## Subscriptions

Neuron Glia Biology (ISSN 1740-925X) is published four times a year in February, May, August and November. Four parts form a Volume. Volume 6 appears in 2010. The annual subscription price (excluding VAT), for subscribers of Volume 6 is £276 (US\$472 in the USA, Canada and Mexico) for institutions; £90 (US\$164 in the USA, Canada and Mexico) for individuals ordering direct from the publisher and certifying that the journal is for their personal use. Single parts are £79 (US\$140 in the USA, Canada and Mexico).

Orders, which must be accompanied by payment, may be sent to a bookseller, subscription agent or to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK; or in the USA, Canada and Mexico: Cambridge University Press, Journals Fulfillment Department, 100 Brook Hill Drive, West Nyack, New York 10994-2133, USA. EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. Japanese prices for institutions are available from: Kinokuniya Company Ltd, PO Box 55, Chitose, Tokyo 156, Japan.

Periodicals postage paid at New York, NY, and at additional mailing offices. Postmaster: send address changes to in USA, Canada and Mexico to: Neuron Glia Biology, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133, USA. Claims for missing issues should be made immediately on receipt of the subsequent issue.

## Copying

This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. Organisations in the USA who are also registered with C.C.C. may therefore photocopy material (beyond the limits permitted by sections 107 and 108 of U.S. Copyright law) subject to payment to C.C.C. of the per-copy fee of \$16. This consent does not extend to multiple copying for promotional purposes. Code 1740-925X/2010. ISI Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104, USA, is authorised to supply single copies of separate articles for private use only. Organisations authorised by the UK Copyright Licensing Agency may also photocopy material subject to the usual conditions. For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press. No other part of this publication may be reproduced, stored or distributed by any means without permission in writing from Cambridge University Press, acting for the copyright holder.

## Cover

An oligodendrocyte (green) extending multiple cell process to contact axons (purple) in the initial stages of myelination. Hypoxia in the perinatal period causes the death of oligodendrocytes, leading to cerebral palsy, epilepsy, and other neurological difficulties (see Jantzie et al., this issue). Image courtesy of R. Douglas Fields, National Institutes of Health, NICHD.
