

THE
QUARTERLY JOURNAL
OF
MICROSCOPICAL SCIENCE

EDITOR:
EDWIN S. GOODRICH, M.A., F.R.S.

CONTENTS OF No. 282—NEW SERIES.
Part II., Volume 71, August, 1927.

MEMOIRS:

- Further Notes on the Gametogenesis and Fertilization of Sponges. By
Prof. J. BRONTÉ GATENBY, D.Phil.(Oxon.). (With Plates 19–21.)
- Studies on some Amoebæ from the Termite *Mirotermes*, with Notes on
some other Protozoa from the Termitidæ. By HAROLD KIRBY,
jun. (With Plates 22–6.)
- The Origin of Dust-Cells in the Lung. By H. M. CARLETON, D.Phil.
(Oxon.). (With Plate 27.)
- The Development of the Nucleus of *Amoeba proteus*. Pallas (Leidy)
(=*Chaos diffluens* (Schæffer)). By MONICA TAYLOR, S.N.D. (With
Plate 28 and 2 Text Figures.)
- The Early Development of the Chondrocranium of *Salmo fario*. By
G. R. de Beer, M.A., B.Sc., F.L.S. (With 52 Text figures.)
- The Development of the Larval and Adult Mid-gut of *Calandra oryzae*
(Linn.): The Rice Weevil. By K. Mansour, B.Sc. (With Plates
29–33 and 1 Text Figure.)

Subscription Price per Volume, £3 3s. net.

Single Parts, £1 1s. net.

AMEN HOUSE, LONDON, E.C. 4.

THE BRITISH JOURNAL OF EXPERIMENTAL BIOLOGY

Edited by J. GRAY

WITH THE ASSISTANCE OF

J. BARCROFT	J. B. S. HALDANE	C. F. A. PANTIN
A. J. CLARK	L. T. HOGBEN	W. H. PEARSALL
F. A. E. CREW	J. S. HUXLEY	J. T. SAUNDERS

Subscription per volume 40s. net

Price per number 12s. 6d. net.

Volume IV, No. 4. June, 1927.

CONTENTS

- FALK, K. G., and LORBERBLATT, I. A Chemical Study of the Manoilov Test for the Differentiation of the Sexes.
- GRAY, J. The Mechanism of Cell-division. III. The Relation between Cell-division and Growth in Segmenting Eggs.
- PATRICK, D. M. Some Effects produced by the Hooding of Birds.
- RITCHIE, A. D. Lactic Acid in Fish and Crustacean Muscle.
- CUNNINGHAM, J. T. Experiments on Artificial Cryptorchidism and Ligature of the Vas Deferens in Mammals.
- WATSON, A. The Relationship of the Cortex Suprarenalis and Testes throughout Life in the Rat.
- HAMMOND, J. Uterine Grafts.
- MARRIAN, G. F. A Note on Hæmerythrin.
- JENKIN, P. M. The Relation of *Spirostomum ambiguum* to the Hydrogen Ion Concentration (Alkaline Range).
- CARPENTER, K. E. The Lethal Action of Soluble Metallic Salts on Fishes.
- Index to Subjects.
- Index to Authors.

Volume V, No. 1. September, 1927.

CONTENTS

- UHLENHUTH, EDUARD, and SCHWARTZBACH, SAUL. The Morphology and Physiology of the Salamander Thyroid Gland.
- II. The Anterior Lobe of the Hypophysis as a Control Mechanism of the Function of the Thyroid Gland.
- NEEDHAM, JOSEPH. The Energy-sources in Ontogenesis.
- V. The Carbohydrate Metabolism of the Developing Avian Egg.
- VI. The Relation between Combustion, Constitution, and Concentration in the Developing Avian Embryo.
- NEEDHAM, JOSEPH. The Developmental Efficiency of the Avian Embryo.
- HOGBEN, LANCELOT, T., and PINHEY, KATHLEEN F. Some Observations on the Hæocyantin of *Limulus*.
- ROBERTSON, J. ARMITAGE. Galvanotropic Reactions of *Polycelis nigra* in Relation to Inherent Electrical Polarity.
- BĚLEHRÁDEK, J., and HUXLEY, J. S. The Effects of Pituitrin and of Narcosis on Water-regulation in Larval and Metamorphosed *Amblystoma*.

Volume V, No. 2. December, 1927.

