The application of geometric
programming to the structural
design of aircraft wings

269

A. B. Haines
Turbulence modelling

278

**Library reviews, additions and
reports**

Cover Picture

An Airbus Industrie A 310 (here shown in Lufthansa livery) has recently returned to its base in Toulouse after an extensive route-proving exercise. Between 3rd and 8th July No 2 A 310 flew a round trip through the Middle and Far East with the equivalent of a full passenger load, one of the main purposes for the trip being to demonstrate to customers and potential customers.
