of the

AUSTRALIAN MATHEMATICAL SOCIETY

Volume 24 Number 2

October 1981

Distributive Ockham algebras: free algebras and injectivity	
by Moshe S. Goldberg	161
On r-regular r-connected non-hamiltonian graphs	
by Brad Jackson and T. D. Parsons	205
On the degree of approximation by Szász operators	
by Suresh Prasad Singh	221
On the distribution of winning moves in random game trees	
by J. A. Flanigan	227
Some geometric characterizations of inner product spaces	
by O. P. Kapoor and S. B. Mathur	239
On meromorphic functions of one complex variable having algebraic Laurent coefficients	
by Daniel Bertrand and Michel Waldschmidt	247
Projective distributive p-algebras	
by Alasdair Urquhart.	269
Free finitary algebras on compactly generated spaces	
by Brian J. Day	277
On a characterization of planar graphs	
by C. C. Chen.	289
Symmetric dual nondifferentiable programs	
by S. Chandra and I. Husain	295

ABSTRACTS OF AUSTRALASIAN PhD THESES

On the mixture maximum likelihood approach to estimation and clustering	
by Selvanayagam Ganesalingam	309
Regularization of linear operator equations	
by M. A. Lukas	313
Finite algorithms for linear optimisation problems	
by David I. Clark	315
Computing invariants for finitely presented nilpotent groups	
by Leon S. Sterling	317
Fixed by random coefficient time series	
by Barry G. Quinn	319

BULLETIN OF THE AUSTRALIAN MATHEMATICAL SOCIETY

Editor: Sidney A. Morris

Deputy Editor: K. R. Pearson

Honorary Editor: B. H. Neumann

Associate Editors

Robert S. Anderssen

D. A. Holton

Leon Simon

Alan L. Andrew

D. C. Hunt

G. Szekeres

B. D. Craven

P. E. Kloeden

D. G. Tacon

Brian A. Davey

J. S. Maritz

Colin J. Thompson

G. E. Davis

Rodney Nillsen

H. B. Thompson

J. R. J. Groves

Sheila Oates-Williams

Rudolf Vyborny

James M. Hill

A. J. van der Poorten

R. F. C. Walters

J. H. Rubinstein

Assistant Editors

Robert S. Anderssen

M. S. Brooks

INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after being evaluated by the Editor and an Associate Editor or another expert. Of course responsibility for the correctness of results published in the BULLETIN remains with the authors.

For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Nevertheless some meritorious papers will have to be rejected because speed of publication involves space limitations.

Authors should submit THREE clean, high quality copies to

The Editor, Bulletin of the Australian Mathematical Society,

Department of Pure Mathematics, La Trobe University,

Bundoora, Victoria 3083, Australia

but should not send the original typescript of their papers, as material submitted to the BULLETIN will usually not be returned. Authors should note that each paper submitted must include an abstract and a 1980 Mathematics Subject Classification.

As even minor revisions are generally not permitted, authors should read carefully all the details listed on the inside back cover.

Abstracts of PhD Theses

The BULLETIN endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 3 months of the degree being approved.
