The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY
WALTER HOWARTH

ASSISTANT EDITOR
G. H. BATEMAN

WITH THE COLLABORATION OF
V. E. NEGUS R. G. MACBETH

1. Original Articles are accepted on the condition that they have not been published elsewhere.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.

The Harvard system of recording references should be used, e.g. GREEN, C., and BROWN, D. (1951) *J. Laryng.*, 65, 33. Abbreviations of Journals should follow the style recommended in *World Medical Periodicals*, published by World Health Organisation 1952.

It is most important that authors should verify *personally* the accuracy of every reference before submitting a paper for publication.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked, and no extra matter added.

4. Illustration blocks are provided free up to the limit of £5 per article; beyond this authors are expected to pay half the cost.

5. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied.

6. Authors of original communications on Oto-Laryngology in other journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

7. Editorial communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS LTD, 109 Kingsway London WC 2.

8. The annual subscription is three guineas sterling (U.S.A. \$10.) post free, and is payable in advance.

9. Single copies will be on sale at 7s. 6d. each; copies of parts up to Vol. LXIII may be purchased at 4s. each.

10. All subscriptions, advertising and business communications should be sent to the publishers, HEADLEY BROTHERS LTD, 109 Kingsway London WC 2.

United States of America

Orders for this *Journal* may be sent either through a local bookseller, or to Messrs G. E. STECHERT & Co., 31-33 East 10th Street, New York, or they may be sent direct to the publishers, HEADLEY BROTHERS LTD, 109 Kingsway London WC 2, England.

New

'PAREDRIX' SPRAYPAK

'Paredrix' is already well-known as the constituent of 'Sulfex' and 'Pendex' that produces such remarkably rapid and prolonged vasoconstriction.

When an unmedicated vasoconstrictor is indicated, the pocket-sized ($\frac{1}{2}$ -fl. oz.) 'Paredrix' Spraypak is a most convenient presentation.

It disseminates a fine mist of 'Paredrix' throughout the complicated nasal passages, quickly bringing lasting improvement in ventilation and drainage.

'Paredrix' Spraypak
($\frac{1}{2}$ fl. oz.)

It causes no inhibition of ciliary activity, no ephedrine-like central-nervous side-effects, no stinging, and no secondary returgescence.

'Paredrix' is also available in 8-oz. bottles for dispensing.

Impacted Wax

Removed swiftly and safely

Even severely impacted wax can now be safely loosened, softened or dissolved by Cerumol. Pressure syringing is no longer necessary.

Cerumol was clinically tested in a London hospital and is an accepted product for use in a large number of hospitals and general practices throughout the country. It is included in Category No. 4 in the Classified List of Proprietary Preparations issued by the Ministry of Health, and may therefore be prescribed on N.H.S. form E.C.10. Price under the National Health Scheme, 2s. 8d. per 10 c.c. vial with separate dropper. Also packed in 2 oz. and 10 oz. bottles for hospital use.

Safe, Efficient, Anti-bacterial. Saves Time and Trouble.

Obtainable through your Chemist.

Broad spectrum antibiotic

TYROSOLVEN

The word "antibiotic" was first used in 1889. Vuillemin, introducing it, said: "The conception is so simple that no one has ever thought of giving it a name". Since then, antibiotics have been produced from fungi, lichens, algae and bacteria. An outstanding member of the bacterial group is *tyrothricin*, which forms the basis of TYROSOLVEN antibiotic lozenges. It is effective against a wide spectrum of oral bacteria, and relieves superficial mouth and throat infections.

ACTIVE CONSTITUENTS:
Tyrothricin 1 mg.,
benzocaine 5 mg.

PACKING:
Tubes of 20 lozenges
and dispensing pack
of 250 not subject to
Purchase Tax.

Tyrosolven

No Warner preparation has ever been advertised to the public.

POST-TONSILLECTOMY COMFORT

Immediate pain relief—Speedier Convalescence

The pain of traumatized tissues following tonsillectomy, demands its own relief—and points the need for analgesia that quickly reaches the irritated area.

ASPERGUM provides 'salivary analgesia' through the simple act of chewing — it brings pain-relieving acetylsalicylic acid into *intimate* and *prolonged* contact with the tonsillar

region, seldom reached even intermittently by gargling. The rhythmic stimulation of muscular action also aids in relieving local spasticity & stiffness: more rapid tissue repair is promoted. Each pleasantly flavoured chewing gum tablet provides 3½ grains acetylsalicylic acid, permitting frequent use. Particularly suitable for children.

Aspergum

**for more than two decades a dependable
and welcome aid to patient-comfort**

Ethically promoted in packages of 16 tablets and moisture proof bottles of 36 and 250

AMPLIVOX MODEL 61 THE CLINICAL AUDIOMETER OF INTERNATIONAL REPUTE

"Messrs. Amplivox were among the first firms to produce an audiometer in this country, and their larger model is one of the best instruments of the kind now made in the world at a competitive price."—The LANCET, 23-12-50.

- Eleven exact test frequencies 125-12,000 c.p.s.
- Simplified hearing loss dial. The same set of figures is read for both bone and air conduction at all frequencies, and for speech.
- Bone conduction tests can be made from 125-4,000 c.p.s.
- Masking Tone calibrated in decibels, permitting accurate control of masking.
- Double Air receivers enable test tones to be switched instantly from ear to ear.
- Speech test circuit monitors speech level, permitting accurate measurement of hearing loss for speech.
- Loudness Balance Control establishes presence of recruitment in monaural deafness.
- Automatic voltage compensator.

Recruitment Test Set accessory establishes presence of recruitment by amplitude modulation, enabling each ear to be tested independently.

Speech Turntable, English made P.B. and Harvard Spondee Records available.

Full details are available from the manufacturers who will gladly arrange demonstrations if required.
