## List of Posters

*Electronic versions of the poster contributions are contained on the companion CD-ROM.*

### Session A. Current Status of Modelling

- A1** New Insights in High-Resolution Spectroscopy: a Wide Theoretical Library of R=500 000 Stellar Spectra  
*E. Bertone, A. Buzzoni, L. H. Rodríguez-Merino and M. Chávez*
- A2** A MARCS Grid of S-Type Star Atmospheres  
*B. Plez, S. Van Eck, A. Jorissen, B. Edvardsson, K. Eriksson and B. Gustafsson*
- A3** A Quadrupole Model of the Magnetic Field of  $\beta$ CrB  
*Yu. V. Glagolevskij and E. Gerth*
- A4** A New MARCS Grid  
*B. Gustafsson, B. Edvardsson, K. Eriksson, U. G. Jørgensen, M. Mizuno-Wiedner and B. Plez*
- A8** Calculation of Spherically Symmetric NLTE Model Atmospheres Using ALI and a Thermal Balance Method  
*J. Kubát*
- A9** Colors of ATLAS9 Atmospheres and Their Interpolation  
*J. Nendwich, N. Nesvacil, W. W. Weiss, U. Heiter and F. Kupka*
- A10** Comparison Analysis of Outer Atmosphere Models of the Sun and Red Dwarfs During Flares and in Quiescence  
*M. A. Livshits and M. M. Katsova*
- A12** Does Betelgeuse Have a Magnetic Field?  
*S. B. F. Dorch and B. Freytag*
- A13** Dust Grain Properties in Atmospheres of AGB Stars  
*A. C. Andersen, S. Höfner and R. Gautschy-Loidl*
- A14** The Influence of the Global Magnetic Field Evolution on the Structure of Atmospheres of Early-Type Stars  
*G. Valyavin, O. Kochukhov and N. Piskunov*
- A15** Line-by-Line Opacity Stellar Atmosphere Models  
*V. Tsymbal and D. Shulyak*
- A16** Model Atmospheres and SEDs of Chemically Peculiar Stars  
*Y. V. Pavlenko*
- A17** Modelling of Solar-Like Starspots by Magnetic Charges  
*E. Gerth and Yu. V. Glagolevskij*
- A18** Modelling of Stellar Magnetic Fields by Superposition of Elementary Dipoles  
*E. Gerth and Yu. V. Glagolevskij*

- A19** Modelling Band 3 of the ISO-SWS Calibration Sources  
*R. Van Malderen and L. Decin*
- A20** New Grids of ATLAS9 Model Atmospheres  
*F. Castelli and R. L. Kurucz*
- A21** Solar and Stellar Atmospheric Modeling Using the Pandora Computer Program  
*E. H. Avrett and R. Loeser*
- A22** Spectral Variations During LBV Pulsations  
*E. A. Dorfi and A. Gautschy*
- A24** NLTE Line Formation in Late-Type Stellar Atmospheres  
*C. Allende Prieto, I. Hubeny, D. L. Lambert and T. Lanz*
- A26** Non-ideal Effects on a Hydrogen Fluid and the Second Component of the Balmer Discontinuity in Be Stars  
*R. Rohrmann, J. Zorec, L. Cidale, N. Morrell and Y. Frémat*

### Session B. Radiative Transfer

- B1** Abundances of CNO Elements in Upper Main-Sequence: NLTE Results  
*S. A. Korotin and S. M. Andrievsky*
- B2** Radiation and Chemi-Ionization/Recombination Processes in Atom-Atom and Ion-Atom Collisions in the Modeling of Low-Temperature Stellar Atmospheres  
*A. A. Mihajlov, Lj. Ignjatović, M. S. Dimitrijević, D. Jevremović and P. Hauschildt*
- B3** Effects of UV Line Blanketing on the Non-LTE Fe I Line Formation  
*R. Collet, A. E. García Pérez, M. Asplund and F. Thévenin*
- B4** Light-Induced Drift in Atmospheres of CP Stars  
*A. Aret and A. Sapar*
- B5** Lines as Continuous Opacity  
*C. R. Cowley, D. J. Bord and G. M. Wahlgren*
- B6** NLTE Formation of Oxygen Lines in Irradiated Stellar Atmospheres  
*J. Kubát*
- B7** Modelling Acoustic Shocks in Outer Atmospheres of Cool Giant Stars  
*A. D. McMurry, M. Carlsson and R. F. Stein*
- B8** Solution of the Radiative Transfer Equation in Axial Symmetry  
*D. Korčáková and J. Kubát*
- B9** Stark Shifts and Transition Probabilities in Si III Spectra  
*M. S. Dimitrijević, S. Djeniže, A. Srećković and S. Bukvić*
- B10** Non-LTE Determination of Iron and Oxygen Abundances Using 3D Hydrodynamical Models: the Metal-Poor Star HD140283  
*N. G. Shchukina, I. E. Vasiljeva, J. Trujillo Bueno and M. Asplund*

