Coming soon...

The Ultimate Drainage System for just \$124⁹⁵!

Hide-Away™
twin hangers pop-up
when you need them
to keep bag level
on windy days.

Built-in Accu-Scale™
displays bag weight
to the nearest gram.

Solar-powered
hydrogen peroxide dispenser
helps prevent infection
in patient rooms
facing south.

Fill Alarm™
automatically emits
a shrill whistle when
bag needs changing.

Dial-a-Drip™
valve lets you
calibrate drip rates.
A surprise to the
patient; a convenience
for the nurse.

Flexible Armor-Tuf™
tubing rated to
withstand 1200 psi.

Steel fiber reinforced
seam guaranteed not to
tear for three years.

Micro processor LED
volume readout—
accurate to .001 ml.

Patient monograms
in 6 different
lettering styles.
Helps prevent confusion.
Good for patient's ego.

Available in
16 designer colors to
match any room decor.

Non-corroding
stainless steel exit port
with No-Drip™ shut-off valve.

Dandy time-release
detergent capsule
fights bacteria.
for 96 hours.

Who Needs It?

Why Pay for Frills?

Seamless already gives you what you really need.

All urinary drainage systems perform the same functions. So why pay a jacked-up price for frills when all you really need is a Seamless system that satisfies all these needs: (1) ensures closed system integrity; (2) minimizes the risks of infection; (3) ensures unobstructed catheter drainage; (4) bags empty easily, completely; (5) saves nursing time.

Seamless satisfies CDC recommendations

You won't pay for expensive "bells and whistles" with Seamless. Yet, you'll have everything you need to satisfy the CDC recommendations as outlined in "Guidelines for Prevention of Catheter-Associated Urinary Tract Infections and Guideline Ranking Scheme." Here's what the CDC has to say about all the so-called "improvements" manufacturers have been touting for years "...none have been shown to be effective in reducing the frequency of catheter-associated infections. Additionally, overly complex drainage systems can affect the ease of operation or more easily malfunction."*

Patient comfort and nursing convenience built in

Seamless offers what's needed to make patients more comfortable and the nurse's job easier. Vented drainage systems provide a free flow of urine for maximum drainage and ball-check anti-reflux valves help prevent retrograde contamination without obstructing flow.

Resealable sample ports let the nurse easily draw urine samples without violating closed system integrity. Large graduations are easy-to-read from a distance. And all Seamless bags are easy to hang and drain... quickly, completely. Latex bottom drain is packaged closed to insure the sterile integrity of the system.

A complete line to meet your needs

To save you money, Seamless offers variety so you can select the features you need only when you need them. Seamless also offers an extensive line of easy-to-use catheter trays for both indwelling and intermittent catheters, drainage bags, urine meters, and sterile irrigation systems.

All you give up is a high price

Why pay for frills? Seamless gives you everything you really need to ensure patient comfort, nursing convenience and protection against urinary tract infections.

FREE Infection Control File

We don't think a drainage system has to be complex to be effective. But what do the investigators have to say? To find out, ask for our Clinical Papers Collection... a complete selection of significant articles which evaluate urinary drainage systems... all in an easy-to-file binder. It's yours free just by calling 800-243-3030.

Seamless makes more sense... especially now.

SEAMLESS HOSPITAL PRODUCTS COMPANY, DIVISION OF DART INDUSTRIES INC, WALLINGFORD, CT 06492

Safe for Scopes

HEPATITIS

**Sporicidin,
diluted 1:16,
inactivates the
Hepatitis B
Virus in
10 minutes.**

*(Centers for Disease
Control, Phoenix, Arizona)*

Completely disinfects flexible and rigid scopes in 10 minutes with only 0.13% glutaraldehyde.

Safe to use . . . Does not cloud scope lenses nor harm metals, rubber and/or plastics. Does not stain or irritate the hands. No gloves are necessary for safety. Vapors do not irritate the eyes or nostrils.

Most effective . . . The only sterilizing solution which is fully effective against the tubercle bacillus, influenza, hepatitis and enteroviruses when diluted 1 in 16.

Stable . . . Fully effective for 30 days after activation.

Proven . . . The most effective cold sterilant and disinfectant ever registered by the E.P.A.

“Sporicidin, diluted 1 in 16, (0.13% glutaraldehyde), is effective for high level hospital disinfection . . .”

*Centers for Disease Control, Atlanta, GA
(Guidelines . . . revised August 1982)*

“This study has determined that although E.P.A. requirements for classifying a sterilizing agent were satisfied by Cidex, they were exceeded by Sporicidin:”

*Journal of Dental Research, Vol. 60, March 1981
(U.S. Army Institute of Dental Research, Wash., DC)*

“Sporicidin . . . was both more stable and more active against test spores than . . . Cidex and Cidex-7.”

Infection Control, 1(2): 90-93, 1980
