GENERAL

- Abscess (bi-lateral) of the Septum following removal of the central Incisor—W. S. Syme. *Clin. Rec.*, 424
- Acustico-lateral Sense Organs in Fishes, The Mechanism of, with special reference to problems in the Physiology of semicircular canals—A. Sand. *Orig. Art.*, 449 ; *Soc. Procs.*, 464
- Alveolar Carbon Dioxide, The effects of plugging the nose on the—T. Rodolfo-Masera. *Abs.*, 139
- Aspiration through the Tympanic Membrane—Hubert M. Jay. *Clin. Rec.*, 385
- Asthma and the General Practitioner—James Adam. *Rev.*, 72
- Asthmatic Attack studied through the Bronchoscope—A. L. d'Abreu. *Abs.*, 472
- Atticoantrotomy, Conservative Radical Operation or, in 70 cases, The results of the—William McKenzie. *Orig. Art.*, 75
- Audiometric Tests and the Capacity to Hear Speech, Dr. Ewing. *Soc. Procs.*, 339
- Beta-Hemolytic Streptococcus, Recurrence of Otitic Infections due to the—John Marquis Converse. *Abs.*, 447
- Bismuth, The treatment of acute Tonsillitis by injections of—Vittorino Pescetti. *Abs.*, 190
- Brain Abscesses (otogenous), Pathological Histology of—G. S. Bilinkis. *Abs.*, 471
- Bronchus, Unsuspected Foreign Body in—A. Ashton Smalley. *Clin. Rec.*, 282
- Cancer and Tuberculosis of the Larynx—Giorgio Rossi. *Abs.*, 137
- Cancer (intrinsic laryngeal), Treatment of (Surgery or Radiation)—F. Holt Diggle. *Letter to Ed.*, 141
- Cancers of the Hypo-pharynx, X-ray Treatment of—F. Baclesse. *Abs.*, 191
- Carcinoma of the Œsophagus: The staging of Malignant Disease—W. M. Levitt. *Orig. Art.*, 251
- Carcinoma of the Trachea—A. M. Olsen. *Abs.*, 70
- Cardiac Function in the Tracheotomised—Renato Mennito-Ippolito. *Abs.*, 140
- Carotid Artery (internal), Some Anatomical Characteristics of the Intrapetrous portion of the—A. D'Avino. *Abs.*, 186
- Child, Ear Disease in the—A. G. Wells. *Soc. Procs.*, 30
- Chromium Workers, Nasal Lesions in—F. Ventura-Gregorini. *Abs.*, 135
- Cochlear Nerve and the Vascular Theory of Nerve Deafness, The—N. Asherson. *Orig. Art.*, 531
- Conservative Radical Operation or Atticoantrotomy in 70 cases, The results of the—William McKenzie. *Orig. Art.*, 75
- Convulsions and Post-convulsive Paralysis of Otogenic origin ; some clinical observations and case records—N. Asherson. *Orig. Art.*, 303

OPERATION CHAIR

Devised by Mr. MUSGRAVE WOODMAN, M.S., F.R.C.S.

for work in the upright position on the head and neck under an anæsthetic. Sufficiently rigid and stable to enable the surgeon to undertake work on the brain, mastoid and gasserian ganglion as well as for use in general nose and throat work.

The head rest can be moved in all directions, and locked with one lever in an absolutely rigid position. One pad placed on the left side of the head, the other behind the occiput, leaves the right side of the head free for operative work, and vice versa, a forehead band holding the head immovable.

The seat can be raised and lowered through a range of $7\frac{1}{2}$ inches.

The back can be lowered and fixed at any angle from the vertical to the horizontal, and with the arm supports in position it is impossible for the patient to move while under the anæsthetic.
