

Information for Conference Organisers

The Animal Consortium together with Cambridge University Press offers conference organisers a package that enables publication of high-quality conference, symposium and workshop proceedings.

Conference organizers interested in publishing their proceedings should send a proposal to astleger-honeybone@cambridge.org

Cledwyn Thomas. Series Editor-in-Chief
Advances in Animal Biosciences

Precision agriculture is now more 'main stream' in agriculture and is playing a key role as the industry comes to terms with the environment, market forces, quality requirements, traceability, vehicle guidance and crop management. Research continues to be necessary and needs to be reported and disseminated to a wide audience. These proceedings contain reviewed papers presented at the 11th European Conference on Precision Agriculture, held at the McIntyre Conference Centre, Edinburgh, UK. The papers reflect the wide range of disciplines that impinge on precision agriculture - agri-technology, crop science, soil science, agronomy, information technology, decision support, remote sensing and others.

The broad range of research topics reported will be a valuable resource for researchers, advisors, teachers and professionals in agriculture.

The conference, which comes under the auspices of the International Society of Precision Agriculture, was held in association with Scotland's Rural College, Newcastle University, The James Hutton Institute, Soil Essentials Ltd and the British Society of Animal Science.
