

CURATOR OF VERTEBRATE PALEONTOLOGY/
ASSISTANT PROFESSOR OF GEOLOGY AND GEOPHYSICS

The Utah Museum of Natural History and Department of Geology & Geophysics at the University of Utah invite applications for a tenure-track joint position as Curator of Vertebrate Paleontology and Assistant Professor of Geology & Geophysics beginning 1 July 2008. Complete job description and application instructions can be found at website: <http://www.umnh.utah.edu/pageview.aspx?menu=4257&id=16046>

The University of Utah is an equal opportunity, affirmative action employer and provides reasonable accommodation to the known disabilities of applicants and employees.

What Bugged the Dinosaurs?

Insects, Disease, and Death in the Cretaceous

George Poinar, Jr. & Roberta Poinar

Millions of years ago in the Cretaceous period, the mighty Tyrannosaurus rex—with its dagger-like teeth for tearing its prey to ribbons—was undoubtedly the fiercest carnivore to roam the Earth. Yet as *What Bugged the Dinosaurs?* reveals, T. rex was not the only killer. George and Roberta Poinar show how insects—from biting sand flies to disease-causing parasites—dominated life on the planet and played a significant role in the life and death of the dinosaurs. A scientific adventure story from the authors whose research inspired *Jurassic Park*, *What Bugged the Dinosaurs?* offers compelling evidence of how insects directly and indirectly contributed to the dinosaurs' demise.

JOURNAL POLICY

PALEOBIOLOGY publishes original contributions of any length (but normally 10–50 manuscript pages) dealing with any aspect of biological paleontology. The emphasis should be upon biological or paleobiological processes and patterns. These include speciation, extinction, development of individuals and of colonies, natural selection, evolution, and patterns of variation, abundance, and distribution in space and time. Papers concerning research on recent organisms and systems are appropriate if they are of particular interest to paleontologists. Taxonomic papers are welcome if they have significant and broad applications. All manuscripts are to be in English. A guide to manuscript preparation is published in the first issue of each volume. Submission of a manuscript to PALEOBIOLOGY implies that it is not simultaneously being considered for publication by another journal.

PALEOBIOLOGY also welcomes submissions for *Matters of the Record*, which features up-to-date discussions of new discoveries, reviews of recent conceptual advances, and brief syntheses of important topics. In most cases, submissions will be limited to 4–6 manuscript pages with sufficient references. All submissions will be vetted for appropriateness and peer-reviewed prior to acceptance. Inquiries, proposals, and submissions should be directed to the editors.

MANUSCRIPT ACCEPTANCE POLICY

It is understood that, in return for publication, the journal has the nonexclusive right to publish the contribution and the continuing right, without limit, to include the contribution as part of any reprinting of the issue and/or volume of the journal in which the contribution first appeared by any means and in any format, including computer-assisted storage and readout, in which the issue and/or volume may be reproduced by the publisher or by its licensed agencies.

The appearance of the code at the bottom of the first page of each contribution in this journal indicates the copyright owner's consent that copies of the article (or of articles in back issues) may be made for personal use. For copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, this consent is given on the condition that the copier pay the stated per-copy fee through the Copyright Clearance Center, Inc. (P.O. Box 765, Schenectady, New York 12301). This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, and similar.
