EDITOR

H. D. CROFTON,

Department of Zoology, University of Bristol, Bristol

EDITORIAL BOARD

ANN BISHOP, F.R.S. (*Chairman*)

D. R. ARTHUR

J. LLEWELLYN

L. G. GOODWIN

B. A. NEWTON

C. A. HOARE, F.R.S.

GWENDOLEN REES

P. TATE

President of the British Society for Parasitology *ex officio*

EDITORIAL PANEL

The Editor is also assisted in the refereeing and editing of papers by the following:

G. LAPAGE

W. P. ROGERS

D. L. LEE

G. SALT, F.R.S.

ELSPETH W. McCONNACHIE

G. I. SHARPE

BRIDGET M. OGILVIE

J. SMART

J. D. SMYTH

PARASITOLOGY publishes original work on parasitology. The scope of the Journal includes papers on morphology; cytology, histochemistry and fine structures; physiology, biochemistry and chemotherapy; and the ecology, life cycle and taxonomy of parasites and their vectors.

PARASITOLOGY is published once every two months. Each volume consists of three parts (published in February, April, June, August, October and December) plus an index. Proceedings of the British Society for Parasitology are published in appropriate issues.

SUBSCRIPTIONS may be sent to any bookseller or subscription agent or direct to Cambridge University Press, P.O. Box 92, London, N.W.1. Subscriptions in the U.S.A. should be sent to Cambridge University Press, 32 East 57th Street, New York, N.Y. 10022. The subscription price is £7 net (including postage) for a volume of three parts (\$23.00 in the U.S.A.), payable in advance; separate parts cost £3 net or \$9.50 each (plus postage).

SECOND CLASS POSTAGE PAID AT NEW YORK, N.Y.

BACK VOLUMES. Vols. 1—39: Inquiries should be addressed to Wm Dawson & Sons Ltd, Cannon House, Folkestone, Kent. Vols. 40 onwards: Quotations for parts still in print may be obtained from the London or New York offices of the Cambridge University Press.

**Contributors are strongly urged to study the notes for their guidance printed inside the back cover and to follow the recommendations set out there.**

The previous part was published on 3 April 1970.

## PART 1, FEBRUARY 1970

	PAGE
MOSS, G. D. The excretory metabolism of the endoparasitic digenean <i>Fasciola hepatica</i> and its relationship to its respiratory metabolism. (With 7 Figures in the Text) . . . . .	1
BECKETT, EVELYN B. and BOOTHROYD, B. Mode of nutrition of the larvae of the filarial nematode <i>Brugia pahangi</i> . (With 3 Plates) . . . . .	21
SNOW, KEITH R. and ARTHUR, DON R. Larvae of the <i>Ixodes ricinus</i> complex of species. (With 22 Figures in the Text) . . . . .	27
LYONS, KATHLEEN M. The fine structure and function of the adult epidermis of two skin parasitic monogeneans, <i>Entobdella soleae</i> and <i>Acanthocotyle elegans</i> . (With 4 Plates and 1 Figure in the Text) . . . . .	39
SNOW, KEITH R. The quantity of blood imbibed by <i>Hyalomma anatolicum anatolicum</i> Koch, 1844 (Ixodoidea, Ixodidae). (With 6 Figures in the Text) . . . . .	53
LITTLE, JOHN W. The excystment, growth and reproduction of <i>Acanthoparyphium spinulosum</i> Johnston, 1917 (Trematoda) in chicks fed various diets. (With 5 Figures in the Text) . . . . .	61
KUSEL, J. R. Studies on the structure and hatching of the eggs of <i>Schistosoma mansoni</i> . (With 4 Plates and 2 Figures in the Text) . . . . .	79
KUSEL, J. R. The penetration of human epidermal sheets by the cercariae of <i>Schistosoma mansoni</i> and the collection of schistosomula. (With 2 Plates) . . . . .	89
SPRENT, J. F. A. Studies on ascaridoid nematodes in pythons: the life-history and development of <i>Ophidascaris moreliae</i> in Australian pythons. (With 1 Plate and 16 Figures in the Text) . . . . .	97
MAPES, C. J. The development of <i>Haemonchus contortus in vitro</i> . II. The effect of disulphide-reducing and sulphhydryl-blocking reagents on the rate of development to the fourth-stage larvae. (With 11 Figures in the Text) . . . . .	123
ROSE, M. ELAINE. Immunity to coccidiosis: effect of betamethasone treatment of fowls on <i>Eimeria mivati</i> infection. (With 2 Figures in the Text) . . . . .	137
LONG, P. L. and ROSE, M. ELAINE. Extended schizogony of <i>Eimeria mivati</i> in beta-methasone-treated chickens. (With 1 Plate and 2 Figures in the Text). . . . .	147

