This paper was published with an error in the legend of Figure 1. The legend showed “with tray service” represented by the hollow bar and “without tray service” as a solid bar. This should have been the reverse. The correct legend reads as follows:

**Fig. 1** When cafeterias go trayless, a smaller percentage of diners take salad; field study conducted among undergraduate students ( $n$  417; average age 19.1 years) on two evenings with identical menus, one with tray service (■) and one without (□), in a university cafeteria, north-eastern USA
