# Journal of MATERIALS RESEARCH

**JOURNAL OF MATERIALS RESEARCH (JMR)** is an interdisciplinary journal serving the materials research community through publication of original research articles and invited reviews encompassing the synthesis, processing, characterization, properties, and theoretical description of materials.

**JMR** publishes new research that demonstrates a significant impact or advance of scientific understanding of interest to the materials research community. Engineering studies and applications to commercial products are beyond the scope of *JMR* and should be submitted elsewhere. Manuscripts that report data without giving an analysis, interpretation, or discussion are only acceptable if the data are sufficiently important that publication is expected to lead to significant new studies or advancements in science or technology.

**Manuscripts** must be submitted to the *Journal of Materials Research* electronically via ScholarOne manuscripts, at the following website address: <http://mc.manuscriptcentral.com/jmr>. Electronic submission expedites the review process and also allows authors to track the status of their manuscripts at any time. Complete instructions are available on the ScholarOne site and authors will be prompted to provide all necessary information.

Manuscripts must be prepared in English, using a word processing program, formatted to fit 8½ x 11 in. paper, and saved as .doc, .pdf, .rtf, or .ps files. Separate graphics files (.eps and .tif) must be uploaded for each figure. Authors may also upload .xls or .ppt supplemental files as part of the manuscript submission process. All of these files will be converted to .pdf format. Detailed instructions are available on the submission web site. During submission, authors must enter all coauthor names and e-mail addresses. Manuscripts will not be considered for peer review until this information is provided. Authors must also enter manuscript keywords using the *JMR* keyword list (located on the submission web site). Authors who are not fluent in English must have their manuscript edited for correct English grammar and sentence structure before submission.

Authors are expected to follow the conventional writing, notation, and illustration style prescribed in *Scientific Style and Format: the CSE Manual for Authors, Editors and Publishers, 7th edition, 2006*. Authors should also study the form and style of printed material in this journal. SI units should be used. Authors should use an identical format for their names in all publications to facilitate use of citations and author indexes.

Manuscripts are accepted with the understanding that they represent original research, except for review articles, and that they have not been copyrighted, published, or submitted for publication elsewhere. Authors submitting manuscripts to *JMR* who have related material under consideration or in press elsewhere should send a copy of the related material to *JMR* at the time of submission. While their manuscripts are under consideration at *JMR*, authors must disclose any such related material. To expedite the review process, authors may provide names and contact information for up to four possible reviewers.

**Articles** are original research reports that include complete, detailed, self-contained descriptions of research efforts. All articles must contain an abstract and section headings.

**Commentaries and Reviews:** *Journal of Materials Research* occasionally publishes commentaries on topics of current interest or reviews of the literature in a given area. If an author proposes a review, the title, abstract, and a brief outline should be submitted to the Editorial Office via e-mail for prior consultation on the appropriateness of the topic.

**Color policy:** It is not necessary for authors to indicate that a figure should be displayed in color online. *JMR* will assume that any author who submits figures in color wants and agrees to their being produced in color online. Figures may be printed in color at the author's request for an additional charge. Color figures must be submitted before the paper is accepted for publication, and cannot be received later in the process. Authors cannot submit two versions of the same figure, one for color and one for black and white; only one version can be submitted. Authors need to carefully consider the following when submitting figures in color that will

be published in color online only: 1) The colors chosen must reproduce effectively and the colors should be distinguishable when printed in black and white; 2) The descriptions of figures in text and captions must be sufficiently clear for both online and print copy. When submitting figures to be in color online only, authors should include the phrase <<color online>> in the figure captions. This is the author's responsibility. Authors will see these color figures when viewing their author page proofs on screen. Authors should always print their page proofs in black and white to see how they will appear in print. Authors will NOT be allowed to submit color figures to replace black and white figures in the page proof stage. To maximize the probability that figures will be published in color online and also print as good quality black and white or grayscale graphics, authors are encouraged to follow these figure submission guidelines: 1) Submit a color graphic in Tagged Image File Format (.tif); 2) Submit color graphics with a resolution of at least 300 dpi (600 dpi if there is text or line art in the figure); 3) Submit color graphics in CMYK format; 4) Submit figures sized to fit the actual column or page width of the journal so that reduction or enlargement is not necessary; 5) Submit multipart figures in one single electronic file.

