

Origin of a 'household word'^{*}

^{*} WRIGHT'S LIQUOR CARBONIS DETERGENS

By the preparation of Liquor Carbonis Detergens 80 years ago, the powerful antiseptic and antipruritic agents in Coal Tar were isolated for the first time from the residuary content of irritants and non-therapeutic substances. Publicly commended by an impressive succession of notable authorities, Liquor Carbonis Detergens soon provided the basis for a toilet soap that has been a household word for generations. Discouraging germs, Wright's Coal Tar Soap produces a generous lather, specially soothing and very thorough in its cleansing.

	PAGE
DAVIDSON, W. A. and BRODIE, JAMES. Observations on an epidemic of paratyphoid fever in Dundee, 1941	219
GRIFFITH, THE LATE A. STANLEY and MUNRO, W. T. Human pulmonary tuberculosis of bovine origin in Great Britain. (With 1 Figure in the Text)	229
GRIFFITH, A. N. A note on the seven papers by the late A. Stanley Griffith published during 1941-2	241
STOCKS, PERCY. Diabetes mortality in 1861-1942 and some of the factors affecting it. (With 4 Figures in the Text).	242
TWORT, J. M. and LYTH, R. Concentration of the carcinogenic material in a Venezuelan spindle oil by simultaneous molecular distillation and chromatographic adsorption	248
TWORT, J. M. and LYTH, R. The prophylactic effect of a colloid material on the skins of mice painted with various types of carcinogenic agents	252
EDWARD, DERRICK G. ff. Haemolytic streptococci in the dust of hospital wards, and their relationship to infection. A report to the Medical Research Council. (With 3 Figures in the Text)	256
STAMP, LORD and STONE, DORIS M. An agglutinin common to certain strains of lactose and non-lactose-fermenting coliform bacilli	266
HORGAN, E. S. and HASEEB, MANSOUR ALLI. Some observations on accidental vaccinations on the hands of workers in a vaccine lymph institute	273
JORDAN, R. C. and JACOBS, S. E. Studies in the dynamics of disinfection. I. New data on the reaction between phenol and <i>Bact. coli</i> using an improved technique, together with an analysis of the distribution of resistance amongst the cells of the bacterial populations studied. (With 10 Figures in the Text)	275

The Journal of Hygiene is now issued irregularly. A volume is issued in paper covers at the following net prices:

Volumes I-III (1901-3). 17s. 6d. net per volume.

Volumes IV-XVI (1904-18), *excepting* Vol. VI, no. 4, Plague number. 25s. net per volume.

Volume XVII (1918). 31s. net.

Volumes XVIII-XXXI (1919-31). 42s. net per volume.

Volumes XXXII-XXXVII (1932-37). 47s. 6d. net per volume.

Volumes XXXVIII-XLII (1938-42). 75s. net per volume.

Quotations can be given for buckram binding cases, also for bound copies of back volumes.

Papers for publication should be sent to Dr G. S. GRAHAM-SMITH, Dept. of Pathology, Tennis Court Road, Cambridge. Other communications should be addressed to the University Press, Cambridge.

Papers forwarded to the Editor for publication are understood to be offered to *The Journal of Hygiene* alone, unless the contrary is stated.

Contributors receive twenty copies of their papers free. Twenty-five additional copies may be had at cost price: these should be ordered when the final proof is returned.

The subscription price is £3. 15s. 0d. per volume (post-free), payable in advance; single numbers 16s. 0d. net. Subscriptions may be sent to any Bookseller, or to The Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1.

The Cambridge University Press has appointed the University of Chicago Press agents for the sale of *The Journal of Hygiene* in the United States of America.