**B11** Structure in the Stellar Wind of O-Type Stars*R. Blomme***B12** Iron in Non-LTE – Pitfalls and Prospects*A. J. Korn and T. Gehren***B13** A New Grid of Atmospheres for Early-Type Stars*E. J. Lentz, P. H. Hauschildt, J. P. Aufdenberg and E. Baron***B14** Zeeman Amplification of Radiative Accelerations in Magnetic Ap Stars*G. Alecian and M. J. Stift***B15** Soft X-ray Heating of Stellar Chromospheres*P. Heinzel and A. Berlicki***Session C. Convection****C1** Acoustic Waves in the Solar Chromosphere - Numerical Simulations with CO<sup>5</sup>BOLD*S. Wedemeyer, B. Freytag, M. Steffen, H.-G. Ludwig and H. Holweger***C2** Characterizing the Dynamic Properties of the Solar Turbulence with 3-D Simulations: Consequences in Term of *p*-mode Excitation*R. Samadi, Å. Nordlund, R. F. Stein, M.-J. Goupil and I. Roxburgh***C3** Effects of Domain Size on Surface Simulations of the Sun*F. J. Robinson, L. H. Li, P. Demarque, S. Sofia, Y.-C. Kim and D. B. Guenther***C4** Modelling the Entire Atmosphere of Betelgeuse with 3D Simulations*B. Freytag and M. Mizuno-Wiedner***C5** Pre-Main Sequence and Main Sequence Models Using the Vienna Grids of ATLAS9 Atmospheres*J. Montalbán, F. Kupka, F. D'Antona and U. Heiter***C6** Problems and Difficulties in Building up Stellar Models with Non-grey Boundary Conditions*J. Montalbán, F. D'Antona and F. Kupka***C7** Steady Parts of Magnetic Field and Rotational Velocity Field Structures in the Atmosphere of Late Type Stars*K. M. Hiremath***C9** Two-Component Modeling of Convective Motions in the Solar Photosphere and Determination of Atomic Parameters*J. M. Borrero and L. R. Bellot Rubio***C10** Using Balmer Line Profiles to Investigate Convection in A and F Stars*B. Smalley and F. Kupka***C11** Large-Scale Flow in Two-Dimensional Simulation of Solar Convection*O. Steiner***C12** Typical Scales of Structures in Numerical Models of Betelgeuse*B. Freytag and S. Finnsson*

**Session D. Atmospheric Inhomogeneities**

- D2** Abundances in Stars from the Red Giant Branch Tip to Near the Main Sequence Turn Off in M5  
*S. V. Ramírez and J. G. Cohen*
- D3** An “In Depth” Look at the  $^3\text{He}$  Stars  
*D. A. Bohlender, J. Bolduc-Duval, A. Sigut and J. D. Landstreet*
- D4** Analysis of Stokes Profiles of the RoAp Stars HD 24712 and HD 12098  
*T. Lüftinger, T. Ryabchikova, Ch. Stütz, W. W. Weiss, M. Auriere, J.-F. Donati, F. Lignières, P. Petit, S. Bagnulo, J. D. Landstreet, S. L. S. Shorlin, T. A. A. Sigut, S. Strasser and G. A. Wade*
- D5** Vertical Chromium Distribution in the Atmospheres of CP Stars  
*I. Savanov*
- D6** Chemical Homogeneity of Atmospheres in Clump Stars of the Galaxy  
*G. Tautvaišienė, E. Puzeras, D. F. Gray and I. Ilyin*
- D7** Chemical Stratification in the Atmosphere of the Cool Ap Star  $\beta$  CrB  
*G. A. Wade, F. LeBlanc, T. A. Ryabchikova and D. Kudryavtsev*
- D8** Chromospheric Two-Component NLTE Modelling of RS CVn Systems  
*A. C. Lanzafame, I. Busà and M. Rodonò*
- D9** Doppler Imaging in Late-Type Stars: Model Scale  
*M. Zboril*
- D10** Doppler Images of HD 199178 (V1704 Cygni)  
*T. Hackman*
- D12** Dust Formation in Brown Dwarf Atmospheres Under Conditions of Driven Turbulence  
*Ch. Helling, R. Klein, P. Woitke and E. Sedlmayr*
- D14** The Gallium NLTE Line Transfer in HgMn Stars  
*M. Zboril and K. A. Berrington*
- D15** Granulation Abundance Corrections from Hydrodynamical Convection Simulations  
*M. Steffen and H. Holweger*
- D16** Interferometric-Doppler Imaging of Stellar Surface Structure  
*S. Jankov, F. Vakili and A. Domiciano de Souza*
- D17** Interpretation of the Core-Wing Anomaly of Balmer Line Profiles of Cool Ap Stars  
*O. Kochukhov, S. Bagnulo and P. S. Barklem*
- D18** Latitudinal Differential Rotation in Stellar Atmospheres  
*A. Domiciano de Souza, J. Zorec, S. Jankov, F. Vakili, R. G. Petrov and L. Abe*

