

## **Scope of the Journal**

Clay Minerals - Journal of Fine Particle Science publishes electronically and in paper form research papers about clays, clay minerals and related materials, natural or synthetic. Aspects covered include: Earth Processes (interactions in 'system earth' ± soil science, and geology/mineralogy) including genesis/synthesis, phase transformations, stability, weathering, soil-organic interactions, ion-exchange, basin analysis, clay petrology; Solid State Chemistry/Materials Science ± synthesis, structure and dynamics, reactivity, crystal chemistry, mechanical, thermal, electrical properties, micro and nanophase materials; Environmental Science ± analytical methods, elemental distribution, waste containment, health issues, environmental impact assessment, conservation of cultural heritage; Colloid/Surface Science ± adsorption, colloid stability, surface chemistry, reactivity; and Applied Science and Technology ± industrial uses and technical applications, including mining and processing of clay, zeolite (and other) deposits and application in ceramics, paper, paint, polymer, ion-exchange, sorption, catalysis etc.

## **Submission of manuscripts**

In a letter accompanying the manuscript, the submitting author must state that all authors agree with the final version of the manuscript. The letter must also state that the manuscript has not previously been published elsewhere, either in full or in part, and that, while under review for Clay Minerals, it will not be submitted to any other publication. Authors are encouraged to suggest up to three possible reviewers for their papers.

All manuscripts are to be submitted online at <http://www.edmgr.com/clayminerals/>. The current set of instructions for authors is available at: <https://www.cambridge.org/CLM>

All authors are allowed, free of charge, an e-print of their papers published in the journal.

## **Join the Mineralogical Society today**

If you are a regular reader of Mineralogical Magazine consider joining the Society and receiving your own copy six times a year at a very modest cost. Membership currently starts at £55 per annum. For this, you will receive bi-monthly copies of Elements, our international membership magazine (in full colour) on mineralogy, geochemistry and petrology as well as online access to Mineralogical Magazine, Clay Minerals and Elements. You may also opt to pay an additional premium in order to continue receiving paper copies of our journals. Full details on how to join the Society and an application form can be found on the Society's website at [www.minersoc.org](http://www.minersoc.org). Membership of the Society introduces you to a vibrant community of those interested in the mineral sciences. Through membership of one or more of the Society's eight special interest groups you can take an active part in the Society's numerous scientific meetings and conferences as described on the website.

## **Mineralogical Society Journals**

### *Mineralogical Magazine*

International journal of mineral sciences which covers the fields of mineralogy, crystallography, geochemistry, petrology, environmental geology and economic geology. This journal is available primarily as an e-journal.

### *Clay Minerals*

International journal of clay minerals and fine particle science, published four times a year, including research papers about clays, clay minerals and related materials, natural or synthetic. The journal includes papers on Earth processes, soil science, geology/mineralogy, chemistry/material science, colloid/surface science and applied science and technology. The journal is available primarily as an e-journal.

## **Copyright**

For both the paper and electronic versions, copyright of all papers accepted shall be assigned to the Mineralogical Society before publication, except where Crown Copyright is reserved.

# CLAY MINERALS

*Journal of Fine Particle Science*

VOLUME 53, NUMBER 4, DECEMBER 2018

## CONTENTS

Tural Aghayev and Ceren Küçükuyosal. Ceramic properties of Uşak clay in comparison with Ukrainian clay	549
A. Nzeukou Nzeugang, M. El Ouahabi, B. Aziwo, J.R. Mache, H.S. Mefire Mounton and N. Fagel. Characterization of kaolin from Mankon, northwest Cameroon	563
Tatiana Maison, Sébastien Potel, Pierre Malié, Rafael Ferreiro Mählmann, Frank Chanier, Geoffroy Mahieux and Julien Bailleul. Low-grade evolution of clay minerals and organic matter in fault zones of the Hikurangi prism (New Zealand)	579
S. Ghodrati, A. Mahmoodi and M. Mohseni. Modification and characterization of an Iranian montmorillonite as a corrosion/mechanical promoter for epoxy coatings	603
Ágnes Gál, Corina Ionescu, Mátyás Bajusz, Vlad A. Codrea, Volker Hoeck, Lucian Barbu-Tudoran, Viorica Simon, Marieta Mureșan-Pop and Zsolt Csók. Composition, technology and provenance of Roman pottery from <i>Napoca</i> (Cluj-Napoca, Romania)	621
Zhi-Lin Cheng, Xing-Yu Chang, Zan Liu and Dun-Zhong Qin. Surface-modified halloysite nanotubes as fillers applied in reinforcing the performance of polytetrafluoroethylene	643
Magdalena Król and Piotr Rożek. The effect of calcination temperature on metakaolin structure for the synthesis of zeolites	657
Emmanuel Ajenifuja, Abimbola P.I. Popoola, Kabir O. Oyedotun and Olawale Popoola. Microstructural and porosimetry analysis of Ag-TiO <sub>2</sub> intercalated kaolin and diatomite as nanocomposite ceramic materials	665
Gilles Berger, Daniel Beaufort and Raphaël Antoine. Clay minerals related to the late magmatic activity of the Piton des Neiges (Réunion Island): consequence for the primitive crusts	675
Victor A. Drits, Boris A. Sakharov and Stephen Hillier. Phase and structural features of tubular halloysite (7 Å)	691
Masanori Kohno, Yoshitaka Nara, Masaji Kato and Tsuyoshi Nishimura. Effects of clay-mineral type and content on the hydraulic conductivity of bentonite–sand mixtures made of Kunigel bentonite from Japan	721
Lin Zhi Lang, Wiebke Baille, Snehasis Tripathy and Tom Schanz. Experimental study on the influence of preliminary desiccation on the swelling pressure and hydraulic conductivity of compacted bentonite	733
S. Kaufhold, R. Dohrmann, K. Ufer and F. Kober. Interactions of bentonite with metal and concrete from the FEBEX experiment: mineralogical and geochemical investigations of selected sampling sites	745

ISSN 0009-8558
