## **Against the State**

Politics and Social Protest in Japan

**DAVID E. APTER & NAGAYO SAWA**

Reconstructing the dramatic struggle surrounding the building of the New Tokyo (Narita) International Airport near Sanrizuka, this scrutiny of modern protest politics dispels the myth of corporate Japan's unassailable success. Narita Airport, the largest single government project in Japan, has been the scene of intense conflict over what might be called the unfinished business of Japan as number one. Since 1965, small groups of farmers have been fighting to protect their land, first from the bulldozers, then from the environmental damage of a modern airport. They were joined in the battle by militants from new Left sects as well as students and other protesters representing peace and antipollution issues. Using field observation, in-depth interviewing and first-hand experience from living in the 'fortresses' surrounding the airport, the authors examine the conflict and violence that ensued. They describe the confrontation from the point of view of each group of participants, pinpointing weaknesses in the Japanese political and bureaucratic systems that prolonged and heightened the struggle: the lack of effective due process, inadequate consultative mechanisms outside of elite circles, and the failure of local government to represent local issues.

## **A New History of Korea**

**KI-BAIK LEE**

Translated by Edward W. Wagner, with Edward J. Schultz

The first English-language history of Korea to appear in more than a decade, this translation offers Western readers a distillation of the latest and best scholarship on Korean history and culture from the earliest times to the student revolution of 1960.

Professor Lee's work presents a new periodization of his country's history, based on a fresh analysis of the changing composition of the leadership elite. The book is noteworthy too for its full and integrated discussion of major currents in Korea's cultural history.

The translation, three years in preparation, has been done by specialists in the field.

## Women, the Family, and Peasant Revolution in China

KAY ANN JOHNSON

How far have Chinese women come from footbinding and the bonds of obedience to father, husband and sons? *Women, the Family, and Peasant Revolution in China* examines the policies and changes affecting rural women under Communist leadership during the revolution and since. Johnson asserts that, although the Chinese Communist Party has always ostensibly favoured women's rights and family reform, it has rarely pushed for such reforms. In reality, it has often reinforced the traditional role of women to further its

predominant economic and military aims.

## The Cult of the Goddess Pattini

GANANATH OBEYESEKERE

Pattini – goddess, virgin, wife and mother; folk deity of Sinhala Buddhists and Jains; assimilated goddess of the Hindu pantheon – been worshipped in Sri Lanka and South India for 1,500 years. This long-awaited study of the Pattini cult is the most detailed analysis of a single religious complex in South Asian ethnography.

## Urban Life in Contemporary China

MARTIN KING WHYTE AND WILLIAM L. PARISH

Are the ills to which most large cities around the world have succumbed inevitable? Or are slums, crime, economic inequality, alienation and other evils attributable to the capitalist system of urban development? Whyte and Parish look to the 'Chinese model' of urbanism created under Mao Zedong for their answers. With admirable objectivity, they assess whether this model has had the social consequences claimed by either its champions or its detractors.

## The Journey to the West

The classic sixteenth-century Chinese epic novel *Hsi-yu chi* was unavailable in its complete form until Yu's four-volume translation. Combining religious allegory with fantasy, romance, humour and satire, the tale recounts the fabulous experiences of an illustrious monk and his supernatural companions who journey to India in quest of Buddhist scriptures.

'One of the great ventures of our time in humanistic translation and publication . . . the most exciting translation of any book I have read in quite some time.'

David Lattimore, *New York Times Book Review*

## **Heritage of Endurance**

Family Patterns and Delinquency Formation in Urban Japan

HIROSHI WAGATSUMA & GEORGE A. DE VOS

The two authors have studied Arakawa Ward, a lower-class district of Tokyo, at first-hand for many years. Their insights into the processes that contribute to the relatively low rate of delinquency in Japan and their glimpses into the ways in which one community mobilises to interevene and prevent juvenile delinquency help us to understand why urbanisation and modernisation have been relatively non-traumatic for the Japanese during the past 100 years of rapid change.

## **Chen Village**

The Recent History of a Peasant Community in Mao's China

ANITA CHAN, RICHARD MADSEN & JONATHAN UNGER

*Chen Village* opens a fascinating new window on the two eventful decades that transformed the Chinese countryside. It presents a detailed analysis of revolutionary change in a South China farming community from the early 1960s through the early 1980s. Readers are given a rare opportunity to trace the complex turns of China's revolution at the grass roots in the book's account of the ways in which one peasant village responded to the dictates of the revolutionary government.

## **The Karma of Words**

Buddhism and the Literary Arts in Medieval Japan

WILLIAM R. LAFLEUR

The literary tradition of Japan has been deeply influenced by the Buddhism that held intellectual and religious sway there for so many centuries.

William La Fleur traces this influence, showing how the Japanese experience differed from that of Europe, how the Buddhist explanation of reality differed from that of Christianity, and why the points of comparison are important for an understanding of Japan today.

## **Confucianism and Autocracy**

Professional Elites in the Founding of the Ming Dynasty

JOHN W. DARDESS

How and why was an autocratic political system, which featured and unprecedented degree of centralised control, imposed upon China with the foundation of the Ming Dynasty in 1368? Professor Dardess suggests a new way of comprehending Confucianism, taking it as a professional, collegiate body distinct from lay society, and argues that Confucianism does have a sociology peculiar to itself.
