	PAGE
MIRSKY, L. On a theorem in the additive theory of numbers due to Evelyn and Linfoot	305
BESICOVITCH, A. S. On surfaces of minimum area	313
DOMB, C. Some probability distributions connected with recording apparatus	335
MORAN, P. A. P. The statistical distribution of the length of a rubber molecule	342
BONDI, H. and LYTTLETON, R. A. On the dynamical theory of the rotation of the earth. I. The secular retardation of the core	345
CRAGGS, J. W. The breakdown of the hodograph transformation for irrotational compressible fluid flow in two dimensions	360
HOWARTH, L. The propagation of steady disturbances in a supersonic stream bounded on one side by a parallel subsonic stream	380
SNEDDON, I. N. and TOUSCHEK, B. F. A note on the calculation of the spacing of energy levels in a heavy nucleus	391
WOODWARD, P. M. A statistical theory of cascade multiplication	404
MCWEENY, R. and COULSON, C. A. Quantum mechanics of the anharmonic oscillator	413
PENNY, ANGELA H. A. A theoretical determination of the elastic constants of ice	423
HILL, J. M. The half-life of thorium C'	440
GILBERT, C. W. The disintegration of boron by slow neutrons. II	447
RESEARCH NOTE:	
HARI SHANKER. Certain integral representations for Whittaker functions	453

REPRINTED BY PHOTOGRAPHIC PROCESS 1968