## PART 2, APRIL 1970

SRIVASTAVA, V. M. L., GHATAK, S. and MURTI, C. R. KRISHNA. <i>Ascaridia galli</i> : lactic acid production, glycogen content, glycolytic enzymes and properties of purified aldolase, enolase and glucose-6-phosphate dehydrogenase. (With 11 Figures in the Text) . . . . .	157
--	-----

THREADGOLD, L. T. and READ, C. P. Cell relationships in <i>Hymenolepis diminuta</i> . (With 2 Plates) . . . . .	181
LUMSDEN, R. D., THREADGOLD, L. T., OAKS, J. A. and ARME, C. On the permeability of cestodes to colloids: an evaluation of the transmembranosis hypothesis. (With 5 Plates and 1 Figure in the Text) . . . . .	185
REES, GWENDOLEN. Some helminth parasites of fishes of Bermuda and an account of the attachment organ of <i>Alcicornis carangis</i> MacCallum, 1917 (Digenea: Bucephalidae). (With 3 Plates and 16 Figures in the Text) . . . . .	195
BRUCE, R. G. The structure and composition of the capsule of <i>Trichinella spiralis</i> in host muscle. (With 5 Plates) . . . . .	223
WAKELIN, D. Studies on the immunity of albino mice to <i>Trichuris muris</i> . Suppression of immunity by cortisone acetate. (With 1 Figure in the Text) . . . . .	229
WARREN, E. G. Observations on the life-cycle of <i>Toxocara mackerrasae</i> . (With 15 Figures in the Text) . . . . .	239
HOPKINS, C. A. Diurnal movement of <i>Hymenolepis diminuta</i> in the rat. (With 7 Figures in the Text) . . . . .	255
REISSIG, MAGDALENA. Characterization of cell types in the parenchyma of <i>Schistosoma mansoni</i> . (With 7 Plates) . . . . .	273
HEATH, D. D., SOUTHCOTT, W. H. and MAY, P. F. The use of sheep fistulated at the oesophagus for the recovery of strongyloid larvae from pasture . . . . .	281
ROSE, M. ELAINE and LONG, P. L. Resistance to <i>Eimeria</i> infection in the chicken: the effects of thymectomy, bursectomy, whole body irradiation and cortisone treatment . . . . .	291
KEARN, G. C. The production, transfer and assimilation of spermatophores by <i>Entobdella soleae</i> , a monogenean skin parasite of the common sole. (With 1 Plate and 4 Figures in the Text) . . . . .	301
SCHMIDT, G. D. and KUNTZ, R. E. Nematode parasites of Oceanica. VIII. Filariids of birds, with a new genus and four new species. (With 22 Figures in the Text) . . . . .	313

### PART 3, JUNE 1970

SCHLEIN, Y. A comparative study of the thoracic skeleton and musculature of the Pupipara and the Glossinidae (Diptera) (With 69 Figures in the Text) . . . . .	327
SPRENT, J. F. A. Studies on ascaridoid nematodes in pythons: the life history and development of <i>Polydelphis anoura</i> in Australian pythons. (With 1 Plate and 35 Figures in the Text) . . . . .	375
WILSON, R. A. Fine structure of the nervous system and specialized nerve endings in the miracidium of <i>Fasciola hepatica</i> . (With 4 Plates and 2 Figures in the Text) . . . . .	399
SMITH, K. Electron-microscopical observations on the body wall of the third-stage larva of <i>Haemonchus placei</i> . (With 4 Plates) . . . . .	411

