Notes for contributors

A submission to Applied Probability is considered as a submission to either *Journal of Applied Probability* (JAP) or *Advances in Applied Probability* (AAP). Longer papers are typically published in AAP, but the assignment of papers between the two journals is made by the Executive Editor on an issue-by-issue basis. Short communications and letters specifically relating to papers appearing in either JAP or AAP are published in JAP.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (http://www.ams.org/msc/). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the LATEX class file aptpub.cls, available from http://www.appliedprobability.org/. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted electronically through ScholarOne at https://mc.manuscriptcentral.com/ apjournals. All submissions will be acknowledged on receipt.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see http://www.copyright.com) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021–9002/19

Volume 54 Number 3

Original Articles

- 661 AJAY JASRA, KODY J. H. LAW AND FANGYUAN YU. Unbiased filtering of a class of partially observed diffusions
- 688 NATALIA NOLDE AND JENNIFER L. WADSWORTH. Linking representations for multivariate extremes via a limit set
- 718 TIANDONG WANG AND SIDNEY I. RESNICK. Measuring reciprocity in a directed preferential attachment network
- 743 MARK KELBERT AND HAROLD A. MORENO-FRANCO. On a mixed singular/switching control problem with multiple regimes
- 783 VICTORIA KNOPOVA AND ZBIGNIEW PALMOWSKI. Subexponential potential asymptotics with applications
- 808 BARBARA MARTINUCCI, ALESSANDRA MEOLI AND SHELEMYAHU ZACKS. Some results on the telegraph process driven by gamma components
- 849 GIACOMO ALETTI AND IRENE CRIMALDI. The rescaled Pólya urn: local reinforcement and chi-squared goodness-of-fit test
- 880 WASIUR R. KHUDABUKHSH, CASPER WOROSZYLO, GRZEGORZ A. REMPAŁA AND HEINZ KOEPPL. A functional central limit theorem for SI processes on configuration model graphs
- 913 CÉLINE DUVAL AND ESTER MARIUCCI. Non-asymptotic control of the cumulative distribution function of Lévy processes
- 945 FRANCESCA BIAGINI AND YINGLIN ZHANG. Extended reduced-form framework for non-life insurance
- JI HWAN CHA. An extended class of univariate and multivariate generalized Pólya processes
