Fantastic New Titles in Logic Programming!

Forthcoming...

Computational Logic and Human Reasoning

How to be Artificially Intelligent

Robert Kowalski

\$100.00: Hb: 978-0-521-19482-2: 300 pp.

\$45.00: Pb: 978-0-521-12336-5

Kurt Gödel and the Foundations of Mathematics Horizons of Truth

Edited by Matthias Baaz,
Christos H. Papadimitriou,
Hilary Putnam,
Dana S. Scott,
Charles L. Harper

\$65.00: Hb: 978-0-521-76144-4: 352 pp.

Forcing with Random Variables and Proof Complexity

Jan Krajčiček

A model-theoretic approach to bounded arithmetic and propositional proof complexity.

London Mathematical Society Lecture Note Series

\$65.00: Pb: 978-0-521-15433-8: 264 pp.

Relational Mathematics

Gunther Schmidt

A modern, comprehensive overview providing an easy introduction for applied scientists who are not versed in mathematics.

Encyclopedia of Mathematics and its Applications

\$99.00: Hb: 978-0-521-76268-7: 582 pp.

Infinity

New Research Frontiers

Edited by Michael Heller,
W. Hugh Woodin

This interdisciplinary study of infinity explores the concept through the prism of mathematics and offers expansive investigations in areas beyond mathematical

boundaries to reflect the implications of infinity for human intellectual thought. More than a dozen world-renowned researchers offer an intellectual exchange among viewpoints, rather than displaying a static picture of accepted views on infinity.

\$99.00: Hb: 978-1-107-00387-3: 320 pp.

Algebraic Theories

A Categorical Introduction to General Algebra

J. Adámek, J. Rosický,
E. M. Vitale

Up-to-date categorical view of sets with extra algebraic structure (data types), with applications in mathematics and theoretical computer science.

Cambridge Tracts in Mathematics

\$80.00: Hb: 978-0-521-11922-1: 258 pp.

Pearls of Functional Algorithm Design

Richard Bird

A radical new approach to algorithm design, namely, design by calculation.

\$60.00: Hb: 978-0-521-51338-8: 290 pp.

Prices subject to change.

The Knowledge Engineering Review

Editors-in-Chief

Peter McBurney, *University of Liverpool, UK*

Simon Parsons, *Brooklyn College, City University of New York, USA*

The Knowledge Engineering Review is committed to the development of the field of artificial intelligence and the clarification and dissemination of its methods and concepts. *KER* publishes analyses – high quality surveys providing balanced but critical presentations of the primary concepts in an area; technical tutorials – detailed introductions to an area; application and country surveys commentaries and debates; book reviews; and a popular ‘from the journals’ section, providing the contents of current journals in theoretical and applied artificial intelligence.

Robotica

Editor-in-Chief

G. S. Chirikjian, *Johns Hopkins University, USA*

An Official Journal of the
International Federation of Robotics

Robotica provides an international forum for the multidisciplinary subject of robotics and encourages developments in this important field of automation with regard to industry, education and research. It covers the many aspects of robotics, including sensory perception, software, kinematics and dynamics involved in robot design, robot task planning and description, intelligibility of skilled motion, applications of robots in the service industries, world model representation, artificial intelligence, development of relevant educational courses, training methods, economic and cost problems and other items of theoretical and practical interest.

The Review of Symbolic Logic

Published for
The Association of Symbolic Logic

Coordinating Editor

Aldo Antonelli, *University of California, USA*

A joint venture between the Association of Symbolic Logic and Cambridge University Press, *The Review of Symbolic Logic* is designed to cultivate and promote exciting new fields of investigation on the borders of logic, philosophy, mathematics and computer science, including: philosophical logic and its applications; history and philosophy of logic; philosophy and methodology of mathematics. *The Review* provides a natural home for innovative work on these important and interconnected areas.

**CAMBRIDGE
UNIVERSITY PRESS**

SUBSCRIPTIONS

Theory and Practice of Logic Programming (ISSN 1471-0684), is published bi-monthly in January, March, May, July, September and November by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge, CB2 8RU, UK/Cambridge University Press, 32 Avenue of the Americas, New York, N.Y. 10013-2473. The subscription price (excluding VAT) of Volume 11, 2011 is £345 net (USA, Canada and Mexico US\$575), for institutions print and electronic or £300 net, (USA, Canada and Mexico US\$475) electronic only, single parts cost £60, \$100 plus postage. Discounted individual rates (print only) are £75, \$125. There is a preferential rate for members of The Association of Logic Programming and The Association of Computing Machinery – please enquire. Six parts form a volume. EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. Orders, which must be accompanied by payment, may be sent to any bookseller, subscription agent or to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge, CB2 8RU, or in the USA, Canada and Mexico to Cambridge University Press Journals Fulfillment Department, 100 Brook Hill Drive, West Nyack, New York 10994-2133. Prices include delivery by air where appropriate. Periodicals postage paid at New York, NY and at additional mailing offices. Japanese prices are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo, 156, Japan. Postmaster: send address changes in USA, Canada and Mexico to Journal of Theory and Practice of Logic Programming, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133. Claims for missing issues should be made immediately on receipt of the subsequent issues.