CONTENTS

- CHAUDHURI, A. C. A Study of Arginase Content in the Fowl with special reference to Sex.
- GRAY, J. The Mechanism of Cell-division.
- IV. The Effect of Gravity on the Eggs of *Echinus*.
- FORD, E. B., and HUXLEY, J. S. Mendelian Genes and Rates of Development in *Gammarus chevreuxi*.
- HENDERSON, JEAN T. A Note on the Effect of Temperature on the Cardiac Rhythm of certain Schizopods.
- DELFT, E. M., RITSON, K., and WESTBROOK, A. The Effect on Plants of Radiations from a Quartz Mercury Vapour Lamp.
- CUTLER, WARD D., and CRUMP, L. M. The Qualitative and Quantitative Effects of Food on the Growth of a soil amœba (*Hartmanella hyalina*).
- SPAUL, E. A. The Effect of Temperature upon the Diffusion and Autolysis of the Metamorphic and Pigmentation Principles of the Pituitary Gland.

OBJECTS
OF THE
Marine Biological Association
OF THE UNITED KINGDOM.

THE ASSOCIATION was founded at a Meeting called for the purpose in March, 1884, and held in the Rooms of the Royal Society of London.

The late Professor HUXLEY, at that time President of the Royal Society, took the chair, and amongst the speakers in support of the project were the late Duke of ARGYLL, the late Sir LYON PLAYFAIR, the late Lord AVEBURY, the late Sir JOSEPH HOOKER, the late Dr. CARPENTER, the late Dr. GÜNTHER, the late Lord DALHOUSIE, the late Professor MOSELEY, the late Mr. ROMANES, and Sir E. RAY LANKESTER.

The Association owes its existence and its present satisfactory condition to a combination of scientific naturalists, and of gentlemen who, from philanthropic or practical reasons, are specially interested in the great sea fisheries of the United Kingdom. It is universally admitted that our knowledge of the habits and conditions of life of sea fishes is very small, and insufficient to enable either the practical fisherman or the Legislature to take measures calculated to ensure to the country the greatest return from the "harvest of the sea." Naturalists are, on the other hand, anxious to push further our knowledge of marine life and its conditions. Hence the Association has erected at Plymouth a thoroughly efficient Laboratory, where naturalists may study the history of marine animals and plants in general, and where researches on food-fishes and molluscs may be carried out with the best appliances.

The Laboratory and its fittings were completed in June, 1888, at a cost of some £12,000, and from that time until 1926 a sum of over £6,500 has been spent on additional buildings. Throughout this period investigations, practical and scientific, have been constantly pursued at Plymouth. Practical investigations upon matters connected with sea-fishing are carried on under the direction of the Council; in addition, naturalists from England and from abroad have come to the Laboratory, to carry on their own independent researches, and have made valuable additions to zoological and botanical science, at the expense of a small rent for the use of a working table in the Laboratory and other appliances. The number of naturalists who can be employed by the Association in special investigations on fishery questions, and definitely retained for the purpose of carrying on those researches throughout the year, must depend on the funds subscribed by private individuals and public bodies for the purpose. The first charges on the revenue of the Association are the working of the seawater circulation in the tanks, stocking the tanks with fish and feeding the latter, the payment of servants and fishermen, the maintenance of a research steamer and other collecting boats, and the salaries of the Resident Director and Staff. At the commencement of this number will be found the names of the gentlemen on the Staff.

The purpose of the Association is to aid at the same time both science and industry. It is national in character and constitution, and its affairs are conducted by a representative Council, by an Honorary Secretary and an Honorary Treasurer, without any charge upon its funds, so that the whole of the subscriptions and donations received are devoted absolutely to the support of the Laboratory and the prosecution of researches by aid of its appliances. The reader is referred to page 4 of the Cover for information as to membership of the Association.

CONTENTS OF NEW SERIES, Vol. XV., No. 1.

