The Graduate Institute of International Studies, Geneva
is opening two full-time positions of
Professor/Associate Professor of Public International Law
starting on 1 October 2001 or at a date to be mutually agreed upon

The Graduate Institute of International Studies, founded in 1927, specializes in the pluridisciplinary study of international relations. More than half of its 600 students pursue advanced degrees in international history and politics, international economics, international law, or political science. These degrees are awarded jointly by the Institute and the University of Geneva but the Institute enjoys an autonomous status and is bilingual (English and French).

Candidates must have a strong background in the general theory of and current theoretical developments in public international law, with a good publication record in this field. One of the two posts will be filled by a candidate having a particular knowledge in one (or more) of the following fields: international humanitarian law, human rights, social law.

Candidates must hold a Ph.D. in international law and must have teaching experience at University level. They must be able to teach general courses as well as supervise dissertations and doctoral theses. The language of instruction is either English or French, but candidates should have at least a working knowledge of the other language. Experience in the practice of international law would be an advantage. The Institute specifically encourages women to apply.

Applications, together with a detailed *curriculum vitae* and a list of publications, must reach the Director, the Graduate Institute of International Studies, rue de Lausanne 132, 1211 Geneva 21, Switzerland (fax: + 41 22 731 27 77) **by 30 November 2000 at the latest**. Applications received after this date will not be considered. General terms of appointment for such a post may be obtained upon request. The Institute reserves the right to fill these positions by invitation.

New from Cambridge

Realism and International Relations

Jack Donnelly

Realism and International Relations offers students a critical yet sympathetic review of political realism, the theory that for the past half-century has dominated international studies. Examining realist thinkers from Thucydides, through Machiavelli to Kenneth Waltz, Donnelly challenges standard realist claims and argues that realism is an insightful yet one-sided theory. Containing chapter-by-chapter guides to further reading and discussion questions for students, this book offers an accessible and lively survey of the dominant theory in International Relations.

Human Rights in International Relations

David P. Forsythe

This new textbook provides an introduction to human rights in international relations at the turn of the twenty-first century. It examines the policy-making process that establishes and tries to apply human rights norms through the UN, regional organizations, state foreign policy, human rights groups, and transnational corporations. It documents the many changes in international human rights during the past half-century, and considers the future of universal human rights. Containing chapter-by-chapter guides to further reading and discussion questions, this book will be of interest to undergraduate and graduate students of human rights, and their teachers.

Behavioral Law and Economics

Cass R. Sunstein, Editor

"Human psychology is complicated. The law and economics paradigm traditionally has treated it as simple. This volume splendidly marshals leading works by scholars who—in pursuit of realism—seek to add complexity to the traditional paradigm. A significant landmark in the field of law and social science."

The Legal Texts

The Results of the Uruguay Round of Multilateral Trade Negotiations

The agreements negotiated in the Uruguay Round, which form the legal framework of the World Trade Organization, will govern world trade into the twenty-first century. This volume covers both the original and the updated General Agreement on Tariffs and Trade (GATT), the General Agreement on Trade in Services (GATS), the Agreement on Trade-Related aspects of Intellectual Property Rights, the new procedures for dispute settlement, and the legal framework for the World Trade Organization. This is the definitive reference for all practicing and academic trade lawyers, an essential holding for all international law libraries, and a vital source book for students, economists, and political scientists.

Dispute Settlement Reports

The WTO's procedure for resolving trade quarrels under the Dispute Settlement Understanding is vital for enforcing the rules and therefore for ensuring that trade flows smoothly. Countries bring disputes to the WTO if they think their rights under the agreements are being infringed. The system encourages countries to settle their differences through consultation. Failing that, they can follow a carefully mapped out, stage-by-stage procedure that includes the possibility of a ruling by a panel of experts, and the chance to appeal the ruling on legal grounds. These are the only authorized paginated reports of this process in English.

THE PINOCHET PAPERS

The Case of Augusto Pinochet in Spain and Britain

edited by Reed Brody, Michael Ratner

The arrest of General Augusto Pinochet in October 1998 was a wake-up call to tyrants everywhere. The two subsequent rulings by the British House of Lords rejecting his claim of immunity forged legal history. This book traces the legal proceedings in the Pinochet case from the investigation in Spain, through the October 1999, ruling by a London Magistrate that Pinochet could be extradited to Spain, to the final decision to release Pinochet for health reasons. By including the full text of the British judicial decisions as well as the arrest warrants, translations of the key Spanish court rulings, excerpts from the legal arguments put forward by all sides, and commentaries by participants in the case and legal scholars, this volume gives the reader an understanding of the factual, political, and legal context of this historic prosecution.

