CONTENTS OF VOLUME 29

JOHN F. AHNER and JOHN S. LOWNDES: The solution of some integral equations 203

A. ANKIEWICZ and C. PASK: Chaos in optics: field fluctuations for a nonlinear optical fibre loop closed by a coupler 1

K. BALACHANDRAN and D. SOMASUNDARAM: Existence of optimal control for nonlinear systems with quadratic performance 249

LAKSHMISREE BANDOPADHYAYA and M. C. PURI: Impaired flow multi-index transportation problem with axial constraints 296

L. BASS, A. J. BRACKEN, K. HOLMÅKER, and B. R. F. JEFFERIES: Integro-differential equations for the self-organisation of liver zones by competitive exclusion of cell-types 156

A. J. BRACKEN: *See* L. BASS

JOHN R. CANNON and GEORGE H. KNIGHTLY: Some remarks on a quasi-steady-state approximation of the Navier-Stokes equation 440

G. F. CAREY: *See* S. S. CHOW

S. S. CHOW and G. F. CAREY: Finite element error estimates for subsonic flow 88

A. D. D. CRAIK: Interaction of a short-wave field with a dominant long wave in deep water: derivation from Zakharov's spectral formulation 430

RODNEY F. DAVIDSON: Waves below first cutoff in a duct 448

ANTHONY J. DEGREGORIA: *See* LEONARD W. SCHWARTZ

ROSS G. DRYNAN: Determining statistical dominance by linear programming 266

V. I. FABRIKANT: Potential of several arbitrarily located disks 341

LAWRENCE K. FORBES: Periodic solutions of high accuracy to the forced Duffing equation: Perturbation series in the forcing amplitude 21

H. P. W. GOTTLIEB: Eigenvalues of the Laplacian for rectilinear regions 270

R. GRIMSHAW: The modulation of short gravity waves by long waves or currents 410

G. C. HOCKING: Infinite Froude number solutions to the problem of a submerged source or sink 401

K. HOLMÅKER: *See* L. BASS

B. R. F. JEFFERIES: *See* L. BASS

R. KLEEMAN: Observables in modular field theory 221

GEORGE H. KNIGHTLY: *See* JOHN R. CANNON

J. L. LAVOIE: Notes on a paper by J. B. Miller 216

P. M. VAN LOON and R. M. M. MATHEIJ: Stable continuous orthonormalisation techniques for linear boundary value problems 282

JOHN S. LOWNDES: *See* JOHN F. AHNER

T. R. MARCHANT and A. J. ROBERTS: Properties of short-crested waves in water of finite depth 103

R. M. M. MATHEIJ: *See* P. M. VAN LOON

https://doi.org/10.1017/S033427000000597X Published online by Cambridge University Press

W. D. MCKEE and F. TESORIERO: Reflection of water waves from a vertical vortex sheet in water of finite depth 127
YOUJI NAGAHISA: Necessary conditions for a mathematical programming problem with set and cone constraints 309
M. R. OSBORNE: Dual barrier functions with superfast rates of convergence for the linear programming problem 39
M. R. OSBORNE and TANIA PRVAN: On algorithms for generalised smoothing splines 321
C. PASK: *See* A. ANKIEWICZ
TANIA PRVAN: *See* M. R. OSBORNE
M. C. PURI: *See* LAKSHMISREE BANDOPADHYAYA
PHILIP RABINOWITZ and WILLIAM E. SMITH: Interpolatory product integration for Riemann-integrable functions 195
A. J. ROBERTS: *See* T. R. MARCHANT
A. J. ROBERTS: The application of centre-manifold theory to the evolution of systems which vary slowly in space 480
M. RUMSEWICZ and P. TAYLOR: A spot welding reliability problem 257
LEONARD W. SCHWARTZ and ANTHONY J. DEGREGORIA: Two-phase flow in Hele-Shaw cells: numerical studies of sweep efficiency in a five-spot pattern 375
WILLIAM E. SMITH: *See* PHILIP RABINOWITZ
NOEL SMYTH: Mean flow induced by the viscous critical layer in a stratified fluid 351
D. SOMASUNDARAM: *See* K. BALACHANDRAN
P. TAYLOR: *See* M. RUMSEWICZ
F. TESORIERO: *See* W. D. MCKEE
E. O. TUCK: Thin airfoils with small trailing-edge flaps at arbitrary angles 142
K.-D. WERNER: Boundary value controllability and observability for the wave and heat equation 461
J. E. WOODS: On the analysis of joint production 59
E. M. E. ZAYED: Eigenvalues of the Laplacian for the third boundary value problem 79
