JOURNAL OF PLASMA PHYSICS

https://doi.org/10.1017/S0022377800002117 Published online by Cambridge University Press

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England

ASSOCIATE EDITORS

PROF. D. BERSHADER

Department of Aeronautics and Astronautics, Stanford University, Stanford, California 94305, *U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy, University of Manchester, Manchester M*13 9*PL, England*

PROF. W. B. THOMPSON

Department of Physics, University of California, La Jolla, California 92093, *U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

Copying

This journal is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the U.S.A. who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of U.S. copyright law) subject to payment to C.C.C of the per copy fee of $05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-3778/84/2828–0001 $05.00.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, U.S.A., is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from the Cambridge or New York offices of the Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price (which includes postage) of Volumes 31 and 32 (1984) is £75.00 net per volume (US $190.00 in the U.S.A. and Canada) for institutions; £37.50 (US $95.00 per volume for individuals. Single parts cost £27.00 each (US $70.00 in the U.S.A. and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y., and at additional mailing offices. *POSTMASTER*: send address changes in U.S.A. and Canada to Cambridge University Press, 32 East 57th Street, New York, N.Y. 10022.

CONTENTS TO VOLUME 32

PART 1 AUGUST 1984

On the Vlasov fluid stability of the $m = 0$ mode in a pure Z pinch. M. COPPINS, D. J. BOND and M. G. HAINES 1

Pump fluctuation effects on parametric instabilities in plasmas. A. H. BELBACHIR and A. Z. AKCASU 7

Hydromagnetic equations for collisionless plasmas in strong magnetic fields. S. DUHAU 23

High-energy kinetic theory of a particle beam generated plasma. N. PEYRAUD 35

Cyclotron radiation from a relativistic electron beam in a static magnetic field. Z. G. AN, Y. C. LEE, T. T. LEE and H. H. CHEN 55

Unified kinetic theory of plasma correlations. M. A. GUILLEN and R. L. LIBOFF 81

Analysis of ideal MHD equilibrium and axisymmetric stability for finite aspect ratio tokamaks with elliptic cross-section and flat current profile. R. GRAUER and E. REBHAN 99

Laser-induced profile modifications in magnetized plasmas. N. N. RAO, P. K. SHUKLA and M. Y. YU 119

Stability of a magnetized positive column between coaxial cylinders. V. K. DOGRA and M. S. UBEROI 129

Diffusion coefficient and Kolmogorov entropy of magnetic field lines. G. ZIMBARDO, P. VELTRI and F. MALARA 141

Effect of electron thermal anisotropy on the kinetic cross-field streaming instability. S. T. TSAI, M. TANAKA, J. D. GAFFEY, E. H. DA JORNADA, C. S. WU and L. F. ZIEBELL 159

PART 2 OCTOBER 1984

Toroidal plasma configuration with non-planar magnetic axis. H. M. RIZK 179

Exact damped sinusoidal electric field of nonlinear one-dimensional Vlasov–Maxwell equations. B. ABRAHAM-SHRAUNER 197

The spectrum of resistive MHD modes in cylindrical plasmas. C. M. RYU and R. C. GRIMM 207

Resonant parts of nonlinear response tensors. D. B. MELROSE and J. KUIJPERS 239

Electron-acoustic and ion–ion hybrid resonance–drift instability in inhomogeneous multi-ion-species magnetoplasmas. S. S. DASH, A. S. SHARMA and B. BUTI 255

https://doi.org/10.1017/S0022377800002117 Published online by Cambridge University Press

Stability theorem for KdV-type equations. E. W. Laedke and K. H. Spatschek 263

Particle losses due to RF-enhanced pitch-angle scattering into velocity space loss regions. D. Anderson and M. Lisak 273

Linear and nonlinear propagation of electron-acoustic wave in a multi-species plasma. S. Guha and C. B. Dwivedi 283

An asymptotic analysis of the radiation pattern of ion cyclotron resonance heating antennas. R. Koch, V. P. Bhatnagar and R. R. Weynants 291

The energy density of electromagnetic waves in a cold magnetoplasma. L. R. O. Storey 309

Low aspect-ratio MHD toroidal equilibria. L. de Menna and S. Martini 319

Theory of Raman sidescatter from a magnetized plasma. H. C. Barr, T. J. M. Boyd and R. Rankin 331

Corrigendum. S. R. Spangler and J. P. Sheerin 347

Part 3 December 1984

Spontaneous generation of magnetic field in an imploding plasma. S. K. H. Auluck 349

Kinetic theory of electromagnetic instabilities in weakly ionized neon plasma with inelastic collisions. V. J. Žigman and B. S. Milić 359

Dissipation by thermal forces in quantum plasmas. R. R. Burman and D. E. McClelland 369

A numerical investigation of current-driven instabilities near the ion–ion hybrid frequency. D. J. Grayson and M. A. Hellberg 387

Axisymmetric control of large tokamak devices. T. H. Jensen and F. W. McClain 399

Experimental results on trapping a gun plasma in a toroidal magnetic cusp experiment. P. A. Pincosy, B. R. Myers, M. A. Levine, B. Feinberg, R. A. Niland and L. Soroka 413

A parametric survey of the first critical Mach number for a fast MHD shock. J. P. Edmiston and C. F. Kennel 429

Bifurcation of the resistive Alfvén wave spectrum. R. L. Dewar and B. Davies 443

Longitudinal electron waves for a plasma with a bi-Maxwellian velocity distribution. J. G. Trotignon 463

Continued fraction expansions for the plasma dispersion function. J. H. McCabe 479

https://doi.org/10.1017/S0022377800002117 Published online by Cambridge University Press

The ponderomotive force of an electromagnetic wave in a collisional plasma. M. L. SAWLEY 487

BOOK REVIEW

Nonlinear Waves. Edited by L. Debnath 495

AUTHOR INDEX TO VOLUME 32 497

JOURNAL OF PLASMA PHYSICS

Volume 32 Part 3 December 1984

CONTENTS

Spontaneous generation of magnetic field in an imploding plasma
S. E. H. AULUCK *page* 349

Kinetic theory of electromagnetic instabilities in weakly ionized neon plasma with inelastic collisions
V. J. ŽIGMAN AND B. S. MILIĆ 359

Dissipation by thermal forces in quantum plasmas
R. R. BURMAN AND D. E. MCCLELLAND 369

A numerical investigation of current-driven instabilities near the ion–ion hybrid frequency
DIANE J. GRAYSON AND M. A. HELLBERG 387

Axisymmetric control of large tokamak devices
T. H. JENSEN AND F. W. MCCLAIN 399

Experimental results on trapping a gun plasma in a toroidal magnetic cusp experiment
P. A. PINCOSY, B. R. MYERS, M. A. LEVINE, B. FEINBERG, R. A. NILAND AND L. SOROKA 413

A parametric survey of the first critical Mach number for a fast MHD shock
J. P. EDMISTON AND C. F. KENNEL 429

Bifurcation of the resistive Alfvén wave spectrum
R. L. DEWAR AND B. DAVIES 443

Longitudinal electron waves for a plasma with a bi-Maxwellian velocity distribution
J. G. TROTIGNON 463

Continued fraction expansions for the plasma dispersion function
J. H. MCCABE 479

The ponderomotive force of an electromagnetic wave in a collisional plasma
M. L. SAWLEY 487
