JUST ELECTIONS

Creating a Fair Electoral Process in the United States

Dennis F. Thompson

"While the book makes numerous references to law and courts, its goal is a much broader examination of the institutions that link the people to their government. . . . Well written and richly documented. . . . The real value of Thompson's book is found in the questions it presents and in the way it forces the reader to think hard about the application of important principles to the electoral process."—Thomas G. Walker, *Law and Politics Book Review*

MEASURING JUDICIAL INDEPENDENCE

The Political Economy of Judging in Japan

J. Mark Ramseyer and Eric B. Rasmusen

This book uses the latest statistical techniques to examine whether (and if so, to what extent) Japanese politicians manipulate the careers of lower court judges to political advantage. On the basis of careful econometric analysis of career data for hundreds of judges, they find that Japanese politicians do influence judicial careers discreetly and indirectly: judges who decide politically charged cases in ways favored by the ruling party enjoy better careers after their decisions than those who do not.

A CLEARING IN THE FOREST

Law, Life, and Mind

Steven L. Winter

"This book is rich, lively and extremely thorough. Its argument has implications far beyond the law, affecting many other kinds of thinking . . . Altogether, Steven Winter has made a most useful clearing in a forest where a great many scholars are lost."

YOUTH ON TRIAL

A Developmental Perspective on Juvenile Justice
Edited by Thomas Grisso and Robert G. Schwartz

"Grisso and Schwartz have assembled the leading scholars in the field and produced a book that resembles nothing ever before written. *Youth on Trial* challenges the choices legislators have made in recent years to push more and more young people into adult court without taking account of the ways in which adolescents really are different from adults. This book, in a careful voice, is a measured effort to reintroduce sound public policy back into the juvenile justice discussion and will be of enormous importance to anyone interested in policy issues surrounding juvenile crime and delinquency."—Martin Guggenheim, Professor of Clinical Law and Director of Clinical and Advocacy Programs, New York University School of Law

PERVASIVE PREJUDICE?

Unconventional Evidence of Race and Gender
Discrimination

Ian Ayres

"Ayres presents empirical evidence that blacks and females are consistently at a disadvantage in a variety of markets, including retail car sales, bail bonding, and kidney transplantation. Challenging traditional economic theory that free markets drive out discrimination, he uses game-theoretic and other economic methodologies to show how prejudice can enter the bargaining process even when participants are supposedly acting as rational economic agents."

The complexity and breadth of each of the editor's various studies is astounding. . . . An impressive collection of research that helps the reader better understand the inherent flaws of the punitive-damages decision-making process."
