

## AUTHOR INDEX FOR VOLUME 88

AFKHAMI, M., KARIMI, M. and KHASHYARMANESH, K.; On the regular digraph of ideals of commutative rings	177
AKBARBAGLU, I. and MAGHSOUDI, S.; Porosity of certain subsets of Lebesgue spaces on locally compact groups	113
ALZAHARY, T.; Uniqueness of meromorphic functions with weakly weighted sharing	26
ARENA, O. and GIANNOTTI, C.; Elliptic extensions in the disk with operators in divergence form	51
BAEK, S., CHOE, I., JUNG, Y., LEE, D. and SEO, J.; Constructions by ruler and compass, together with a fixed conic	474
BARNESLEY, M. F. and VINCE, A.; The Conley attractors of an iterated function system	267
BHATT, S. J., DABHI, P. A. and DEDANIA, H. V.; On the $*$ -semisimplicity of the $\ell^1$ -algebra on an abelian $*$ -semigroup	493
BHATTI, M. I.; see MUDDASSAR, M.	320
BORWEIN, D.; Criteria for the sequence of differences of a bounded sequence to be null	123
BRENT, R. P. and OSBORN, J.-A. H.; Bounds on minors of binary matrices	280
CERONE, P.; see QI, F.	309
CHANG, M.-C.; Elements of large order in prime finite fields	169
CHEN, J. and CUI, J.; Two questions of L. Vaš on $*$ -clean rings	500
CHEN, S.-C. and LUO, H.; Odd multiperfect numbers	56
CHEN, SH., PONNUSAMY, S., VUORINEN, M. and WANG, X.; Lipschitz spaces and bounded mean oscillation of harmonic mappings	143
CHEN, Y.-G.; see REN, X.-Z.	521
CHOE, I.; see BAEK, S.	474
CRASMAREANU, M.; see CĂLIN, C.	128
CUI, J.; see CHEN, J.	500
CĂLIN, C. and CRASMAREANU, M.; Slant curves and particles in three-dimensional warped products and their Lancret invariants	128
DABHI, P. A.; see BHATT, S. J.	493
DE KONINCK, J.-M. and KÁTAI, I.; Construction of normal numbers using the distribution of the $k$ th largest prime factor	158
DEDANIA, H. V.; see BHATT, S. J.	493
DILONÉ, M. A., GARCÍA-OLIVO, M. and GUTIÉRREZ, J. M.; A note on the semilocal convergence of Chebyshev's method	98
DING, G.-G. and LI, J.-Z.; Isometries between unit spheres of the $\ell^\infty$ -sum of strictly convex normed spaces	369

DRAGOMIR, S. S.; see QI, F.	309
ESHRAHGI, H.; Existence of almost split sequences via regular sequences	218
FRANCE-JACKSON, H., KHULAN, T. and TUMURBAT, S.; On $\alpha$ -like radicals of rings	331
GABROVŠEK, B.; The categorification of the Kauffman bracket skein module of $\mathbb{R}P^3$	407
GARCÍA-OLIVO, M.; see DILONÉ, M. A.	98
GIANNOTTI, C.; see ARENA, O.	51
GIGOŃ, R. S.; Regular congruences on an idempotent-regular-surjective semigroup	190
GILLESPIE, N. I.; see HAWTIN, D. R.	286
GOEHLE, G.; Groupoid $C^*$ -algebras with Hausdorff spectrum	232
GUTIÉRREZ, J. M.; see DILONÉ, M. A.	98
HAWTIN, D. R., GILLESPIE, N. I. and PRAEGER, C. E.; Elusive codes in Hamming graphs	286
HAYAJNEH, S. and KITTANEH, F.; Trace inequalities and a question of Bourin	384
HE, H.; The Robin problem for the Hénon equation	1
IRSHAD, W.; see MUDDASSAR, M.	320
JO, J. H. and LEE, J. B.; A note on free actions of groups on products of spheres	340
JUNG, Y.; see BAEK, S.	474
KAMALI, Z. and LASHKARIZADEH BAMI, M.; The multiplier algebra and BSE property of the direct sum of Banach algebras	250
KAMALOV, F.; The dual structure of crossed product $C^*$ -algebras with finite groups	243
KARIMI, M.; see AFKHAMI, M.	177
KÁTAI, I.; see DE KONINCK, J.-M.	158
KAWAKUBO, S.; Global solutions of the equation of the Kirchhoff elastic rod in space forms	70
KEKEÇ, G.; On Mahler's $p$ -adic $U_m$ -numbers	44
KERR, B.; Solutions to polynomial congruences in well-shaped sets	435
KHASHYARMANESH, K.; see AFKHAMI, M.	177
KHULAN, T.; see FRANCE-JACKSON, H.	331
KIM, D., PARK, Y. K. and PINTÉR, Á.; A diophantine problem concerning polygonal numbers	345
KIM, Y. C. and SUGAWA, T.; Univalence criteria and analogues of the John constant	423
KITTANEH, F.; see HAYAJNEH, S.	384