SIR GERALD FITZMAURICE AND THE WORLD CRISIS OF 1930-1945

by Anthony Carty, Richard A. Smith

This work examines the impact of the legal advice of G.G. Fitzmaurice on the making of British Foreign Policy during the key phases of the developing World Crisis, from 1932 to 1945, in relations with Japan and Germany. It breaks new ground with respect to the basic technical crafts of the international lawyer. The aim is not simply to unearth and present, in a minimally edited form, the legal opinions of Fitzmaurice, but also to assess his impact within the Foreign Office. It concludes that the role of the individual international lawyer in government institutions is potentially very significant. However, his influence depends not simply on the stubbornness with which he holds onto his professional expertise, but also on his moral vision and sensitivity towards the complexities of the context in which he has the potential to shape events.

LAW OF THE SEA

The Common Heritage and Emerging Challenges

edited by Harry N. Scheiber

The authors, acknowledged authorities in the field, offer fresh and searching reappraisals of how the 'common heritage' concepts in ocean law have been challenged by the contemporary crises in marine uses and ocean environment and resources. How national governments and international organizations have responded to urgent questions of ocean management is a major focus of these studies, and the book also provides important historical perspective on the doctrinal legacy of earlier ocean law. Emerging legal norms and the principles of law, new procedural mandates, the problems of implementation, and recent institutional developments in the international arena all receive attention in this timely and provocative work.

THE INTERNATIONAL TRIBUNAL FOR THE LAW OF THE SEA

by Gudmundur Eiriksson

The International Tribunal for the Law of the Sea convened for its first session at its seat in Hamburg on 1 October, 1996. This book describes the Tribunal, including its structure and working methods, as set out in the Convention itself. It further describes the work of the Tribunal during the first three and a half years of its existence, including the five cases it decided upon during this period. The author was among the Tribunal's first Judges and shared with them that rarest opportunity to give the final form to a new body for the settlement of international disputes, to establish its working methods and then help guide it through its first steps. This book is an essential tool for anyone who is interested in the work of the Tribunal, both practitioners and academics.

KLUWER LAW INTERNATIONAL

THE CENTENNIAL OF THE FIRST INTERNATIONAL PEACE CONFERENCE

Reports & Conclusions

edited by Frits Kalshoven

As quoted in the AMERICAN JOURNAL OF INTERNATIONAL LAW, and now available.

The celebration of the Centennial of the First International Peace Conference took longer than the original conference itself. For almost two years experts from all over the world exchanged views on the progress, failures, lacunae, and prospects of international law. This volume, compiled by the Centennial organizers, includes both the major documents produced in the course of the Centennial celebrations (printed) and the various discussion papers as they appeared on the internet (on complementary CD-ROM). In addition, historical papers on the 1899 conference diplomacy have been provided by Governments representing the 1899 delegations (also on CD-ROM). Together, they provide invaluable information on the achievements of the last century as well as on the direction of international law at the threshold of the new millennium.

THE KOSOVO CONFLICT

A Diplomatic History Through Documents

edited by Philip E. Auerswald,

David P. Auerswald

The 1999 Kosovo conflict brought an unsettling close to the 20th century, representing both a critical test of post-WWII international security structures and a chapter in a human tragedy that is far from concluded. In *The Kosovo Conflict: A Diplomatic History through Documents*, Philip and David Auerswald have compiled the definitive collection of official, unclassified documents surrounding this event. Though rich in detail, *The Kosovo Conflict* places events in context. Each chapter is prefaced with an essay and chronology summarizing that chapter's events. *The Kosovo Conflict* is an invaluable resource for practitioners, students of politics, and historians.

UNITED STATES ADMIRALTY LAW

by Gerard J. Mangone

As quoted on page 679 of this issue.

Knowledge about the application of law to maritime commerce not only may prove financially profitable but also provides an exciting intellectual trip through the historical and legal developments behind commercial activities that depend upon the sea. This work analyzes the growth and formation of maritime law across the centuries, including its origin as England's admiralty law and its adoption into the United States Constitution. It sets out information on the jurisdiction and law appropriate for the carriage of goods by sea, personal injuries and death collisions, salvage and wrecks, marine insurance, and marine pollution. Lawyers, professors, and students of law and anyone involved in marine transportation – carriers, shippers, port managers, freight forwarders, and others – will appreciate this book's succinct and readable style. It includes references to statutes, conventions, and cases – including some historical and social background to enliven and clarify the development of admiralty and maritime law in the United States.

TRANSNATIONAL ENVIRONMENTAL LAW

Lessons In Global Change

by Peter H. Sand

This unique collection of essays advocates a different vision of international law for environmental protection and sustainable development. The perspective is widened beyond the traditional focus of so-called public international law – mainly concerned with territorial sovereignty, state responsibility, inter-state treaties and intergovernmental organisations – to encompass neighbouring branches of law that are equally and increasingly relevant to transnational environmental relations and governance. The result is an extraordinary combination of insights that avoid the pitfalls of particularism because they are based on a range of practical experiences.