## ADVANCES IN THE SYNTHESIS, CHARACTERIZATION, AND PROPERTIES OF BULK POROUS MATERIALS

2187–2190 **Porous Materials: Less is More**

Paolo Colombo, David C. Dunand,  
Vipin Kumar

## INVITED GENERAL REVIEW

2191–2201 **Cellular solids studied by x-ray tomography and finite element modeling – a review**

Clémence Petit, Sylvain Meille,  
Eric Maire

## POROUS CERAMICS

### INVITED REVIEW

2202–2219 **Ice-templating, freeze casting: Beyond materials processing**

Sylvain Deville

### INVITED PAPERS

2220–2233 **Functionalization of open-celled foams by homogeneous slurry based coatings**

Daniela Boettge, Gisela Standke,  
Alexander Fuessel, Jörg Adler

2234–2242 **Functionalization of carbon-bonded alumina filters through the application of active oxide coatings for steel melt filtration**

By Marcus Emmel,  
Christos G. Aneziris

2243–2252 **SiOC ceramics with ordered porosity by 3D-printing of a preceramic polymer**

Andrea Zocca, Cynthia M. Gomes,  
Andreas Staude, Enrico Bernardo,  
Jens Günster, Paolo Colombo

2253–2259 **Chemical durability of hierarchically porous silicalite-I membrane substrates in aqueous media**

Neda Keshavarzi, Farid Akhtar,  
Lennart Bergström

2260–2272 **Thermal conductivity of porous materials**

David S. Smith, Arnaud Alzina,  
Julie Bourret, Benoît Nait-Ali,  
Fabienne Pennec,  
Nicolas Tessier-Doyen,  
Kodai Otsu, Hideaki Matsubara,  
Pierre Elser, Urs T. Gonzenbach

2273–2280 **Heteroporous heterogeneous ceramics for reusable thermal protection systems**

Alberto Ortona, Claudio Badini,  
Volker Liedtke, Christian Wilhelmi,  
Claudio D'Angelo, Daniele Gaia,  
Wolfgang Fischer

2281–2287 **Mechanical properties of highly porous alumina foams**

Benedikt Simon Michael Seeber,  
Urs Thomas Gonzenbach,  
Ludwig Julius Gauckler

### ARTICLES

2288–2299 **The influence of the measurement parameters on the crushing strength of reticulated ceramic foams**

Claudia Voigt, Johannes Storm,  
Martin Abendroth,  
Christos G. Aneziris,  
Meinhard Kuna, Jana Hubáková

2300–2307 **Nano and micro scale analysis of dentin with in vitro and high speed atomic force microscopy**

Yasemin Kutes, Varun Vyas,  
Bryan D. Huey

2308–2315 **Impact of high porosity on thermal transport in UO<sub>2</sub> nuclear fuel**

Di Yun, Marius Stan

(Continued)

- 2316–2324 **Seebeck coefficient of graded porous composites**  
Roland H. Tarkhanyan,  
Dimitris G. Niarchos
- 2325–2331 **Adsorption of Ni<sup>2+</sup> on aminofunctionalized mesoporous silica templated by an anionic surfactant route**  
Shiyu Hao, Jie Hou
- 2332–2338 **Effects of surface properties of red mud on interactions with *Escherichia coli***  
Wangshu Tong, Yihe Zhang,  
Zhichao Zhen, Li Yu, Qi An,  
Zhilei Zhang, Fengzhu Lv,  
Paul K. Chu

## POROUS POLYMERS

### INVITED REVIEW

- 2339–2350 **Characterization and properties of electrospun thermoplastic polyurethane blend fibers: Effect of solution rheological properties on fiber formation**  
Hao-Yang Mi, Xin Jing,  
Brianna R. Jacques,  
Lih-Sheng Turng,  
Xiang-Fang Peng

### INVITED PAPERS

- 2351–2365 **Homogeneous nanocellular foams from styrenic-acrylic polymer blends**  
Stéphane Costeux,  
Shana P. Bunker, Hyun K. Jeon
- 2366–2373 **Production of bulk solid-state PEI nanofoams using supercritical CO<sub>2</sub>**  
Brian Aher, Nathan M. Olson,  
Vipin Kumar
- 2374–2379 **Effect of intrinsic viscosity on solid-state microcellular foaming of polyethylene terephthalate**  
Huimin Guo, Krishna Nadella,  
Vipin Kumar
- 2380–2393 **The effect of polymer hardness, pore size, and porosity on the performance of thermoplastic polyurethane-based chemical mechanical polishing pads**  
Abaneshwar Prasad,  
George Fotou, Shoutian Li

### ARTICLES

- 2394–2400 **Foam extrusion behavior, morphology, and physical foam properties of organic cellulose ester**  
Stefan Zepnik, Sven Hendriks,  
Stephan Kabasci,  
Hans-Joachim Radusch
- 2401–2408 **A facile in situ morphological characterization of smart genipin-crosslinked chitosan–poly(vinyl pyrrolidone) hydrogels**  
Glenn A. Hurst,  
Katarina Novakovic
- 2409–2414 **Sound absorption properties of porous composites fabricated by a hydrogel templating technique**
