

## GLASGOW MATHEMATICAL JOURNAL

### Information for authors

**General policy.** The *Glasgow Mathematical Journal* publishes original research papers in any branch of Pure or Applied Mathematics. Its policy is to feature a wide variety of research areas and it welcomes the submission of papers from all parts of the world. Selection for publication is on the basis of reports from specialist referees commissioned by the Editors.

**Preparation of papers.** Papers should be typed or word-processed and prepared so as to conform to the practice in current issues of the Journal as regards general layout, references, tables and figures.

References should be placed at the end of the paper, arranged and numbered in alphabetical order. In the text, reference numbers should be enclosed in square brackets to distinguish them from formula numbers which should be quoted in round brackets. The following particulars should be given, in the order indicated:

*for references to books*—author, title, edition, publisher, year of publication, page reference;

*for references to articles in periodicals*—author, title of article, short title of periodical, series number (if any), volume number, year, pagination.

Text figures must be suitable for photographic reproduction and supplied separate from the text but allocated clearly to sections of the text.

Instructions regarding unusual symbols or any typographical point that might cause confusion should be provided on a separate sheet.

Authors are reminded that they should retain a copy of anything submitted for publication since neither the Journal nor its printers can accept liability for any loss.

**Proofs.** Prior to publication sets of proofs of each paper will be sent to authors. The Journal asks for the cooperation of authors in returning their proofs promptly and in minimising the corrections they ask for. Excessive corrections may be charged to authors.

**Offprints.** Authors of papers printed in the Journal are entitled to 50 offprints free of charge. Additional copies can be supplied at cost if ordered and paid for before publication. An order form will be sent with each set of proofs.

**Submission of papers.** Two copies of each paper should be sent to:

THE EDITORS  
GLASGOW MATHEMATICAL JOURNAL,  
UNIVERSITY OF GLASGOW,  
DEPARTMENT OF MATHEMATICS,  
UNIVERSITY GARDENS,  
GLASGOW G12 8QW U.K.

## CONTENTS

<b>Rolf Brandl, Silvana Franciosi and Francesco de Giovanni</b> , On the Wielandt subgroup of infinite soluble groups	121
<b>Stephen P. Humphries</b> , Some subgroups of $SL(3, \mathbb{Z})$ generated by involutions	127
<b>Mario Petrich and Norman R. Reilly</b> , The modularity of the lattice of varieties of completely regular semigroups and related representations	137
<b>Felix Leinen</b> , Uncountable existentially closed groups in locally finite group classes	153
<b>W. W. Stothers</b> , On permutation polynomials whose difference is linear	165
<b>R. Y. Sharp and M. Yassi</b> , Generalized fractions and Hughes' grade-theoretic analogue of the Cousin complex	173
<b>Simon M. Goberstein</b> , Inverse semigroups with certain types of partial automorphism monoids	189
<b>Dalibor Fronček</b> , Graphs with near $v$ - and $e$ -neighbourhoods	197
<b>Carmelo Nuñez</b> , On Schachermayer's example about the Banach–Saks property	210
<b>Charles Burnap and Alan Lambert</b> , Proximity and similarity of operators II	205
<b>J. M. Anderson and J. Duncan</b> , Duals of Banach spaces of entire functions	215
<b>A. W. Chatters and Weimin Xue</b> , On right duo p.p. rings	221
<b>Lieven le Bruyn and Yasuo Teranishi</b> , Matrix invariants and complete intersections	227
<b>Jerzy Bartłomiej Stochel</b> , Subnormality and generalized commutation relations of families of operators	231
<b>Michał Sadowski</b> , Conjugacy of free finite group actions of inframanifolds	239
<b>Kathryn E. Hare</b> , Union results for thin sets	241
<b>Stanisław Betley</b> , Homological stability for $O_{n,n}$ over semi-local rings	255
<b>James T. Campbell and James E. Jamison</b> , Corrigendum	261
