

## Instructions for Contributors

*Zygote* is an international journal dedicated to the rapid publication of original research in early embryology. It covers interdisciplinary studies on gametogenesis through fertilization to gastrulation in animals and humans. The scope has been expanded to include clinical papers, molecular and developmental genetics. While the editors will favour work describing fundamental processes in the cellular and molecular mechanisms of animal development, and, in particular, the identification of unifying principles in biology, new technologies, review articles, debates and letters will become a prominent feature.

Subjects covered include gametogenesis, sperm–oocyte interaction, gamete and embryo physiology, cell polarity, cell–cell interactions, nuclear transfer, haploidization, molecular and developmental genetics, in-vitro fertilization, stem cell and cryoconservation technologies.

All manuscripts must be submitted online at:  
<http://mc.manuscriptcentral.com/zygote>

Submission of a paper will be taken to imply that it is unpublished and it is not being considered for publication elsewhere. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper.

There is no formal restriction on length; however, original articles and reviews of less than 15000 words are likely to appear sooner than longer ones. Short communications should not exceed 1500 words and News and Views Commentaries 500 words.

### Preparation of manuscripts

Manuscripts should be organised as follows: Title page (with full names and addresses of all authors, a running headline of up to 35 characters, and a contact address with telephone number and email address), an Abstract of not more than 250 words followed by 5 Keywords, Introduction, Materials and Methods, Results, Discussion (combined Results and Discussion may be used for short papers), Acknowledgements, References, Endnotes, Tables and Figure Legends.

Manuscripts should be prepared using SI units

### Figures

Figures should be numbered consecutively as they appear in the text. Any indication of features of special interest should also be included. Figures must be supplied electronically. They must be saved at final publication size and ideally supplied in the following file formats: halftone figures (black & white, and colour) as TIF files at 300 dpi; black & white line figures as TIF or EPS files at 1000 – 1200 dpi. PDF format is also accepted. When relevant, photographs should be submitted with proposed reduction or magnification indicated by a scale line on or beside, the illustration.

The places for insertion into the text should be indicated in the text as 'Fig. 1' etc. Legends for all illustrations should be typed together, separately from the main text.

More detailed information is available at:  
<http://journals.cambridge.org/artworkguide>

### Tables

Tables with concise headings should be placed at the end of the paper. Each table must have a text reference, in the form 'Table 1' etc.

### References

References should be cited in the text as Conklin (1905) showed or as shown (Conklin, 1905). For papers with three or more authors use et al. A full list of references in alphabetical order should be given at the end of the text: surname of author and initials; year of publication (in parentheses); title of paper; journal or book name (the former being abbreviated in accordance with the World List of Scientific Periodicals); volume number; first and last page of the reference. For books and conference proceedings, place of publication and publisher (and editor(s) if appropriate) should be included.

### Proofs

Proofs will be sent to the author for checking. Typographical or factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

### Offprints

A PDF offprint of each article will be supplied free to each first named author.

# ZYGOTE

The Biology of Gametes and Early Embryos

## CONTENTS

### ORIGINAL ARTICLES

**A specific adenylyl cyclase inhibitor (DDA) and a cyclic AMP-dependent protein kinase inhibitor (H-89) block the action of equine growth hormone on *in vitro* maturation of equine oocytes**

Pereira, G. R., Lorenzo, P. L., Carneiro, G. F., Bilodeau-Goeseels, S., Kastelic, J. & Liu, I. K. M. 795

**Effects of oocyte donor age and embryonic stage of development on transcription of genes coding for enzymes of the prostaglandins and progesterone synthesis pathways in bovine *in vitro* produced embryos**

Torres, A., Batista, M., Diniz, P., Silva, E., Mateus, L. & Lopes-da-Costa, L. 802

**Toxicity of cryoprotectants agents in freshwater prawn embryos of *Macrobrachium amazonicum***

Ferreira, A. V. L., Castro, E. J. T., Barbosa, M. S. A., de Sousa, M. L. N. M., de Araújo Neto, M. P., Filho, A. A. S. & de Souza Sampaio, C. M. 813

