

THE
ANGLICAN
DILEMMA

by

THE RIGHT HON.
SIR HENRY SLESSER

*Author of "Order and Disorder" and
"The Middle Ages in the West", etc.*

Since its establishment, the Church of England has passed through many severely critical phases. From the profound and searching controversies of the 16th and 17th centuries and the spiritual and historical ferment of the Oxford Movement, Anglicanism seems to have passed into a time of relative quiet. But in Sir Henry Slessor's view it is not the peace of the healthy organism. The former security of the Latitudinarians seems to have become, in our time, the indifference and desiccation of much organised religion, and the provincialism of what Dean Inge has called 'the London, Brighton and South Coast Religion'.

To find an explanation for the present Anglican problem, one always present but especially apparent today, of keeping together a Church and community, when the Church itself is divided by doctrine and practice, Sir Henry has re-examined the early history of Anglicanism. With all the acute reasoning and amount of illustrative detail one hopes for from a distinguished judge, the author traces the evolution of the Anglican Church to its unique position in Protestantism.

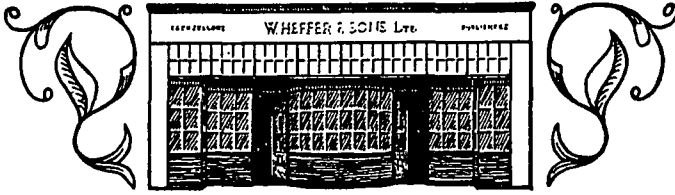

In the second part of the book Sir Henry makes a trenchant criticism of such matters as the Church's failure to win the industrial masses, and the sterility resulting to both Church and people from this.

THE DEVELOPMENT OF
ENGLISH THEOLOGY
IN THE LATER
NINETEENTH CENTURY
L. E. ELLIOT-BINNS

This book, which is substantially the text of *The Burroughs Memorial Lectures* delivered at Leeds University in 1950, describes the development of our theology from 1860. Although the author is mainly concerned with England, he makes reference to a number of Continental thinkers whose rather extreme ideas were taken up by English theologians. This book is, in fact, a survey out of which much of our present-day theology has arisen.
