ON THE DIRECT NUMERICAL CALCULATION OF

ELLIPTIC FUNCTIONS & INTEGRALS

By L. V. KING. *Paper Covers, 3s. 6d. net. Cloth Covers, 4s. 6d. net.*

"A learned and brilliant monograph Containing many actually new results and providing in neat form a compendium of formulae which will be of great value in the rapid reduction to numerical results of the solutions of many physical problems."

Times Educational Supplement.

GENERALIZED HYPERGEOMETRIC SERIES

By W N. BAILEY   *6s. 6d. net.*

THE primary object of this volume is to collect the special results obtained in the numerous papers on the generalized hypergeometric series written since the publication in 1923 of Professor G. H. Hardy's *A Chapter from Ramanujan's Note-book.*

Cambridge Tracts in Mathematics, No. 32.

INTERPOLATORY FUNCTION THEORY

By J. M. WHITTAKER.   *6s. 6d. net.*

PROFESSOR WHITTAKER has gathered together a number of results on interpolation, finite differences and successive derivatives which seem to have something in common, avoiding as far as possible all matter which has appeared in other books and all matter concerned with formulae in themselves rather than with their applications.

Cambridge Tracts in Mathematics, No. 33.

INEQUALITIES

By G. H. HARDY, J. E. LITTLEWOOD, and G. POLYA.   *16s. net.*

THE first six chapters describe the inequalities, such as Hölder's, which are of daily use in analysis; the remaining four form an introduction to certain regions of analysis in which inequalities play a central part.
