

# NOTES FOR AUTHORS

## Submitting a paper

*Proceedings of the Royal Society of Edinburgh: Section A* considers for publication papers in all areas of mathematics. Papers for submission should be sent to:

The Editorial Office (Proc A)  
International Centre for Mathematical Sciences  
14 India Street  
Edinburgh EH3 6EZ, Scotland, UK

Contact numbers: Tel: (0)131 220 1777; Fax (0)131 220 1053; e-mail: [icms-proca@maths.ed.ac.uk](mailto:icms-proca@maths.ed.ac.uk)

Authors should send three copies of the paper; they should not at this stage send a disk or e-mail a file to the Editorial Office. At present, *Proceedings A* requires hard copies of the paper and does not accept electronic submission.

A paper by more than one author should be submitted with a statement, signed by each author, to the effect that the paper in its entirety is approved by the joint authors and naming the author who will be responsible for correspondence.

An acknowledgement letter or e-mail will be sent to the corresponding author on receipt of the paper. This will cite a reference number which will be used in all future correspondence regarding the paper.

Authors must prepare their papers as concisely as possible. Although *Proceedings A* has no page limit, longer papers can be difficult to review in a reasonable time and can be judged more harshly.

Each paper must be accompanied by a synopsis, in general not exceeding 200 words, which will be printed. References should be listed at the end of the paper in alphabetical order, numbered sequentially. References within the text should be indicated by numbers in square brackets. Authors are encouraged to use  $\text{T}_{\text{E}}\text{X}$  typesetting software to prepare their papers. The  $\text{L}_{\text{A}}\text{T}_{\text{E}}\text{X}$  macro package is especially recommended and a class file, with a brief guide, is available on either the RSE and ICMS website. Once a paper has been accepted for publication, authors will be asked, whenever possible, to supply the appropriate electronic file. This should be a single file, with any relevant macros included in the preamble, and named after the article reference number (e.g. A99345.tex). Figures in postscript form are also welcome, and should be submitted at the same time as the code for the paper.

## Proofs and offprints

Authors will be sent proofs of their paper for checking, together with an offprint order form. Fifty offprints are supplied free of charge, this number to be shared between joint authors. Additional offprints may be ordered in units of 25.

## Copyright

On acceptance of their paper, authors are asked to assign the copyright of their paper to the Royal Society of Edinburgh. They are also asked to ensure that any electronic versions of their paper clearly state the official place of publication.

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, papers published in *Proceedings A* may only be reproduced, stored or transmitted with the prior permission of the copyright holder, or, in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. The Society permits the making of a single photocopy of a article from an issue (under Sections 29 & 38 of the Act) for an individual for the purposes of research or private study.

## Subscription details

The journal is published every two months by the RSE Scotland Foundation. Subscription price is £230 for six issues (vol 129). Orders, claims etc., should be addressed to CAB International, Wallingford, Oxon OX10 8DE, UK. Tel: (0)1491 832111; Fax (0)1491 826090.

CONTENTS

F. ALESSIO, P. CALDIROLI and P. MONTECCHIARI	
Genericity of the multibump dynamics for almost periodic Duffing-like systems	885–901
J. D. AVRIN	
Large-frequency global regularity for the incompressible Navier–Stokes equation	903–912
I. M. CHISWELL	
Actions of locally nilpotent groups on $\Lambda$ -trees	913–924
Y. DENG and G. WANG	
On inhomogeneous biharmonic equations involving critical exponents	925–946
B. FLORKIEWICZ and K. WOJTECZEK	
Some second-order integral inequalities of generalized Hardy type	947–958
J. LEECH	
Symmetric groupoids, free categories and $E^*$ -unitary inverse monoids	959–985
M. MIETTINEN and U. RAITUMS	
On the strong closure of strains and stresses in linear elasticity	987–1010
M. MOLLER	
On the unboundedness below of the Sturm–Liouville operator	1011–1015
S. RUAN and J. WEI	
Periodic solutions of planar systems with two delays	1017–1032
J. RUBIN	
Stability, bifurcations and edge oscillations in standing pulse solutions to an inhomogeneous reaction-diffusion system	1035–1079
M. ŠILHAVÝ	
On isotropic rank 1 convex functions	1081–1105

(Issued 15 October 1999)
