INTERNATIONAL SOCIETY OF TECHNOLOGY ASSESSMENT IN HEALTH CARE

History and Purpose

In the modern medical world of rapidly diffusing technologies, the International Society of Technology Assessment in Health Care (ISTAHC) was organized to encourage research, education, cooperation and the exchange of information concerning the clinical and social implications of health care technologies, and to foster their optimal utilization. The term *technology* in this context includes the drugs, devices, and medical and surgical procedures utilized in health care as well as the varied organizational and supportive systems within which health care is provided.

Organized in May 1985, the Society's initial meeting was held in Copenhagen with 60 participants from 16 countries. Society membership is now over 400 with worldwide representation providing global perspectives on technological issues.

The Society is primarily concerned with emerging medical technologies as they are developed, produced, disseminated, applied and costed. These include:

safety and efficacy
cost and cost-effectiveness
ethics
quality of care

access to health care
appropriateness of application
legal and regulatory considerations
competing technologies

Society Activities

To shed light on these important issues which, in turn, will foster and enhance the delivery of quality health care, the Society meets annually and also provides ongoing opportunies such as workshops, conferences and special reports that provide effective international communication and a vibrant exchange of ideas. This intellectual environment is intended to spawn collaborative research on a transnational basis.

Publications

All ISTAHC members receive the official journal of the Society, the International Journal of Technology Assessment in Health Care, published quarterly by Cambridge University Press, now in its 5th volume. Each issue of the journal provides not only essays on important themes, but also lively columns that give a global perspective on a range of technology-related subjects. This scholarly, peer-reviewed journal welcomes contributions from members and non-members alike, about technology and related health care subjects, including reports and reviews. Members will also receive a quarterly Newsletter.

Membership Application

Membership in the Society is open to everyone who is concerned about the implications of health care technology and shares the Society's goals. Simply fill out this form, make your check out in the amount of US\$60.00 for 1989 dues and journal, payable to Cambridge University Press, and send to the ISTAHC Membership Office listed below.

| MAILING ADDRESS (IN BLOCK LETTERS PLEASE!) | |

Mail this application and your 1989 dues payment of US\$60.00 to: ISTAHC Membership Office, Cambridge University Press, 32 East 57th Street, New York, NY 10022, USA. Make your check or international postal order payable to Cambridge University Press in US funds.

International Journal of Technology Assessment in Health Care

Instructions for Contributors

The editors welcome submissions of articles which deal with the wide range of topics related to technology assessment in health care – policy, practice, diffusion, economics, ethics, law, and social and cultural perspectives. Authors should send *three* copies of their manuscript and reserve one copy for their use in checking proofs. Articles must be in English. Spelling, capitalization, and punctuation must be consistent within each article and conform with the 13th Edition of *The Chicago Manual of Style* (University of Chicago Press). Articles and correspondence should be sent to: **Stanley J. Reiser**, The University of Texas Health Science Center at Houston, P.O. Box 20708, Houston, Texas 77225, U.S.A.; or **Egon Jonsson**, The Karolinska Institute and the Swedish Council on Technology Assessment in Health Care, P.O. Box 16158, 103 24 Stockholm, *Sweden*.

Permissions. Submission of an article implies that it has not been published elsewhere. Authors are responsible for obtaining written permission to publish material for which they do not own the copyright. Contributors will be asked to assign their copyrights, on certain conditions, to Cambridge University Press.

Preparation of Manuscript. The entire manuscript, including all notes and references, must be typed, double-spaced on $8\frac{1}{2} \times 11$ inch or A4 paper, leaving wide margins for copyediting. Manuscript pages should be numbered consecutively (except for the cover sheet, which is unnumbered). Manuscript should be arranged as follows: (1) cover sheet, (2) title page, (3) abstract, (4) text, (5) notes, (6) references, (7) appendix, (8) tables with titles, (9) figures with captions. The cover sheet should list the article title (in capital letters), a name and complete mailing address to which proofs should be sent, the name and telephone number of the lead author, and a short title (50 characters or less) for the running head. The title page (page 1) should list the article title (in capital letters) and all authors' names and affiliations, as they should appear for publication. Any notes to the title or authors and any acknowledgments should be noted on a separate sheet and placed before the abstract. The abstract cannot exceed 50 words.