Contents

vii

BAKER, J. R. Transmission of <i>Leucocytozoon sakharoffi</i> in England by <i>Simulium angustitarse</i> . (With 1 Figure in the Text) . . . . .	417
NUTTING, W. B. and SWEATMAN, G. K. <i>Demodex antechini</i> sp. nov. (Acari, Demodicidae) parasitic on <i>Antechinus stuartii</i> (Marsupialia). (With 2 Plates and 5 Figures in the Text) . . . . .	425
DASGUPTA, B. and CHATTERJEE, A. An unusual form of fertilization in the malaria parasite of the Himalayan flying squirrel. (With 1 Plate) . . . . .	431
LONG, P. L. Some factors affecting the severity of infection with <i>Eimeria tenella</i> in chicken embryos. (With 3 Figures in the Text) . . . . .	435
HEATH, D. D. The development of <i>Echinococcus granulosus</i> larvae in laboratory animals. (With 1 Plate and 2 Figures in the Text) . . . . .	449
WISKIN, MAUREEN. The oncomiracidium and post-oncomiracidial development of the hexabothriid monogenean <i>Rajonchocotyle emarginata</i> . (With 1 Plate and 6 Figures in the Text) . . . . .	457

**The Journal of  
General Microbiology**

Publishes original work on algae, bacteria, microfungi, protozoa and other micro-organisms.

Annual subscription £30  
(US \$100) for fifteen issues

**CAMBRIDGE  
UNIVERSITY PRESS**

**EXPERT  
PARASITOLOGIST**

needed by publisher to revise and update clinical parasitology study materials (40 pp. text and 25 pp. review questions). Prefer someone who teaches or is otherwise familiar with the content or trend of recent examinations. Please write indicating qualifications, experience, approximate time required for revision and fee expected.

Box 110, Cambridge University Press, 200 Euston Road, London N.W.1

*Publications issued by*

**COMMONWEALTH INSTITUTE OF ENTOMOLOGY**  
56 Queen's Gate, London, S.W. 7

***BULLETIN OF ENTOMOLOGICAL RESEARCH***

Published quarterly and containing original articles on economic entomology. *Post free.*  
Annual subscription (payable in advance) 150s. *od.*  
Prices of back parts and volumes on application.

***REVIEW OF APPLIED ENTOMOLOGY***

Consisting of abstracts or reviews of current literature on economic entomology throughout the world. Published monthly in two series:

*Series "A"* dealing with insect and other arthropod pests of cultivated plants, forest trees and stored products of animal and vegetable origin.

*Series "B"* dealing with insects, ticks, etc. conveying disease or otherwise injurious to man and animals. *Post free.*

*Series "A" Series "B"*  
Annual subscription (payable in advance) 270s. *od.* 120s. *od.*  
Prices of back parts and volumes on application.

***ZOOLOGICAL RECORD, part INSECTA***

Published annually and containing as complete a record as possible of the literature of the previous year, chiefly from the systematic standpoint.

Annual subscription 133s. 6d. *Post free.*  
Prices of back volumes on application.

# NOTES FOR CONTRIBUTORS

CONTRIBUTIONS will be welcomed from scientists of all nationalities, but must be written in English. Paper should be sent to Dr H. D. Crofton, Department of Zoology, University of Bristol, Woodland Road, Bristol BS8 1UG.

GENERAL. Submission of a paper will be taken to imply that it is unpublished and is not being considered for publication elsewhere. Papers published in *Parasitology* may not be reprinted or published in translation without permission from the Editorial Board. Papers should be as concise as clarity permits, and illustrations kept as few as possible. Attention to the following instructions will assist rapid publication:

TYPESCRIPTS. Papers should be typewritten with double spacing, on one side only of quarto paper leaving a margin of about 4 cm. on the left-hand side of each sheet. Sheets should be numbered consecutively. Heavily corrected typescripts may have to be returned to the author for retyping. Papers should state the name of the author and the address to which proofs are to be sent. The address of the laboratory at which the work was carried out will be printed with the authors' names at the head of the paper. A short title, not exceeding 44 letters, should be supplied for running headlines.

The general arrangement of the paper should be as follows: Introduction; Methods; Results; Discussion; Summary of results; References. Tables, explanations of text-figures or plates, and keys to the abbreviations used on figures should where necessary be on separate sheets (see below).

