

## FACEBOOK ADDICTION IN MEXICO: A CASE REPORT

*I. Espinoza, R. Pezoa*

Enseñanza, Instituto Nacional de Psiquiatria, Mexico City, Mexico

We evaluated a female patient, without previous psychiatric in our hospital with actual problem was her facebook addiction. We applied The Bergen Facebook Scale (BFAS) comprises six statements which are meant to be answered with

- (1) Very rarely,
- (2) Rarely,
- (3) Sometimes,
- (4) Often, and
- (5) Very Often.

Answering with a 4 or above for four or more of the following statements may suggest an addiction to Facebook. She got an initial score of 88. We started pharmacological treatment and CBT. This investigation is a case report. Facebook Addiction is a type of new mental problem at our times.