**Soluble sperm extract specifically recapitulates the initial phase of the Ca<sup>2+</sup> response in the fertilized oocyte of *P. ocellata* following a G-protein/ PLC signaling pathway**

Nakano, T. & Kyoizuka, K. 821

**Expression and cellular distribution of estrogen and progesterone receptors and the real-time proliferation of porcine cumulus cells**

Kempisty, B., Ziłkowska, A., Ciesiółka, S., Piotrowska, H., Antosik, P., Bukowska, D., Brüssow, K. P., Nowicki, M. & Zabel, M. 836

**Expression and localization of *Nlrp4g* in mouse preimplantation embryo**

Peng, H., Lin, X., Li, W. & Zhang, W. 846

**Chemically induced nucleation of activated bovine oocytes: chromatin and microtubule organization and production of viable cytoplasts**

Saraiva, N. Z., Oliveira, C. S., Leal, C. L. V., de Lima, M. R., Collado, M. D., Vantini, R., Monteiro, F. M., Niciura, S. C. M. & Garcia, J. M. 852

**Expression and cellular distribution of zona pellucida glycoproteins in canine oocytes before and after *in vitro* maturation**

Kempisty, B., Piotrowska, H., Bukowska, D., Woźna, M., Ciesiółka, S., Wojtanowicz-Markiewicz, K., Włodarczyk, R., Jopek, K., Jeseta, M., Bruska, M., Nowicki, M., Jąskowski, J. M., Brüssow, K.-P. & Zabel, M. 863

**Restricted development of mouse triploid fetuses with disorganized expression of imprinted genes**

Yamazaki, W., Takahashi, M. & Kawahara, M. 874

**The effects of extracellular ATP and its receptor antagonists on pig oocytes during *in vitro* maturation**

Wakizoe, E., Ashizawa, K., Sakamoto, S. H., Hemmi, K., Kobayashi, I. & Tsuzuki, Y. 885

**Effect of body condition and season on yield and quality of *in vitro* produced bovine embryos**

Chrenek, P., Kubovičová, E., Olexíková, L., Makarevich, A. V., Topocerová, S. & Ostró, A. 893

**Ultrastructural analysis of five patients with total sperm immotility**

Sousa, M., Oliveira, E., Alves, Á., Gouveia, M., Figueiredo, H., Ferraz, L., Barros, A. & Sá, R. 900

**Is the interchromosomal effect present in embryos derived from Robertsonian and reciprocal translocation carriers particularly focusing on chromosome 10 rearrangements?**

Tulay, P., Gultomruk, M., Findikli, N., Yagmur, E. & Bahceci, M. 908

**Disruption of exogenous eGFP gene using RNA-guided endonuclease in bovine transgenic somatic cells**

Choi, W. J., Yum, S. Y., Lee, S. J., Lee, W. W., Lee, J. H., Kim, S. J., Koo, O. J., Lee, B. C. & Jang, G. 916

**Chemical activation in *Rhinella arenarum* oocytes: effect of dehydroleucodine (DhL) and its hydrogenated derivative (2H-DhL)**

Medina, M. F., Bühler, M. I. & Sánchez-Toranzo, G. 924

**The effect of vitrification of immature bovine oocytes to the subsequent *in vitro* development and gene expression**

Faheem, M. S., Baron, E., Carvalhais, I., Chaveiro, A., Pavani, K. & da Silva, F. M. 933

**Lower apoptosis rate in ovine preantral follicles from ovaries stored in supplemented preservation media**

Gonçalves, R. J. S., Cavalcante, A. Y. P., Gouveia, B. B., Lins, T. L. B., Barberino, R. S., Menezes, V. G., Barros, V. R. P., Macedo, T. J. S., Figueiredo, J. R. & Matos, M. H. T. 943

### SHORT COMMUNICATION

**Investigation of histone H4 hyperacetylation dynamics in the 5S rRNA genes family by chromatin immunoprecipitation assay**

Burlibaşa, L. & Suciú, I. 951
