Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 18 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 24, 2021 (18 issues):
Internet/print package: £1390/\$2666 Americas only/€2227 EU only
Internet only: £1006/\$1909 Americas only/€1599 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and which are not, and will not be obliged to give reasons to prospective

advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to Cambridge University Press
1 Liberty Plaza
Floor 20, New York
NY 10006
USA

Notes for Authors are available from the publisher at the given address and can be found inside the back cover.

Offprints: The author (or main author) of an accepted paper will receive a free PDF of their paper. Additional offprints are available for a fee and must be ordered at proof stage. **No page charges are levied by this journal.**

Copyright: As of 1 January 2001 the copyright of all articles submitted to *Public Health Nutrition* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Editorial Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, Hammersmith, London, W6 7NJ, UK.

Disclaimer: The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from or is based upon sources believed by us to be reliable, but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk. This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Monitoring and surveillance

Advice to use infant formula and free samples are common in both urban and rural areas in China: a cross-sectional survey
Jia Li, Tuan T Nguyen, Yifan Duan, Roger Mathisen and Zhenyu Yang 1977

Colorectal cancer incidence in Australia before and after mandatory fortification of bread flour with folic acid
Jolieke C van der Pols, Peter Baade and Lauren B Spencer 1989

The potential of artificial intelligence in enhancing adult weight loss: a scoping review
Han Shi Jocelyn Chew, Wei How Daryl Ang and Ying Lau 1993

Assessment and methodology

Associations between taste preferences and chronic diseases: a population-based exploratory study in China
Hanqi Li, Peng Jia and Teng Fei 2021

Indexes to assess feeding practices of children under 2 years old: a systematic review
Priscila O Silva, Amanda O Lyrio, Simone S da Cruz, Leonor MP Santos and Muriel B Gubert 2033

A structured expert judgement elicitation approach: how can it inform sound intervention decision-making to support household food security?
Sue Kleve and Martine J Barons 2050

Nutritional status and body composition

Pellagra in South Africa from 1897 to 2019: a scoping review
Margaretha Viljoen, Priyesh Bipath and Cheryl Tosh 2062

Behavioural nutrition

Distance to supermarkets and dietary variety among Japanese older adults: examining the moderating role of grocery delivery services
Kazuhiro Harada, Kouhei Masumoto and Shuichi Okada 2077

Association between health literacy and dietary intake of sugar, fat and salt: a systematic review
Alessandra Buja, Giulia Grotto, Laura Montecchio, Elisa De Battisti, Milena Sperotto, Chiara Bertoncello, Silvia Cocchio, Tatjana Baldwin and Vincenzo Baldo 2085

'They deserve a treat': the nature and antecedents of parental licensing surrounding children's physical activity
Kwok Hong Law, James A Dimmock, Ashleigh L Thornton, Joanna C Nicholas, Gordon Ho, Daniel F Gucciardi, Kym J Guelfi and Ben Jackson 2098

The provision of recipes and single-use herb/spice packets to increase egg and protein intake in community-dwelling older adults: a randomised controlled trial
E van den Heuvel, JL Murphy and KM Appleton 2109

Adverse childhood experiences and household food insecurity among children aged 0–5 years in the USA
Phillip Baiden, Catherine A LaBrenz, Shawndaya Thrasher, Gladys Asiedua-Baiden and Boniface Harerimana 2123

The role of dwelling type on food expenditure: a cross-sectional analysis of the 2015–2016 Australian Household Expenditure Survey
Laura H Oostenbach, Karen E Lamb, Fiona Dangerfield, Maartje P Poelman, Stef Kremers and Lukar Thornton 2132

Eating behaviour styles in Irish teens: a cross-sectional study
Aisling N Daly, Elizabeth J O'Sullivan, Janette Walton, Breige A McNulty and John M Kearney 2144

Brain responses to watching food commercials compared with nonfood commercials: a meta-analysis on neuroimaging studies
Andy Wai Kan Yeung 2153

Nutritional epidemiology

Poor vitamin D status and the risk of maternal depression: a dose-response meta-analysis of observational studies
Quansheng Tan, Shuai Liu and Dajie Chen 2161

Prevalence of anaemia in Brazilian children in different epidemiological scenarios: an updated meta-analysis
Haroldo S Ferreira, Regina Coeli S Vieira, Aline Roberta S Livramento, Bruna Larine LFS Dourado, Girliany FA Silva and Monique Suiane C Calheiros 2171

High need for recovery from work and sleep problems are associated with workers' unhealthy dietary habits
Katri Hemio, Jaana Lindström, Markku Peltonen, Mikko Härmä, Katriina Viitasalo and Sampa Puttonen 2185

