CONTENTS

	PAGE
INTRODUCTION	5
THE APPROACH	6
COMPONENTS OF PREDATION	7
THE ANALYSIS	12
The Experimental Animals	12
General Form of Functional Response to Prey Density	14
Hunger	15
Interaction of Hunger with Other Components	20
<i>Rate of Successful Search</i>	20
Size of the Area of Reaction of Predator for Prey	20
Speed of Movement of Predator and Prey	30
Capture Success	34
<i>Time Predator and Prey are Exposed</i>	40
<i>Time Spent Handling Prey</i>	40
<i>Time Spent Pursuing or Stalking Prey</i>	40
<i>Time Spent Eating Each Prey</i>	42
<i>Time Spent in a "Digestive" Pause</i>	43
Other Components Affecting the Functional Response of <i>H. crassa</i>	45
THE SYNTHESIS	48
General Form of the Synthesis	48
Detailed Structure of the Attack Cycle	50
<i>Time Taken in a Digestive Pause, TD</i>	50
<i>Time Spent Searching, TS</i>	51
<i>Time Spent Pursuing Each Prey, TP</i>	53
<i>Time Spent Eating Each Prey, TE</i>	54
<i>The Complete Attack Cycle</i>	54
OUTPUT FROM THE MODEL	55
DISCUSSION	66
The Distinctive Features of Predation and Other Biological Processes	66
Problem of Achieving Reality and Generality	67
<i>Reality</i>	67
<i>Generality</i>	68
SUMMARY	77
ACKNOWLEDGMENTS	78

	PAGE
APPENDIX I. Estimating Fly Velocity Knowing the Number of Contacts of Flies With a 3-cm. Diameter Contact Area	79
APPENDIX II. Expressing the Hunger Equation in Terms of Unspecified Time	79
APPENDIX III. Summary of Fragmental Equations	80
APPENDIX IV. Derivation of Equations Involved in Determining the Area of the Encounter Path	81
APPENDIX V. Table of Symbols	83
REFERENCES	84
