

## ERRATUM

# Metabolic rate and growth in the temperate bivalve *Mercenaria mercenaria* at a biogeographical limit, from the English Channel—ERRATUM

ALASTAIR BROWN, OLAF HEILMAYER AND SVEN THATJE

doi:10.1017/S0025315409991470, Published by Cambridge University Press, 05 July 2010.

The equation for individual age-specific somatic production and the equation for individual age-specific respiration on page 1021 of the above publication (Brown *et al.*, 2010) were printed incorrectly. The correct equations appear below.

$$P_s = (10^{(-2.800 + 3.315 \cdot \log(80.13 \cdot (1 - e^{-0.149 \cdot ((t+1)^{-0.542}}))})) - 10^{(-2.800 + 3.315 \cdot \log(80.13 \cdot (1 - e^{-0.149 \cdot (t^{-0.542}}))}))}) \cdot 18.393$$

$$\ln(R) = 6.004 - 0.457 \cdot \ln(((10^{(-2.800 + 3.315 \cdot \log(80.13 \cdot (1 - e^{-0.149 \cdot ((t-1)^{-0.542}}))})) + 10^{(-2.800 + 3.315 \cdot \log(80.13 \cdot (1 - e^{-0.149 \cdot (t^{-0.542}}))}))}) \div 2) \cdot 18.393)$$