Dietary pattern changes in Fukushima residents after the Great East Japan Earthquake: the Fukushima Health Management Survey 2011–2013
Enbo Ma, Tetsuya Ohira, Hironori Nakano, Masaharu Maeda, Hirooki Yabe, Akira Sakai, Seiji Yasumura and Kenji Kamiya 2195

Association between retinol intake and hyperuricaemia in adults
Peipei Zhang, Jianping Sun, Yan Guo, Minghui Han, Fan Yang and Yongye Sun 2205

The association of animal and plant protein with successful ageing: a combined analysis of MEDIS and ATTICA epidemiological studies
Alexandra Foscolou, Elena Critselis, Stefanos Tyrovolas, Christina Chrysohoou, Nenad Naumovski, Labros S Sidossis, Loukianos Rallidis, Antonia-Leda Matalas and Demosthenes Panagiotakos 2215

Mexican households' food shopping patterns in 2015: analysis following nonessential food and sugary beverage taxes
Lilia S Pedraza, Barry M Popkin, Linda Adair, Whitney R Robinson and Lindsey Smith Taillie 2225

Economics and environment

Household and schooling rather than diet offset the adverse associations of height with school competence and emotional disturbance among Taiwanese girls
Lin-Yuan Huang, Meei-Shyuan Lee, Po-Huang Chiang, Yi-Chen Huang and Mark L Wahlqvist 2238

Community nutrition

Prevalence and regional variations of coexistence of child stunting and maternal overweight or obesity in Myanmar
Seo Ah Hong 2248

Prevalence of stunting and obesity in Ecuador: a systematic review
Tahar Hajri, Viviana Angamarca-Armijos and Luis Caceres 2259

Perceptions of eating practices and physical activity among Malaysian adolescents in secondary schools: a qualitative study with multi-stakeholders
Shooka Mohammadi, Tin Tin Su, Angeliki Papadaki, Muhammad Yazid Jalaludin, Maznah Dahlui, Mohd Nahar Azmi Mohamed, Russell Jago, Zoi Toumpakari, Laura Johnson and Hazreen Abdul Majid 2273

Barriers and enablers of breast-feeding protection and support after the 2017 earthquakes in Mexico
Mireya Vilar-Compte, Cecilia Pérez Navarro, Saraya Burrola-Méndez, Matthias Sachse-Aguilera and Paula Veliz 2286

Interventions

Effect of culinary education curriculum on Mediterranean diet adherence and food cost savings in families: a randomised controlled trial
Alexander C Razavi, Alexander Sapin, Dominique J Monlezun, Isabella G McCormack, Anna Latoff, Kathrine Pedroza, Colleen McCullough, Leah Sarris, Emily Schlag, Amber Dyer and Timothy S Harlan 2297

The taste of biodiversity: science and sensory education with different varieties of a vegetable to promote acceptance among primary school children
Lisa Afonso, Sara Aboim, Patricia Pessoa and Xana Sá-Pinto 2304

Opportunities for intervention and innovation in school food within UK schools
JV Woodside, A Adamson, S Spence, T Baker and MC McKinley on behalf of the GENIUS (Generating Excellent Nutrition In UK Schools) network 2313

Role of social ecological model level on young Pacific children's sugar-sweetened beverage and water intakes: Children's Healthy Living intervention
Ariella R Korn, Jean Butel, James Davis, Ashley B Yamanaka, Patricia Coleman, Lynne R Wilkens, Christina D Economos and Rachel Novotny 2318

Promoting water consumption among children: a three-arm cluster randomised controlled trial testing a social network intervention
Crystal R Smit, Rebecca NH de Leeuw, Kirsten E Bevelander, William J Burk, Laura Buijs, Thabo J van Woudenberg and Moniek Buijzen 2324

Public policies

Sodium and salt content of Portuguese rolls produced in a city of southern Brazil: a comparison of laboratory analysis, food labelling and nutrition standards
GL Bernardo, TB Inoue, DA Höfelmann, CH Feldman and MB Veiros 2337

Availability and affordability of healthy and less healthy food in Nova Scotia: where you shop may affect the availability and price of healthy food
Manfred Egbe, Amy Grant, Madeleine Waddington, Mikiko Terashima, Rita MacAulay, Christine Johnson, Ksenia Kholina and Patricia L Williams 2345

Public acceptability of a sugar-sweetened beverage tax and its associated factors in the Netherlands
Michelle Eykelboom, Maartje M van Stralen, Margreet R Olfhof, Carry M Renders and Ingrid HM Steenhuis on behalf of the PEN Consortium 2354

Cost-effectiveness analysis of Baby-Friendly Hospital Initiative in promotion of breast-feeding and reduction of late neonatal infant mortality in Brazil
Osvaldinete Lopes de Oliveira Silva, Marina Ferreira Rea, Flávia Mori Sarti and Gabriela Buccini 2365
