

Publishing Agreement

1. It is our custom to request authors to vest the worldwide copyright of their papers with the JCPDS—International Centre for Diffraction Data for the full term of copyright and we would be grateful if you would confirm your acceptance of these terms by signing and returning the agreement below. We will not withhold permission for any reasonable request from you to publish any part of this paper in connection with any other work by you, provided the usual acknowledgements are given regarding copyright notice and reference to the original publication.
2. If it is appropriate, the author's employer may sign this agreement, and in any event the employer may reserve the right to use the paper internally or for promotional purposes only, by so indicating on this agreement. It is understood that proprietary rights other than copyright (including patent rights) are reserved.
3. If the author is a U. S. Government employee and this work was done in that capacity the assignment applies only to the extent allowable by U. S. law. If at least one co-author is *not* a government employee, said author should sign the agreement.
4. If the author is an employee of the British Government then HMSO will grant a non-exclusive license to publish this paper in the Journal in any form or media provided British crown copyright and user rights (including patent rights) are reserved.
5. The author warrants that the manuscript is the author's original work, and has not been published before. (If excerpts from copyrighted works are included, the author will obtain written permission from the copyright owners and show credit to the sources in the manuscript.) The author also warrants that the article contains no libelous or unlawful statements, and does not infringe on the rights of others.
6. If the work was prepared jointly the author agrees to inform co-authors of the terms of the agreement, and to sign on their behalf.

With the qualifications listed above I assign to JCPDS—International Centre for Diffraction Data, the copyright of my paper entitled

for publication in *Powder Diffraction*.

_____ Signed

_____ Date

If the paper is rejected, this assignment is null and void.

SEIFERT

X-RAY TUBES

The SEIFERT diffraction X-ray tubes SN 60 with normal focus and SF 60 with fine focus are featured by a high primary intensity at a homogeneous intensity distribution, spectral purity, and a long lifetime.

SEIFERT X-RAY CORPORATION
2551 Industry Lane, P.O. Box 294, Fairview Village, Pennsylvania 19409

The Scintag Peltier X-ray Detector: *The New Industry Standard in X-ray Diffraction*

Another first from Scintag!

Scintag's exclusive second-generation Peltier-cooled x-ray detector for powder diffractometers is a breakthrough in x-ray diffraction. Without the need for liquid nitrogen cooling, Scintag's new detector provides all of the benefits of a solid state detector and more:

- **Better sensitivity**
- **Superior peak-to-background ratios**
- **No alignment required**
- **No routine maintenance required**

For the latest innovations in powder diffraction, Scintag is the clear choice. Contact us today for our brochure and a complete system demonstration, and judge for yourself.