References and notes. Bibliographic citations in the text are indicated by in-line numbers in parentheses; the numbers in the text correspond to numbers that directly precede each reference.

Text

". . . Jones and Smith (1) maintained that . . ."

Reference (Book)

1. Jones, A. B., & Smith, J. K. Computer diagnosis and results. New York: Penta Publishers, 1978. Reference (Journal)

1. Jones, A. B., & Smith, J. K. The relationship between health needs, the hospital and the patient. Journal of Chronic Diseases, 1985, 32, 310-12.

Reference (Article in edited work)

1. Jones, A. B., & Smith, J. K. The diagnostic process. In R. Brown & T. Wilson (eds.), New technology and its medical consequences, vol. 1. New York: Apple Publishers, 1972, 101-34.

If more than one reference is cited at a specific place in the text, semicolons should separate each reference number; if page numbers are included, commas should separate each reference number from its page number(s).

Multiple citations without page numbers

. . . this system has been dealt with at length in the literature (1;3;12;14).

Multiple citation with page numbers

... This system has been dealt with at length (1,1-10;3,5;12,25-57;14,102-146).

The reference list must be in alphabetical order. Titles of journals should not be abbreviated.

When more than a simple source citation is called for, endnotes may be used. Notes should be numbered consecutively throughout the text and typed together on a separate page preceding the reference section. Source citations within notes follow the same parameters of style as citations in text.

Tables and figures. Tables and figures should be numbered consecutively and appear as one unit after the reference section. All tables must be titled; all figures must be captioned. All tables and figures must have at least one text reference, using the following form: e.g., "For a different view of this matter, see Table 1 and Figure 3." Table footnotes appear directly after the table body; table source notes follow the footnotes. Figures should be drawn by a professional artist or computer-generated on a Laser printer. The publisher *cannot* redraw any figure unless the author pays for the cost of such work. All figures should remain legible at a 50% reduction in size.

Copyediting and proofreading. The publishers reserve the right to copyedit and proofread all articles accepted for publication, but the lead author will be asked to review the copyediting if changes have been substantial. Page proof of a Special Section or General article will be sent to the lead author for correction of typographical errors only.

Offprints. The lead author of a Special Section or General article will receive 25 offprints of his/her article free of charge; additional numbers may be purchased if ordered at proof stage.

Forthcoming Issues and Guest Editors

Alternative Means of Assessing Technology David Eddy, Duke University, U.S.A.

Technology Assessment and Surgical Policy

Michael Baum, King's College School of Medicine and Dentistry, England John Bunker, Stanford University, U.S.A.

Assessing the Technology of Dentistry

Lars E. A. Folke, University of Lund, Sweden Paul Goldhaber, Harvard School of Dental Medicine, U.S.A.

The Technology of Prevention

Felix F. Gutzwiller, University of Laussanne, Switzerland Jeffrey Koplan, Centers for Disease Control, U.S.A.

Technology and Disability

Clyde Behney, Office of Technology Assessment, U.S.A. John Hutton, University of York, England

The Use and Abuse of Routine, Low Cost Technology Johannes Vang, World Health Organization, Denmark

Industry and the Generation of Technology

Jerome Grossman, New England Medical Center Hospitals, U.S.A. Judith Kurland, Department of Health and Hospitals, Boston, U.S.A.

Assessing the Technology of Physical Therapy

Margareta auf Klinteberg, Gnesta Primary Health Center, Sweden Nancy T. Watts, Massachusetts General Hospital, Boston, U.S.A.

Obstetric Technology: A Future Perspective

Miriam Orleans, University of Colorado Health Sciences Center, U.S.A. Elina Hemminki, University of Helsinki, Finland

Technology and Ethics

Arthur L. Caplan, University of Minnesota, U.S.A. James F. Childress, University of Virginia, U.S.A. Henrik R. Wulff, Herlev University Hospital, Denmark

Genetic Technology and Health Care

Frederick C. Robbins, Case Western University, U.S.A.

The Person-Machine Relationship in Health Care

Yadin David, Texas Children's Hospital, U.S.A.

The Assessment of Psychiatry

Lawrence R. Tancredi, University of Texas Health Science Center at Houston, U.S.A.