SYMBOLS, SIGNS AND ABBREVIATIONS used should be those listed in the booklet *Symbols, Signs and Abbreviations recommended for British Scientific Publications* (The Royal Society, 1969).

PLATES should only be included where they are absolutely essential. Authors may be required to bear part of the cost if an unduly large number is required. Photographs should be sharp glossy prints, trimmed and mounted on white card and grouped and numbered as they are required to appear in print (oversea contributors may prefer to submit unmounted prints with a sketch to indicate the proposed grouping). The area of a group cannot exceed 20 by 12.5 cm., after reduction (if any). Lettering is best indicated on an overlay or separate sketch.

TEXT FIGURES should not be more than about twice the size of the finished block, and the thickness of lines and size of points, stipples, etc. determined accordingly. The maximum size of any one group of figures, after reduction, is 20 by 12.5 cm. They must be drawn in Indian ink on white Bristol Board, heavy drawing paper or tracing paper; graph paper ruled in pale blue (but not other colours) is also acceptable. Explanatory lettering should be lightly inserted in blue pencil, with tally lines showing the position of the feature to which it refers, so that the printer may put in the finished lettering. Lettering should be limited to features essential to the understanding of the drawing or photograph, and abbreviations should be avoided wherever possible so that the details can be readily understood without reference to an explanatory key. Properly prepared scraperboard drawings may be suitable for reproduction as line drawings, but drawings with gradations of shading (e.g. washdrawings) are not. Please try to avoid creasing or folding illustrations. Legends to illustrations must be given on a separate sheet of paper, but scales of magnification should be given along-

side the illustrations. Each illustration must have the name of the author and figure number pencilled on the back. Plates and diagrams should be numbered separately and their approximate positions indicated in the margin of the typescript. It is very convenient if photographs of illustrations are sent with the papers in addition to the original figures; they are essential when the originals are very large, so that they may be sent through the post to referees.

TABLES should be kept to a minimum and the duplication of information in tables and graphs, avoided. They should be typed on separate sheets of paper and their approximate positions indicated in the margin of the typescript. Each table should be numbered and be designed to be printed in the normal orientation of the text with the data so grouped as to make the use of rules unnecessary, whenever possible.

NOMENCLATURE. Authors should follow the *International Rules of Nomenclature* in the names of organisms. When new names are introduced the recommendations of the *International Code of Zoological Nomenclature*, 1964, should be strictly adhered to, especially with regard to the designation of types and statements as to where such types are deposited.

REFERENCES should be given only when cited in the text and should be listed in alphabetical order at the end of the paper, in the following form:

Surname of author(s), initials; year of publication; title of paper; title of journal *in full*; volume number; first and last page numbers of the work cited. When books are listed, the title of the book should be underlined and it should be followed by the town of publication and the name of the publisher.

Where there is more than one reference to a particular author or group of authors with the same date, references should be distinguished by letters placed after the date, the letter *a* being used for the first reference cited and so on.

PROOFS sent to authors are already in page form and only essential corrections should be made on them. Excessive alterations, other than corrections of printers' errors, may be disallowed or charged to the author; they are in any case liable to delay publication. Correction should be made using the symbols in British Standard 1219: 1958, or its shortened version B.S. 1219C: 1958 (British Standards Institution, 2 Park Street, London, W.1) After correction, the printers' marked proof should be returned to the Editor.

OFFPRINTS. Fifty offprints of each paper are provided free of charge. Additional offprints may be ordered on the form sent out with proofs, provided this is returned within seven days of receipt.

MORE DETAILED INFORMATION on the preparation of manuscripts for publication is to be found in the following:

NUTTALL, G. H. F. (1940). Notes on the Preparation of Papers for Publication in the *Journal of Hygiene* and in *Parasitology*. *Parasitology* 32, 1-62 and *J. Hyg., Camb.* 40, 1-62. (Now out of print and also out of date in some respects.)

*The Journal of Physiology* (1966). Suggestions to Authors 182, 1-33, Cambridge University Press.

THE ROYAL SOCIETY published a second edition of *General Notes on the Preparation of Scientific Papers* in 1965. (The Royal Society, 6 Carlton House Terrace, London S.W.1.)
