

# New from Cambridge

## Animal Conservation

Published for The Zoological Society of London

This new journal, launched in 1998, published on behalf of the The Zoological Society of London, brings together exciting new research into the factors which influence the conservation of animal species and their habitats. Subjects covered by the journal include ecology, behavioural ecology and wildlife biology; evolutionary ecology and genetics; population biology; systematic biology and phylogenetics; biodiversity and biogeography; management (including translocation and sustainable use).

*Animal Conservation* provides a unique and important forum for rapid publication of novel, peer reviewed scientific studies, and will be essential reading not only for conservation biologists working in a range of related fields, but also for professionals working in governmental and non-governmental bodies, policy-makers and students.

### Subscriptions

Volume 2 in 1999: February, May, August and November

£81 for institutions print plus electronic;

£40 for individuals print only; £18 for

students; £21 for Zoological Society of London (Fellows)

ISSN 1367-9430

## Environmental Conservation

*Environmental Conservation* is one of the longest-standing and most authoritative of the journals dealing comprehensively with the science underpinning environmental concerns at a global level. Uniquely, it aims to cover all aspects of the field, including issues in human institutions, industry, pollution and habitat degradation, energy and materials sources, atmospheric and oceanic processes, and coastal zone management, while maintaining a foundation in underlying research. Published quarterly, the journal includes comment, subject reviews, standard and short research papers, book reviews and meeting reports on all relevant aspects of the broad subject involved.

*Environmental Conservation* publishes all accepted material rapidly and uses short papers and comment for particularly quick dissemination of research results and ideas. This journal is essential reading for all environmentalists, managers, consultants and scientists wishing to keep abreast of current developments in environmental science worldwide.

### Subscriptions

Volume 26 in 1999: March, June, September and December

£164 for institutions print plus electronic; £70 for individuals print only

ISSN 0376-8929