KONG, Q. J. and LIU, Q. F.; Conjugacy class size conditions which imply solvability	297
KOUSHESH, M. R.; One-point extensions and local topological properties	12
LARKI, H. and RIAZI, A.; Stable rank of Leavitt path algebras of arbitrary graphs	206
LASHKARIZADEH BAMI, M.; see KAMALI, Z.	250
LEE, D.; see BAEK, S.	474
LI, J. and WEI, W.; Slide reduction, successive minima and several applications	390
LEE, J. B.; see JO, J. H.	340
LI, J. J., ZHANG, G. R. and LING, B.; 1-regular Cayley graphs of valency 7	480
LI, J.-Z.; see DING, G.-G.	369
LIN, S.; see XIE, L.-H.	301
LING, B.; see LI, J. J.	480
LIU, Q. F.; see KONG, Q. J.	297
LUCA, F., OYONO, R. and YALCINER, A.; $L$ -functions of elliptic curves and binary recurrences	510
LUO, H.; see CHEN, S.-C.	56
MAGHSOUDI, S.; see AKBARBAGLU, I.	113
MUDDASSAR, M., BHATTI, M. I. and IRSHAD, W.; Generalisations of integral inequalities of Hermite–Hadamard type through convexity	320
MUNGKASI, S.; A study of well-balanced finite volume methods and refinement indicators for the shallow water equations	351
NAM, T. T.; The top left derived functors of the generalised $I$ -adic completion	259
NATH, R. K.; Commutativity degree of a class of finite groups and consequences	449
OSBORN, J.-A. H.; see BRENT, R. P.	280
OYONO, R.; see LUCA, F.	510
PARK, Y. K.; see KIM, D.	345
PETROVIĆ, LJ. and VALJAREVIĆ, D.; Statistical causality and stable subspaces of $H^p$	17
PINTÉR, Á.; see KIM, D.	345
POLLACK, P. and SANNA, C.; Uncertainty principles connected with the Möbius inversion formula	461
PONNUSAMY, S.; see CHEN, SH.	143
PRAEGER, C. E.; see HAWTIN, D. R.	286
QI, F., CERONE, P. and DRAGOMIR, S. S.; Complete monotonicity of a function involving the divided difference of psi functions	309
REN, X.-Z. and CHEN, Y.-G.; On near-perfect numbers with two distinct prime factors	521

RIAZI, A.; see LARKI, H.	206
SANNA, C.; see POLLACK, P.	461
SEO, J.; see BAEK, S.	474
SHANG, Y.; Estrada index of general weighted graphs	106
SLAPAR, M.; Cancelling complex points in codimension two	64
SONG, Y.-K.; Remarks on quasi-Lindelöf spaces	507
SU, N. and WANG, Y.; On the $p$ -length and the Wielandt length of a finite $p$ -soluble group	454
SUGAWA, T.; see KIM, Y. C.	423
SUN, L. and XIN, X.; The natural partial order on the semigroup of all transformations of a set that reflect an equivalence relation	359
SUN, Z.-W.; On a sequence involving sums of primes	197
TANAKA, Y.; Visible actions on flag varieties of type B and a generalisation of the Cartan decomposition	81
TANG, M. and YANG, Z.-J.; Jeśmanowicz' conjecture revisited	487
TUMURBAT, S.; see FRANCE-JACKSON, H.	331
VALJAREVIĆ, D.; see PETROVIĆ, LJ.	17
VINCE, A.; see BARNSLEY, M. F.	267
VUORINEN, M.; see CHEN, SH.	143
WANG, G.; see XU, R.	353
WANG, X.; see CHEN, SH.	143
WANG, Y.; see SU, N.	454
WEI, W.; see LI, J.	390
WU, J.; see XU, R.	353
XIE, L.-H. and LIN, S.; The Baire property in the remainders of semitopological groups	301
XIN, X.; see SUN, L.	359
XU, R., WU, J., WANG, G. and ZHANG, X.; On the sum of powers of the degrees of graphs	353
YALCINER, A.; see LUCA, F.	510
YANG, L.; Wiener index and traceable graphs	380
YANG, Z.-J.; see TANG, M.	487
YAO, G.; Hamilton sequences for extremal quasiconformal mappings of doubly-connected domains	376
ZHANG, G. R.; see LI, J. J.	480
ZHANG, X.; see XU, R.	353

## INFORMATION FOR AUTHORS

The *Bulletin of the Australian Mathematical Society* aims at quick publication of original research in all branches of mathematics. To ensure speedy publication, only articles which are sufficiently well presented, able to be published without revision, and which are judged by the Editor (often in consultation with an Associate Editor) to be competitive are refereed. This policy is in the interests of authors, as a quick rejection is better than a slow rejection. The *Bulletin* receives more than five times the material that can be published, therefore there are many commendable papers not accepted. Editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after peer review.

Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere. For a paper to be acceptable for publication, not only should it contain new and interesting results, but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Further information regarding these requirements may be found through our website [www.austms.org.au/Bulletin](http://www.austms.org.au/Bulletin). Authors are asked to avoid, as far as possible, the use of mathematical symbols in the title.

Articles should be prepared in  $\text{\LaTeX}$  using  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\LaTeX}$  packages and submitted as a PDF file via our journal management system, at [www.austms.org.au/Publications/Submissions/BAustMS](http://www.austms.org.au/Publications/Submissions/BAustMS). This permits authors to track their papers through the editorial process. Recent versions of  $\text{\TeX}$  are able to produce PDF files directly. A  $\text{\LaTeX}$  class file for the *Bulletin* can be downloaded from the website. Authors who need assistance may email the secretary of the *Bulletin* at [jams@ms.unimelb.edu.au](mailto:jams@ms.unimelb.edu.au).

Authors are advised to keep copies of all files of the submitted article; the *Bulletin* will not accept responsibility for any loss.

## EDITORIAL POLICY

**1. References.** Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are in preparation or submitted. Where the work cited is not readily accessible (for example, a preprint) a copy of the article should be included with your submission.

### 2. Abstracts.

1. Each paper must include an abstract of not more than 150 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

**3. Subject Classification and Key Words.** Authors should include a few key words and phrases and one or more classification numbers, following the American Mathematical Society 2010 Mathematics Subject Classification for all codes. Details of this scheme can be found on the web at [www.ams.org/msc](http://www.ams.org/msc).

**4. Abstracts of PhD Theses.** The *Bulletin* endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within six months of the degree being approved.

**MIX**  
Paper from  
responsible sources  
**FSC® C007785**

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organisation established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

## Table of Contents

---

<b>On the sum of powers of the degrees of graphs</b> <i>Xu, R., Wu, J., Wang, G. &amp; Zhang, X.</i>	353
<b>The natural partial order on the semigroup of all transformations of a set that reflect an equivalence relation</b> <i>Sun, L. &amp; Xin, X.</i>	359
<b>Isometries between unit spheres of the <math>\ell^\infty</math>-sum of strictly convex normed spaces</b> <i>Ding, G.-G. &amp; Li, J.-Z.</i>	369
<b>Hamilton sequences for extremal quasiconformal mappings of doubly-connected domains</b> <i>Yao, G.</i>	376
<b>Wiener index and traceable graphs</b> <i>Yang, L.</i>	380
<b>Trace inequalities and a question of Bourin</b> <i>Hayajneh, S. &amp; Kittaneh, F.</i>	384
<b>Slide reduction, successive minima and several applications</b> <i>Li, J. &amp; Wei, W.</i>	390
<b>The categorification of the Kauffman bracket skein module of <math>\mathbb{RP}^3</math></b> <i>Gabrovšek, B.</i>	407
<b>Univalence criteria and analogues of the John constant</b> <i>Kim, Y. C. &amp; Sugawa, T.</i>	423
<b>Solutions to polynomial congruences in well-shaped sets</b> <i>Kerr, B.</i>	435
<b>Commutativity degree of a class of finite groups and consequences</b> <i>Nath, R. K.</i>	448
<b>On the <math>p</math>-length and the Wielandt length of a finite <math>p</math>-soluble group</b> <i>Su, N. &amp; Wang, Y.</i>	453
<b>Uncertainty principles connected with the Möbius inversion formula</b> <i>Pollack, P. &amp; Sanna, C.</i>	460
<b>Constructions by ruler and compass, together with a fixed conic</b> <i>Baek, S., Choe, I., Jung, Y., Lee, D. &amp; Seo, J.</i>	473
<b>1-regular Cayley graphs of valency 7</b> <i>Li, J. J., Zhang, G. R. &amp; Ling, B.</i>	479
<b>Jeśmanowicz' conjecture revisited</b> <i>Tang, M. &amp; Yang, Z.-J.</i>	486
<b>On the <math>*</math>-semisimplicity of the <math>\ell^1</math>-algebra on an abelian <math>*</math>-semigroup</b> <i>Bhatt, S. J., Dabhi, P. A. &amp; Dedania, H. V.</i>	492
<b>Two questions of L. Vaš on <math>*</math>-clean rings</b> <i>Chen, J. &amp; Cui, J.</i>	499
<b>Remarks on quasi-Lindelöf spaces</b> <i>Song, Y.-K.</i>	506
<b><math>L</math>-functions of elliptic curves and binary recurrences</b> <i>Luca, F., Oyono, R. &amp; Yalciner, A.</i>	509
<b>On near-perfect numbers with two distinct prime factors</b> <i>Ren, X.-Z. &amp; Chen, Y.-G.</i>	520
<b>Author Index for Volume 88</b>	525