ACHIEVING INCLUSIONARY GOVERNANCE

Advancing Peace and Development in First and Third World Nations

By Terrence Edward Paupp

Is there a country in today's world, democratic or authoritarian, that does not deprive some portion of its population from a say in how they are governed? This is the reality of political exclusion—a dangerous social imbalance whose spectrum of response extends from frustration at one end to violence at the other. Is inclusionary governance possible? And if so, how is it to be achieved? This significant new work gives the most detailed and coherent answers to these questions yet formulated. Paupp shows that not only is inclusionary governance possible, but that the essential legal foundation is already in place; all that is required is the compliance of nations with their obligations under international human rights law, and the centuries-old, nation-state-dominated, war-oriented "balance of power" will be gone forever.

DELEGATING STATE POWERS

The Effect of Treaty Regimes on Democracy and Sovereignty

Edited by Thomas M. Franck

This groundbreaking book deals with problems encountered by the United States, as a federal system, in complying with international treaty obligations at this period of renewed interest in states rights. It examines the ways in which the American constitutional system adapts to and sometimes erects barriers against the new system of global solutions to global problems. It investigates the resulting challenges on a treaty-by-treaty basis with special attention to such areas as human rights and disarmament. The authors approach this subject from several legal perspectives, including the constitutionality of treaties that delegate dispositive powers normally reserved to the U.S. Congress, the Judiciary, the states, or individuals.

INTERNATIONAL CRIMES, PEACE, AND HUMAN RIGHTS

The Role of the International Criminal Court

Edited by Dinah Shelton

The International Criminal Court established by the Rome Statute of 1998 promises to be a major "acid test" for the development of humanitarian law, international criminal law, and human rights law in the early years of the new century. This new collection of essays by sixteen outstanding authorities in the relevant fields assesses the prospects for the Court's future. The book's detailed analysis of the potential uses (and misuses) of the Statute—its lacunae and shortcomings as well as its signal advances in jurisdiction and accountability make this volume a significant reference and guide, not only to the Rome Statute, but also to the Court's developing jurisprudence.

THE IRAN-UNITED STATES CLAIMS TRIBUNAL AND THE PROCESS OF INTERNATIONAL CLAIMS RESOLUTION

Edited by David D. Caron and John R. Crook

Published under the auspices of the American Society of International Law

It is the contention of this important book that the Iran-United States Tribunal, and other more recent institutions such as the UNCC and the Zurich Dormant Accounts Commission, reflect a growing determination by the international community to recognize the rights of individuals, adjudicating their claims for economic injury even if the redress provided is only approximate or incomplete. Examining the Tribunal's structure, operations and evolution in search of the underlying patterns that characterize such international institutions, this valuable book records the diverse experiences and judgments of a group of outstanding lawyers from many countries, each of whom has played a significant role at some stage of the Tribunal's proceedings.

United Nations Disarmament Yearbook

This edition of the Yearbook focuses on developments and negotiations carried out by the UN disarmament machinery during the year 1999. The publication while assessing some of the recent set backs for disarmament, also reminds the reader of the often unspoken successes achieved throughout the years. Ultimately the publication emphasizes how disarmament is not just a lofty ideal, but also a very practical and realistic approach to international peace and security.

Sex, Law, and Society in Late Imperial China

MATTHEW H. SOMMER

This study of the regulation of sexuality in the Qing dynasty explores the social context for sexual behavior criminalized by the state, showing how regulation shifted away from status to a new regime of gender that mandated a uniform standard of sexual morality and criminal liability for all people, regardless of their social status.

Wilhelm G. Grewe

The Epochs of International Law

Translated and revised by Michael Byers

2000. xxii + 780 pages. Reference, index. 3-11-015339-4 Paper. \$99.95

Wilhelm G. Grewe's *Epochen der Völkerrechtsgeschichte*, published in 1984, is widely regarded as one of the classic twentieth century works of international law. This translation by Michael Byers of Duke University, revised and updated in collaboration with the author, makes this important book available to non-German readers for the first time.

The Epochs of International Law provides a theoretical overview and detailed analysis of the history of international law. It ranges from the Middle Ages to the Age of Discovery and the Thirty Years War; from Napoleon Bonaparte to the Treaty of Versailles. A new epilogue continues the account to the Cold War and the age of the single superpower. His treatment of this historical span reflects Grewe's own experience as one of Germany's leading diplomats and professors of international law.

The concluding chapter, written by Grewe and Byers, updates the book to 1998, making the revised translation of broader current interest to practicing international lawyers, international relations scholars, and historians.

The late Dr. Grewe served as West German ambassador to Washington, Tokyo, and NATO, and was a member of the International Court of Arbitration in the Hague. Subsequently Professor of International Law at the University of Freiburg, he remains one of Germany's most renowned academic jurists. Wilhelm G. Grewe died in January 2000.

Professor Michael Byers, Duke University School of Law, was formerly a Fellow of Jesus College, Oxford, and a visiting Fellow of the Max Planck Institute for Comparative Public Law and International Law, Heidelberg.
