VOLUME 16 NUMBER 4 DECEMBER 1993 An International Journal of Current Research and Theory with Open Peer Commentary

Behavioral and Brain Sciences

Appearing in this issue, with Commentary . . .

Species and individual differences in communication based on private states David Lubinski & Travis Thompson

Coevolution of neocortical size, group size and language in humans R. I. M. Dunbar

Multiple book review of Origins of the Modern Mind Merlin Donald

Behavioral and Brain Sciences

Editor

Stevan Harnad

Managing Editor Nancy Simon

Chief Copy Editor Avis Kniffin

Associate Editors

Behavioral Biology Jack P. Hailman/Ú. Wisconsin Hubert Markl/U. Konstanz

Biosocial Behavior

Glendon Schubert/U. Hawaii, Manoa

Cognition and Artificial Intelligence Zenon Pylyshyn/U. Western Ontario

Cognitive Development

Annette Karmiloff-Smith/MRC, London and MPI, Nijmegen

Evolutionary Biology

Michael T. Ghiselin/California Academy of Sciences

Experimental Analysis of Behavior

A. Charles Catania/U. Maryland, Baltimore County

History and Systems Julian Jaynes/Princeton Language and Cognition

Philip Johnson-Laird/Princeton

Editorial Policy Behavioral and Brain Sciences (BBS) is an international journal providing a special service called Open Peer Commentary* to researchers in any area of psychology, neuroscience, behavioral biology, or cognitive science who wish to solicit, from fellow specialists within and across these BBS disciplines, multiple responses to a particularly significant and controversial piece of work. (See Instructions for Authors and Commentators, inside back cover.) The purpose of this service is to contribute to the communication, criticism, stimulation, and particularly the unification of research in the behavioral and brain sciences, from molecular neurobiology to artificial intelligence and the philosophy of mind.

Papers judged by the editors and referees to be appropriate for Commentary are circulated to a large number of commentators selected by the editors, referees, and author to provide substantive criticism, interpretation, elaboration, and pertinent complementary and supplementary material from a full cross-disciplinary perspective. The article, accepted commentaries, and the author's response then appear simultaneously in BBS.

Commentary on BBS articles may be provided by any qualified professional in the behavioral and brain sciences, but much of it is drawn from a large body of BBS Associates who have become formally affiliated with the project.

Qualified professionals are eligible to become BBS Associates if they have (1) been nominated by a current BBS Associate, (2) refereed for BBS, or (3) had a commentary or article accepted for publication. A special subscription rate is available to Associates. Individuals interested in serving as BBS Associates are asked to write the editor.

This publication was supported in part by NIH Grant LM 03539 from the National Library of Medicine.

*Modelled on the 'CA Comment' service of the journal Current Anthropology.

Copying This journal is registered with the Copyright Clearance Center (27 Congress St., Salem, MA 01970). Organizations in the U.S.A. who are also registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of U.S. Copyright Law) subject to payment to the CCC of the per-copy fee indicated in the code on the first page of the article. This consent does not extend to multiple copying for promotional or commercial purposes.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from the Cambridge or New York offices of the Press.

Subscriptions Behavioral and Brain Sciences (ISSN 0140-525X) is published quarterly in March, June, September, and December. Four parts form a volume. The subscription price for institutions of Volume 16 (1993) is US \$196.00 net in the U.S.A. and Canada; £133.00 in the rest of the world; for individuals US \$80.00 net (£54.00); for BBS Associates and for students (in the U.S.A. and Canada only) with proof of eligibility with order US \$46.00 net (£34.00); for APA, APS, and ASA members US \$64.00 net (£34.00) with proof of eligibility with order. Subscription price includes postage.

Single parts cost US \$50.00 net (£34.00) plus postage. Institutional orders may be sent to a bookseller, or, in the U.S.A. and Canada direct to: Cambridge University Press, 40 West 20 Street, New York, NY 10011-4211; in the U.K. and rest of the world to: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, England. Individuals must order direct from the Press. Second class postage paid at New York, N.Y., and at additional mailing offices. Postmaster: Send address changes in the U.S.A. and Canada to Behavioral and Brain Sciences, Cambridge University Press, 40 West 20 Street, New York, NY 10011-4211.

Advertising Inquiries about advertising should be sent to the Journals Promotion Department of the Cambridge or New York Office of Cambridge University Press.