1.	THE BRITISH EDWARDSIDE. By OSKAR CARLGRÉN and T. A. STEPHENSON. <i>With 18 Figures in the Text</i>	18
2.	ON THE REARING AND BREEDING OF GAMMARUS IN LABORATORY CONDITIONS. By E. W. SEXTON. <i>With 1 Figure in the Text</i>	19
3.	THE LIFE-HISTORY OF <i>Thysanoessa raschii</i> . By RODERICK MACDONALD. <i>With 7 Plates</i>	20
4.	THE VERTICAL DISTRIBUTION OF MARINE MACROPLANKTON. VI. FURTHER OBSERVATIONS ON DIURNAL CHANGES. By F. S. RUSSELL. <i>With 7 Figures in the Text</i>	21
5.	A NET FOR CATCHING PLANKTON NEAR THE BOTTOM. By F. S. RUSSELL. <i>With 2 Figures in the Text</i>	22
6.	STUDIES OF THE PLYMOUTH BRACHYURA. II. THE LARVAL STAGES OF EBALLIA AND PINNOTHERES. By M. V. LEBOURN. <i>With 2 Plates and 1 Figure in the Text</i>	23
7.	THE NAUPLIUS LARVA OF <i>Anelasma squalicola</i> (LOVÉN). By W. E. FROST. <i>With 4 Figures in the Text</i>	24
8.	THE POST-LARVAL DEVELOPMENT OF <i>Loimia medusa</i> SAV. By D. P. WILSON. <i>With 2 Plates and 7 Figures in the Text</i>	25
9.	REGENERATION IN THE POLYCHET <i>Chaetopterus variopedatus</i> . By N. J. BERRILL. <i>With 4 Figures in the Text</i>	26
10.	THE IDENTIFICATION AND VALIDITY OF CERTAIN SPECIES OF ASCIDIANS. By N. J. BERRILL. <i>With 6 Figures in the Text</i>	27
11.	THE ASCIDIAN FAUNA OF THE PLYMOUTH AREA. By N. J. BERRILL	28
12.	NITRATE IN THE SEA. II. By H. W. HARVEY. <i>With 3 Figures in the Text</i>	29
13.	SEASONAL VARIATIONS IN THE PHOSPHATE AND SILICATE CONTENT OF SEA WATER DURING 1926 AND 1927 IN RELATION TO THE PHYTOPLANKTON CROP. By W. R. G. ATKINS	30
14.	THE RELATIONSHIP BETWEEN STATE OF MATURITY AND CHEMICAL COMPOSITION OF THE WHITING, <i>Gadus merlangus</i> L. By H. O. BULL. <i>With 2 Figures in the Text</i>	31
15.	THE PRESERVATION OF FISHING NETS BY TREATMENT WITH COPPER SOAPS AND OTHER SUBSTANCES. By W. R. G. ATKINS	32
16.	HERRING INVESTIGATIONS AT PLYMOUTH. I. METHODS OF COLLECTION AND TREATMENT OF DATA. By E. FORD. <i>With 5 Figures in the Text</i>	33
17.	HERRING INVESTIGATIONS AT PLYMOUTH. II. THE AVERAGE NUMBER OF VERTEBRÆ FOR HERRINGS FROM THE ENGLISH CHANNEL AND SOUTH-EAST OF IRELAND. By E. FORD. <i>With a Chart and 1 Figure in the Text</i>	34
18.	HERRING INVESTIGATIONS AT PLYMOUTH. III. THE PLYMOUTH WINTER FISHERY DURING THE SEASONS 1924-25, 1925-26, AND 1926-27. By E. FORD. <i>With 6 Figures in the Text</i>	35
19.	HERRING INVESTIGATIONS AT PLYMOUTH. IV. THE GROWTH OF YOUNG HERRINGS IN THE NEIGHBOURHOOD OF PLYMOUTH. By E. FORD. <i>With 1 Chart and 4 Figures in the Text</i>	36
20.	THE PHOTOSYNTHESIS OF DIATOM CULTURES IN THE SEA. By S. M. MARSHALL and A. P. ORR. <i>With 24 Figures in the Text</i>	37
21.	ARTHUR EVERETT SHIPLEY	38
22.	WALTER CAMPBELL DE MORGAN	39

NOTICE.

The Council of the Marine Biological Association wish it to be understood that they do not accept responsibility for statements published in this Journal excepting when those statements are contained in an official report of the Council.

TERMS OF MEMBERSHIP.

	£	s.	d.
Annual Members per annum	1	1	0
Life Members Composition Fee	15	15	0
Founders	100	0	0
Governors	500	0	0

Members of the Association have the following rights and privileges: they elect annually the Officers and Council; they receive the Journal of the Association free by post; they are admitted to view the Laboratory at Plymouth, and may introduce friends with them; they have the first claim to rent a place in the Laboratory for research, with use of tanks, boats, &c.; and have access to the books in the Library at Plymouth.

All correspondence should be addressed to the Director, The Laboratory, Plymouth.
