

CAMBRIDGE

NETWORK SCIENCE

- The first textbook of its kind in a rapidly expanding field
- Uses an interdisciplinary perspective with examples from across scientific and social science fields making it accessible to students of various subjects
- Supported by a fully interactive online version with numerous multimedia resources to assist students in their learning

Illustrated throughout in full colour, this pioneering textbook, spanning a wide range of topics from **physics to computer science, engineering, economics** and the **social sciences**, introduces network science to an interdisciplinary audience.

From the origins of the six degrees of separation to explaining why networks are robust to random failures, author **Albert-László Barabási** explores how viruses like Ebola and H1N1 spread, and why it is that our friends have more friends than we do.

Using numerous real-world examples, this innovatively designed text includes clear delineation between undergraduate and graduate level material. The mathematical formulas and derivations are included within Advanced Topics sections, enabling use at a range of levels. Extensive online resources, including films and software for network analysis, make this a multifaceted companion for anyone with an interest in network science.

Albert-László Barabási

Hardback £34.99 / \$59.99

JOURNALS

Journal of Biosocial Science

Editor

C. G. N. Mascie-Taylor, University of Cambridge, UK

Journal of Biosocial Science is a leading journal in the field of biosocial science, the common ground between biology and sociology. It is an essential reference guide for all biological and social scientists working in such areas as reproduction and its control, gerontology, ecology, genetics, applied psychology, sociology, education, criminology, demography, health and epidemiology. Publishing original research papers, short reports, reviews, lectures and book reviews, the journal also includes a Debate section which encourages comments on specific articles, with subsequent response from the original author.

Epidemiology and Infection

Editor-in-Chief

Norman Noah, London School of Hygiene and Tropical Medicine, UK

Epidemiology and Infection publishes original reports and reviews on all aspects of infection in humans and animals. Particular emphasis is given to the epidemiology, prevention and control of infectious diseases. The field covered is broad and includes the zoonoses, tropical infections, food hygiene, vaccine studies, statistics and the clinical, social and public health aspects of infectious disease. Papers covering microbiology and immunology, which have an epidemiological relevance, are part of this broad field. Papers come from medical and veterinary scientists worldwide. It has become the key periodical in which to find the latest reports on recently discovered infections and new technology. For those concerned with policy and planning for the control of infections, the papers on mathematical modelling of epidemics caused by historical, current and emergent infections, will be of particular value.

NETWORK SCIENCE

Volume 4

Number 2

CONTENTS

Articles

- Energy and resilience: The effects of endogenous interdependencies on trade network formation across space among major Japanese firms
PETR MATOUS AND YASUYUKI TODO 141
- Market formation as transitive closure: The evolving pattern of trade in music
JESSE C. SHORE 164
- A model of collaboration network formation with heterogeneous skills
KATHARINE A. ANDERSON 188
- Trust and manipulation in social networks
MANUEL FÖRSTER, ANA MAULEON AND VINCENT J. VANNETELBOSCH 216
- Interplay between signaling network design and swarm dynamics
ANDRÉ SEKUNDA, MOHAMMAD KOMAREJI AND ROLAND BOUFFANAIS 244

End Note

- Network patterns of legislative collaboration in twenty parliaments
FRANÇ OIS BRIATTE 266

Manuscript Submission Guidelines

Manuscripts for consideration for *Network Science* should be submitted electronically, using the Manuscript Central System at <http://journals.cambridge.org/NWS>. This system will allow authors to benefit from faster review and earlier, online publication. Authors who are unable to submit online should contact the NWS Editorial Office (at networkscience@cambridge.org) for assistance.

For more detailed instructions for contributors please go to <http://journals.cambridge.org/NWS/contributors>.
