The legislative framework for salt iodization in Asia and the Pacific and its impact on programme implementation
K Codling, C Rudert, F Bégin and JP Peña-Rosas 3008

Is Aboriginal nutrition a priority for local government? A policy analysis
C Helson, R Walker, C Palermo, K Rounsefell, Y Aron, C MacDonald, P Atkinson and J Browne 3019
