PRACTICE SEW-DEFENSE

YOUR LIFE MAY DEPEND ON IT

With AIDS cases escalating, on-the-job self-defense has never been more important. Although the risk of seroconversion is low, to date, 60% of the reported seroconverted healthcare workers had occupational HIV exposure from needlestick injuries.¹ In addition, an estimated 200 healthcare workers die each year from hepatitis B viruses.²

IMPROVED TUBEX™ INJECTOR SECURELY GRIPS CARTRIDGE

Now, the "HANDS-OFF" Injector, TUBEX, has been improved to provide a more secure grip on the cartridge within the Injector. And it's faster and easier than ever to load. The improved TUBEX Injector still offers the same safety advantages: it puts nurses farther from the needle and cartridge than any other injector system. There's no need to touch, shake, manipulate, or angle the needle or cartridge upon disposal.

For the best self-defense injection system against needlestick injuries, use the TUBEX Injector.. *your life* may depend on it.

**FARTHER FROM THE
POINT OF DANGER**