- D19** Li Abundances from the 6104Å Line in Pleiades Stars: Two-Component Models  
*A. Ford, B. Smalley and R. D. Jeffries*
- D20** Lithium Enrichment in High Rotating K Giants  
*N. A. Drake, R. de la Reza, L. da Silva and D. L. Lambert*
- D22** Multi-element Abundance Doppler Imaging of the RoAp Star HR 3831  
*O. Kochukhov, N. A. Drake and R. de la Reza*
- D23** On the Longitudinal Spot Distribution on FK Com in 1998  
*H. Korhonen, S. V. Berdyugina and I. Tuominen*
- D24** Search for Chemical Stratification and Vertical Structure of Magnetic Field in CP Stars Using Balmer Jump Region Spectra  
*I. I. Romanyuk, D. O. Kudryavtsev and A. V. Chernova*
- D25** Searching for Vertical Chemical Stratification in A Stars  
*R. Monier, D. Dubaj, G. Alecian and F. LeBlanc*
- D26** Motion of a Giant Planet in the Atmosphere/Wind of a Mira Variable  
*L. A. Willson, B. Cohanin and C. Struck*
- D27** The Enigma of Lithium: from CP Stars to K Giants. First Results of CP Star Observations Obtained at Mount Stromlo Observatory  
*N. S. Polosukhina, N. A. Drake, M. Hack, R. de la Reza, P. R. Wood and A. V. Shavrina*
- D29** Weak and Tangled Magnetic Fields in B, A and F Stars  
*G. A. Wade, M. Auriere, J.-F. Donati, F. Lignières, P. Petit, S. Bagnulo, J. D. Landstreet, S. L. S. Shorlin, T. A. A. Sigut, T. Lüftinger and S. Strasser*

## Session E. Comparison with Observations

- E1** 10 Aql, the Quest  
*Ch. Stütz, P. Knoglinger and W. W. Weiss*
- E3** A New Model of Density Layers of Matter in the Expanding Gaseous Envelope of Oe and Be Stars  
*E. Danezis, D. Nikolaidis, E. Lyrtzi, M. Stathopoulou, E. Theodossiou, A. Kossionides, C. Drakopoulos, G. Christou and P. Koutsouris*
- E4** Absolute Lineshifts – a New Diagnostic for Stellar Hydrodynamics  
*D. Dravins*
- E5** Stellar Abundance Patterns. What is the Possible Level of Completeness Today?  
*V. Gopka, A. Yushchenko, F. Musaev, G. Galazutdinov, C. Kim, A. Shavrina, Y. Pavlenko, N. Polosukhina and P. North*
- E6** Abundance Analysis of Planetary Host Stars  
*U. Heiter and R. E. Luck*

