THE ROYAL SOCIETY OF EDINBURGH

PROCEEDINGS

Section A (Mathematics)

PUBLISHED BY THE ROYAL SOCIETY OF EDINBURGH 22 GEORGE STREET, EDINBURGH, EH22PQ

EDITORIAL BOARD

Executive Editors

Professor W. D. COLLINS University of Sheffield

Professor W. N. EVERITT University of Dundee

Professor A. JEFFREY University of Newcastle upon Tyne

Professor A. ERDÉLYI University of Edinburgh Professor D. S. JONES University of Dundee Dr J. B. McLeod University of Oxford Professor D. C. PACK University of Strathclyde Professor E. M. PATTERSON University of Aberdeen Professor R. A. RANKIN University of Glasgow Dr F. SMITHIES University of Cambridge Professor I. N. SNEDDON University of Glasgow

Dr A. E. RITCHIE General Secretary

W. H. RUTHERFORD Executive Secretary

Royal Society of Edinburgh

Consulting Editors

Professor F. M. ARSCOTT University of Manitoba

Professor F. V. ATKINSON University of Toronto

Professor R. CONTI

Istituto Matematico, Firenze

Dr W. A. COPPEL

Australian National University

Dr M. S. P. EASTHAM Chelsea College, London

Professor D. E. EDMUNDS University of Sussex

Professor AVNER FRIEDMAN Northwestern University, Evanston, Illinois, USA

Professor J. K. HALE Brown University, Providence, RI, USA

Professor P. R. HALMOS University of Indiana, Bloomington, USA

Professor Dr E. M. DE JAGER University of Amsterdam

Professor Tosio Kato University of California, Berkeley, USA Professor A. M. MACBEATH University of Birmingham

Professor Dr E. MEISTER
Technical University of Darmstadt,
Germany (FDR)

Professor Åke Pleijel University of Uppsala, Sweden

Professor A. P. ROBERTSON University of Western Australia, Nedlands, Australia

Professor G.-C. ROTA Massachusetts Institute of Technology, USA

Professor S. M. SHAH University of Kentucky, Lexington, Kentucky, USA

Professor Dr F. STUMMEL Johann Wolfgang-Goethe University, Frankfurt am Main, Germany

Professor F. URSELL University of Manchester

Professor J. WERMER Brown University, Providence, RI, USA

CONTENTS

NO.		PAGE
1	Perturbation Theory for Sobolev Spaces. By Friedrich Stummel, Department of Mathematics, Johann Wolfgang Goethe Universität, Frankfurt am Main. Communicated by Professor W. N. Everitt	5
2	Barriers bounded by Two Transition Points of Arbitrary Odd Order. By JOHN HEADING, Department of Applied Mathematics, University College of Wales, Aberystwyth. Communicated by Professor A. Jeffrey	51
3	Uniqueness of Sturm-Liouville Coefficients. By S. D. WRAY, Department of Mathematics, University of the Witwatersrand, Johannesburg, South Africa. Communicated by Professor F. F. Bonsall, F.R.S.	
4	Comparison Theorems for a Class of Second-order Non-linear Ordinary Differential Equations. By Donald C. Benson, Department of Mathematics, University of California, Davis. Communicated by Professor W. N. Everitt	
5	Qualitative Aspects of the Spatial Deformation of Non-linearly Elastic Rods. By Stuart S. Antman and Kathleen B. Jordan. Communicated by Professor W. D. Collins	
6	Smooth Fronted Waves in the Shallow Water Approximation. By ALAN JEFFREY, Department of Engineering Mathematics, University of Newcastle upon Tyne	
7 *	Convolution of Vector Measures. By A. J. White, Department of Mathematics, University of Aberdeen. Communicated by Professor E. M. Patterson	
8	Bifurcation and Asymptotic Bifurcation for Non-compact Non-symmetric Gradient Operators. By J. F. Toland, Fluid Mechanics Research Institute, University of Essex. Communicated by Professor W. N. Everitt	137
9	Circular Disc between Two Parallel Planes Close Together. By J. C. COOKE, Deal, Kent. Communicated by Professor W. D. Collins	149
10*	Applications of the Todd-Coxeter Algorithm to Generalised Fibonacci Groups. By C. M. Campbell and E. F. Robertson, Mathematical Institute, University of St Andrews. <i>Communicated by</i> Dr T. S. Blyth	163
11	Limit-n Criteria of Integral Type. By F. V. ATKINSON, University of Toronto. Communicated by Professor W. N. Everitt	167
12	Spectral Theory of Rotating Chains. By C. A. STUART, Battelle Institute, 7 Route de Drize, Carouge, Geneva. Communicated by Dr J. B. McLeod	199
13*	The Instability of Two Vortex Sheets enclosing a Subsonic Jet due to an Acoustic Point Source. By N. HARDISTY, Department of Mathematics, University of Dundee. Communicated by Professor D. S. Jones, F.R.S.	
14	A Generalised Walsh-Lebesgue Theorem. By A. G. O'FARRELL, University of California, Los Angeles. <i>Communicated by Professor J. Wermer</i> .	231
15	Differentiability on the Boundary of the Solutions of Linear Elliptic Boundary Value Problems. By Renate Schappel, Mathematisches Seminar Frankfurt am Main. Communicated by Professor W. N. Everitt	

iv Contents

NO.		PAGE
16	Square Integrable Solutions of Perturbed Linear Differential Equations. By James S. W. Wong, Department of Mathematics, University of Iowa, USA. Communicated by Professor W. N. Everitt	
17	Absolutely Convergent Sturm-Liouville Expansions. By S. D. Wray, School of Mathematical Sciences, Flinders University of South Australia. Communicated by Professor F. F. Bonsall	
18	Linear-quadratic Optimal Control. By W. A. COPPEL, Department of Mathematics, Institute of Advanced Studies, Australian National University, Canberra. Communicated by Professor W. N. Everitt	271
19*	Improved Boundedness Conditions for Lowndes' Operators. By PHILIP HEYWOOD, Department of Mathematics, University of Edinburgh	291
20*	Deficiency Indices of Polynomials in Symmetric Differential Expressions, II. By Anton Zettl, Northern Illinois University, De Kalb, Illinois, and University of Dundee. <i>Communicated by</i> Professor W. N. Everitt	301
21*	Runge's Theorem for Parabolic Equations in Two Space Variables. By DAVID COLTON, Department of Mathematics, University of Strathclyde, and Fachbereich Mathematik, Universität Konstanz. Communicated by Professor W. D. Collins	307
22	Analytic, Generalized, Hyperanalytic Function Theory and an Application to Elasticity. By ROBERT P. GILBERT, University of Delaware and Freie Universität, Berlin, and WOLFGANG L. WENDLAND, Technische Hochschule, Darmstadt. Communicated by Professor W. N. Everitt	317
	The thanks of the Society are due to the Carnegie Trust for the Universitiland for grants towards the cost of these papers.	ies of
