TABLE OF CONTENTS

ARTICLES

A brief introduction to algebraic set theory, by STEVE AWODEY	281
A natural axiomatization of computability and proof of Church's Thesis, by NACHUM DERSHOWITZ and YURI GUREVICH	299
Cohen and set theory, by AKIHIRO KANAMORI	351
Reconsidering ordered pairs, by DANA SCOTT and DOMINIC MCCARTY	379

REVIEWS

Notices	444

THE BULLETIN OF SYMBOLIC LOGIC (ISSN 1079-8986) is published quarterly, in the months of March, June, September, and December, by the Association for Symbolic Logic, Inc., 124 Raymond Avenue, Poughkeepsie, NY 12604-0001, USA. Periodicals postage is paid at Poughkeepsie NY and at additional mailing offices. The BULLETIN is distributed with THE JOURNAL OF SYMBOLIC LOGIC; the 2008 annual subscription price for the two journals is US\$555. Online subscription is available from Project Euclid; visit <http://projecteuclid.org/bs1>. **Postmaster:** Send address changes to *The Bulletin of Symbolic Logic*, c/o American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294, USA. Business correspondence should be sent to the Secretary-Treasurer of the Association, Charles Steinhorn (address on inside back cover).

The BULLETIN, the JOURNAL, and the REVIEW OF SYMBOLIC LOGIC are the official organs of the Association for Symbolic Logic, an international organization for furthering research in all aspects of symbolic logic. The BULLETIN encourages submission of *Articles* and *Communications* in all areas of logic, including mathematical or philosophical logic, logic in computer science or linguistics, the history or philosophy of logic, and applications of logic to other fields. The BULLETIN also publishes reviews of publications in logic.

Articles should be of broad interest and accessible to a wide audience of logicians. They may be purely expository, survey, or historical articles, or they may contain, in addition, new ideas or results or new approaches to old ones.

Communications should be announcements of important new results and ideas in any aspect of logic; they may be short papers in their final form or preliminary announcements (extended abstracts, position papers) of longer, full papers that will be published elsewhere. In any case, they should include, in addition to a description of the new results or ideas, enough history, background, and explanation to make the significance of the work apparent to a wide audience. *Communications* will be quickly refereed and published within six months of the submission of final versions.

CONTENTS OF VOLUME 14

ARTICLES

AWODEY, STEVE. A brief introduction to algebraic set theory	281
BONNAY, DENIS. Logicality and invariance	29
DERSHOWITZ, NACHUM and GUREVICH, YURI. A natural axiomatization of computability and proof of Church's Thesis	299
GOTTWALD, SIEGFRIED. Mathematical fuzzy logics	210
GRUSZCZYŃSKI, RAFAŁ and PIETRUSZCZAK, ANDRZEJ. Full development of Tarski's geometry of solids	481
KANAMORI, AKIHIRO. Cohen and set theory	351
PESTOV, VLADIMIR G. Hyperlinear and sofic groups: a brief guide	449
VON PLATO, JAN. Gentzen's proof of normalization for natural deduction	240
PRATT-HARTMANN, IAN. On the computational complexity of the numerically definite syllogistic and related logics	1
RUBIN, SASHA. Automata presenting structures: A survey of the finite string case ..	169
SCOTT, DANA and MCCARTY, DOMINIC. Reconsidering ordered pairs	379

COMMUNICATIONS

CHOLAK, PETER A., DOWNEY, RODNEY, and HARRINGTON, LEO A. The complexity of orbits of computably enumerable sets	69
JALIGOT, ERIC, MURANOV, ALEXEY, and NEMAN, AZADEH. Independence property and hyperbolic groups	88
VIALE, MATTEO. Forcing axioms, supercompact cardinals, singular cardinal combinatorics	99