- E7** Abundance Analysis of S-process Rich Stars  
*L. Začs, R. Spēlmanis and R. Griffin*
- E10** Application of New ATLAS9 Model Atmosphere Grids  
*U. Heiter, F. Kupka, R. Samadi, C. Barban, C. van't-Veer Menneret, Y. Lebreton, M.-J. Goupil, R. Garrido and W. W. Weiss*
- E12** Atmospheres of RoAp Stars  
*N. Nesvacil, P. Knoglinger, W. W. Weiss and T. A. Ryabchikova*
- E13** Atmospheric Properties of the delta Scuti Star FG Virginis  
*P. Mittermayer and W. W. Weiss*
- E14** Betelgeuse: ISO-SWS vs. MARCS Models  
*T. Verhoelst, L. Decin, B. Vandebussche, R. Van Malderen, C. Waelkens and T. de Graauw*
- E15** Carbon, Nitrogen, Oxygen Abundances in OB-Associations  
*I. Stateva and L. Georgiev*
- E16** CH Cyg Spectral Variability in the Context of Atmospheric Models  
*M. R. Schmidt, J. Mikolajewska and K. H. Hinkle*
- E17** Chemical Composition of Early Be Type Stars  
*Y. Frémat, R. Levenhagen, J. Zorec, N. Leister, A.-M. Hubert, M. Floquet, C. Neiner and C. Martayan*
- E18** Chromospheric Activity-Rossby Number Relation for Main Sequence Stars  
*K. Stępień*
- E20** Results of the Surface Magnetic Field Reconstruction for Some Magnetic CP Stars  
*V. R. Khalack*
- E21** Confrontation of Synthetic Spectra with Infrared Observational Data  
*L. Decin*
- E23** Differential Rotation in a Larger Sample of Cool Stars  
*A. Reiners and J. H. M. M. Schmitt*
- E24** Doppler Imaging of the RS CVn-Type Binary II Pegasi  
*Sheng-hong Gu, Hui-song Tan and Hong-guang Shan*
- E26** Fundamental Parameters of Fast Rotating B-Type Stars  
*Y. Frémat, J. Zorec, A. M. Hubert, M. Floquet and L. Cidale*
- E27** Fundamental Parameters of Slowly Rotating Early-Type Stars  
*Y. Frémat and J. Zorec*
- E28** Hydrogen Balmer Lines as Probes of Stellar Atmospheres  
*P. S. Barklem and N. Piskunov*
- E29** Applications of a New Model of Density Layers of Matter in the Expanding Gaseous Envelope of Oe and Be Stars  
*E. Danezis, E. Lyrtzi, D. Nikolaidis, E. Theodossiou, M. Stathopoulou, G. Christou, C. Drakopoulos, A. Kosionidis and A. Soulikias*

- E30** Direct Observations of Rotationally Distorted Stars  
*G. T. van Belle, D. R. Ciardi, R. R. Thompson and R. L. Akeson*
- E32** Model Atmospheres and the Analysis of IR Spectra of Carbon Stars.  
*R. Wahlin*
- E33** Model Atmosphere Analyses of Post-Common Envelope Stars  
*M. T. Rushton, B. Smalley, R. N. Ogley, J. H. Wood, P. Hauschildt and J. N. Bleach*
- E34** Modeling UV OH Lines in Solar-Type Stars  
*R. C. Peterson*
- E35** Modelling Observed Velocity Fields in Tepid Star Atmospheres  
*J. D. Landstreet*
- E37** NLTE Model-Atmosphere Analysis of B Stars  
*M. Hempel and H. Holweger*
- E38** Non-solar Abundance Ratios in Solar-Type Stars of the Solar Neighborhood  
*G. F. Porto de Mello*
- E39** NLTE Heavy Element Abundances in Cool Dwarfs: an Implication for the Galaxy Chemical Evolution  
*L. Mashonkina and T. Gehren*
- E40** The Emission Regions of the IR Excess and the H $\alpha$  Line in the Be Star X Per  
*Q. Z. Liu*
- E42** KECK NIRSPEC Infrared OH Lines: Oxygen Abundances in Metal-Poor Stars Down to  $[\text{Fe}/\text{H}] = -2.9$   
*B. Barbuy and J. Meléndez*
- E43** Parametric Resonance and Magnetic Activity in Close Binary Systems  
*D. Sokoloff and N. Piskunov*
- E44** Preliminary Analysis of an Extreme Helium sdO Star: BD+25 4655  
*J. Budaj, V. Elkin and I. Hubeny*
- E45** Search for Rapid Variability of Metallic Lines in the H $\alpha$  Region of HR 3831  
*J. Žižňovský, J. Zverko, M. Škřeka and N. S. Polosukhina*
- E47** Spectral Line Ratios as Temperature Indicators in Solar-Like Stars  
*B. Caccin and V. Penza*
- E48** Spottedness of Photospheres and Coronal Heating of Various Kinds of the Most Active Late-Type Stars  
*M. M. Katsova and M. A. Livshits*
- E49** Processing Stellar Echelle Spectra  
*V. Tsymbal, D. Lyashko and W. W. Weiss*
- E51** Sulphur and Iron Abundances in Halo Stars  
*P. E. Nissen, Y. Q. Chen, M. Asplund and M. Pettini*