INSTRUCTIONS TO AUTHORS

Aims and scope

Theory and Practice of Logic Programming is an international journal that publishes refereed papers covering both the theory and the practice of logic programming. Among the topics covered are AI applications that use logic programming, logic programming methodologies, specification, analysis and verification of systems, inductive logic programming, multi-relational data mining, natural language processing, knowledge representation, nonmonotonic reasoning, semantic web reasoning, databases, implementations and architectures and constraint logic programming.

TPLP is the sole official journal of the Association for Logic Programming (<http://logicprogramming.org/>) and is offered to its members at a preferential rate. It is also endorsed by SPARC, the Scholarly Publishing & Academic Resources Coalition (URL: www.arl.org/sparc).

Submission of manuscripts

Electronic submissions: The preferred form of submission is to send two email messages, the first one with the information containing the title, the author(s), and the abstract of the submission, and the second one with a Postscript file. Both emails should be sent to the appropriate Area Editor with a copy to the Editor-in-Chief. If in doubt about the most appropriate area, contact the Editor-in-Chief.

Paper submissions: These are also acceptable, but their handling may be delayed (four copies to the appropriate Area Editor and one copy to the Editor-in-Chief).

The submitted manuscripts should not be published or simultaneously submitted to another journal or to a conference. Full versions of important conference papers are welcome. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to Cambridge University Press.

Book Reviews

Books for review, or suggestions for reviews, should be sent to the book reviews editor.

Technical notes

Technical notes should not exceed 5000 words in length, excluding tables, figures, and the bibliography. They are given quick turnaround and should be submitted, preferably electronically, to the Technical Notes editor. Submissions should include an abstract and a reasonable accurate word count for the paper (excluding tables and figures, and the bibliography).

Electronic manuscripts

The publisher encourages the submission of final manuscripts written in LaTeX which can be used for direct typesetting. Authors can download style files from the CUP anonymous ftp site in a packed or unpacked form. The packed form is available from:

<ftp://ftp.cambridge.org/pub/texarchive/journals/latex/tp-cls> and the unpacked files are in a directory /unpacked.

Layout

Manuscripts should begin with an abstract of not more than 300 words at the end of which are 4 or 5 keywords. Avoid footnotes whenever possible. Papers should conform to a good standard of English prose; please consult a style guide such as 'The Elements of Style' by Strunk and White, Macmillan, New York. Presenting Programs in one of the following two styles is encouraged: either with identifiers in italic and keywords in bold or entirely in a fixed-width teletype font. Do not begin a sentence with a symbol or identifier name.

Illustrations

Supply these as eps files as the publisher cannot use original TeX files of illustrations. A hardcopy printout needs to be supplied of each illustration.

References

The Harvard system of references should be used. See style files.

Proofreading

Be sure to submit papers in their final form. Typographical and factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for extensive changes to their paper. No page charge is made. The spelling policy of the journal is to follow author's American or British spelling as long as it is consistent within the paper.

Offprints

A free pdf of the published article will be supplied to each first named author. Papers offprints may be purchased upon request.

Please contact the editors for additional information or clarification of anything above.

COPYING

The journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA, 01923, USA. Organisations in the USA who are also registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of the US copyright law) subject to payment to CCC of the per-copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 1471-0684/11 \$16.00. Organisations authorised by the Copyright Licensing Agency may also copy material subject to the usual conditions.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorised to supply single copies of separate articles for private use only. For all other use, permission should be sought from Cambridge UK or the American Branch of Cambridge University Press.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

Theory and Practice of Logic Programming

VOLUME 11 PART 2–3 MARCH 2011

Contents

Regular papers

- 131 Introduction to the 24th international conference on logic programming special issue
MARIA GARCIA DE LA BANDA AND ENRICO PONTELLI
- 135 Abstract answer set solvers with backjumping and learning
YULIYA LIERLER
- 171 A general framework for equivalences in Answer-Set Programming by countermodels
in the logic of Here-and-There
MICHAEL FINK
- 203 Functional answer set programming
PEDRO CABALAR
- 235 On the implementation of the probabilistic logic programming language ProbLog
ANGELIKA KIMMIG, BART DEMOEN, LUC DE RAEDT, VÍTOR SANTOS COSTA
AND RICARDO ROCHA
- 263 Products of weighted logic programs
SHAY B. COHEN, ROBERT J. SIMMONS AND NOAH A. SMITH
- 297 Solving functional constraints by variable substitution
YUANLIN ZHANG AND ROLAND H. C. YAP
- 323 Detecting inconsistencies in large biological networks with answer set programming
MARTIN GEBSEER, TORSTEN SCHAUB, SVEN THIELE AND PHILIPPE VEBER
- 361 Reasoning support for risk prediction and prevention in independent living
A. MILEO, D. MERICO AND R. BISIANI
- 397 Automatic music composition using answer set programming
GEORG BOENN, MARTIN BRAIN, MARINA DE VOS AND JOHN FFITCH

Endorsed by  SPARC
