BIOLOGICAL CONSERVATION

An International Journal

Editor

*Eric Duffey, Monks Wood Experimental Station,
Institute of Terrestrial Ecology, UK*

Biological Conservation has as its main purpose the widest dissemination of original papers dealing with the preservation of wildlife and the conservation or wise use of biological and allied natural resources. It is concerned with plants and animals and their habitats in a changing and increasingly man-dominated biosphere—in fresh and salt waters as well as on land and in the atmosphere.

The journal's coverage of the discipline of conservation ecology is relevant to universities and research institutes while the emphasis on the practical application of the research results is important to all land managers, from those dealing with landscape design problems to those whose concern is nature reserve management.

ABSTRACTED/INDEXED IN: Current Contents, Biological Abstracts, Geo Abstracts, Biological and Agricultural Index, Environmental Periodicals Bibliography.

SUBSCRIPTION INFORMATION: (ISSN 0006-3207)

Volumes 35, 36 & 37 (1986) 4 issues per volume

Price: £179.00—UK delivery

£198.00/US \$327.00—outside UK delivery.

£ Sterling price is definitive; US \$ prices are subject to exchange rate fluctuations. All prices include post/packing. All subscriptions are airspeeded.

CUSTOMERS IN NORTH AMERICA

Further information and free specimen copies are available from: **JOURNAL INFORMATION CENTER, Elsevier Science Publishing Co., Inc., 52 Vanderbilt Ave., New York, NY 10017, USA. ALL SUBSCRIPTION ORDERS should be sent to Elsevier Applied Science Publishers' Barking, England address.**

**In 1867,
four renegades
founded a journal.**

Of the four men who left the Museum of Comparative Zoology in Cambridge to found **The American Naturalist**, two also participated in the founding, sixteen years later, of the American Society of Naturalists. The Society and the journal have worked closely together ever since, furthering the advancement and diffusion of knowledge about organic evolution and other broad biological principles.

**In 1986, AN is still at the
forefront.**

One of the oldest scientific periodicals in the United States, **The American Naturalist** is also one of the foremost publications in the world for research in ecology, evolution, and population biology. Drawing upon examinations of all biotic kingdoms, the **Naturalist** emphasizes sophisticated analyses, innovative theoretical syntheses, and empirical discoveries with broad general implications.

Marcus W. Feldman, Editor.

Published monthly.

**The November 1983 special issue is now a book
Ecology and Evolutionary Biology**

The papers in this collection outline the major positions in the current debate on approaches to community ecology. Considered together, these discussions contribute to the formulation of a new conceptual base for research in ecology and evolutionary biology.

One-year rates: Individuals \$50, Institutions \$90. Students with copy of ID \$35. Add \$8 for subscriptions outside the USA. *Ecology and Evolutionary Biology* (ISBN: 0-226-73443-9) Paper, \$7.95. **Visa or MasterCard accepted.** Mail complete charge card information, purchase order, or payment to **The University of Chicago Press, Journals Division, P.O. Box 37005, Chicago, IL 60637.**

Notes for contributors

Oryx publishes original articles and reports dealing with the conservation of species and habitats throughout the world, with particular emphasis on those that are endangered.

Contributions should be concise but informative, normally in English. Articles should be as short as possible, preferably under 2500 words, and very short articles are acceptable.

Manuscripts should be typed on one side only and double-spaced on A4 paper (208×298 mm). The left-hand margin must be at least 40 mm wide.

Two copies should be submitted if possible.

Footnotes should be avoided but if necessary should be indicated with asterisks in the text.

References in the text should give the author's name with the year of publication in parentheses. The reference list should be in alphabetical order and include the full title. References should be given according to the abbreviations in the World List of Scientific Periodicals.

Illustrations are welcomed and ideally should be glossy, black-and-white whole plate prints. Good colour slides are acceptable if black-and-white photographs are not available.

Line drawings and maps should be in black ink on strong white or translucent paper. Lettering on maps should not be handwritten.

Captions for figures should be typed consecutively on a separate sheet.

Scientific names should be underlined and not placed in brackets. Species' names should follow a named checklist, which should be mentioned in a covering letter where there is a risk of confusion.

The first time a species is mentioned its scientific name should be given. English names should be lower case throughout except where they incorporate the name of a particular country.

The author's name and postal address should follow any acknowledgments and references at the end of the article.

Edited manuscripts are sent so that corrections can be made before typesetting. Authors should check these carefully since corrections at galley stage are expensive. Galley proofs will be sent to the author for approval before going to press if time permits.

Fifty reprints are supplied free; additional copies are supplied at cost.

All correspondence to Dr Jacqui Morris, Editor of *Oryx*, Fauna and Flora Preservation Society, 8–12 Camden High Street, London NW1 0JH, UK.