- E52** Tests of Stellar Model Atmospheres by Optical Long-Baseline Interferometry  
*M. Wittkowski*
- E53** The Infrared Spectrum of R Doradus  
*N. Ryde and K. Eriksson*
- E55** The ASTRA Spectrophotometer  
*S. J. Adelman, A. F. Gulliver, B. Smalley, J. S. Pazder, P. F. Younger, L. Boyd and D. Epand*
- E56** Molecular Absorbers in the Atmospheres of Methane Dwarfs  
*D. Homeier, F. Allard, P. H. Hauschildt and V. Boudon*
- E62** The Granulation Fingerprints of Spectral Lines  
*D. Kiselman and M. Asplund*
- E66** Tools and Methods for Abundance Analysis  
*P. Knoglinger, N. Nesvacil, F. Kupka, P. Mittermayer, N. Piskunov, W. W. Weiss and H. Bruntt*
- E67** Detection of Water Vapor in Arcturus (K2IIIp)  
*N. Ryde, J. H. Lacy, M. J. Richter, D. L. Lambert and T. K. Greathouse*
- E68** Wavelength-Dependent Diameters of Cool Giant Stars  
*A. Quirrenbach and J. Aufdenberg*
- E69** What do Asteroseismologists Need from Model Atmospheres?  
*F. P. Pijpers*
- E71** An Ab Initio HCN and HNC Rotational Vibrational Line Lists for Astronomy  
*G. J. Harris, O. Polyansky and J. Tennyson*
- E72** A Semi-Automatic Method for Abundance Analysis. Two Case Studies: the Giant Star  $\kappa$  Hydrae and the  $\delta$  Scuti Stars in NGC 6134  
*H. Bruntt and S. Frandsen*

## Session F. Winds – Cool and Pulsating Stars

- F1** A Spectroscopy of Pulsating Carbon Stars: Variations with Phase  
*L. Začs, R. Spēlmanis, A. Alksnis and F. Musaev*
- F2** A Zero Velocity Layer in the Atmospheres of AGB Stars?  
*T. Lebzelter, W. Nowotny, J. Hron and K. H. Hinkle*
- F3** Atmospheric Kinematics in AGB Stars: a Confrontation Between Theory and Observations  
*W. Nowotny, B. Aringer, R. Gautschy, S. Höfner, T. Lebzelter, J. Hron and W. Windsteig*
- F4** Determining Stellar Parameters for Red Giants  
*B. Aringer, U. G. Jørgensen, M. Schultheis, S. Höfner and F. Kerschbaum*

- F5** Three-Component Modeling of C-Rich AGB Star Winds  
*C. Sandin and S. Höfner*
- F6** Investigating a Possible Spectral Signature of the Wind-ISM Interaction Region of  $\alpha$  Tau  
*B. E. Wood, G. M. Harper, H.-R. Müller and G. P. Zank*
- F7** Probing the Mass Loss Rate History of Carbon Stars Using CO Line and Dust Continuum Emission  
*F. L. Schöier, N. Ryde and H. Olofsson*
- F8** Synthetic and Observed ISO-SWS Spectra of Mass Losing Carbon Stars  
*J. Hron, R. Gautschy-Loidl, S. Höfner, W. Nowotny and U. G. Jørgensen*
- F9** The Atmosphere of Red Supergiants  
*E. Josselin, B. Plez and N. Mauron*
- F10** The Millennium Outburst of the Cool Hypergiant  $\rho$  Cassiopeiae: Spectroscopy and Modeling  
*A. Lobel, A. K. Dupree, R. P. Stefanik, G. Torres, G. Israelian, N. Morrison, C. de Jager, H. Nieuwenhuijzen, I. Ilyin and F. Musaev*
- F11** VLA – Pie Town Observations of Betelgeuse: Diagnostics of a Complex Stellar Atmosphere  
*G. M. Harper and A. Brown*
- F12** Mapping the Shells in the Envelope of IRC+10216  
*P. de Laverny*
- F14** Winds of Late-Type Dwarf Stars – Observational Constraints  
*J. L. Linsky, B. E. Wood, H.-R. Müller and G. P. Zank*
- F15** Stochastic Motions in the Outer Atmosphere and Wind of the Nearby Supergiant  $\lambda$  Velorum  
*R. Böger, R. Baade and D. Reimers*
- F16** Measurements of Mira Stars with the VLTI  
*M. Wittkowski, A. Richichi, S. Correia and M. Schöller*
