*April 1961*

# CAMBRIDGE PHILOSOPHICAL SOCIETY

FOUNDED 1819; ROYAL CHARTER 1832

Session 1960–1961

*President:* E. J. H. CORNER

*Vice-Presidents:* J. D. BOYD, F. P. WHITE, F. P. BOWDEN

*Treasurer:* R. C. EVANS

*Secretaries:* (Mathematical) J. H. WILLIAMSON

(Physical) T. E. FABER

(Biological) S. SMITH

The publications of the Society consist of the *Proceedings* and of the *Biological Reviews*. The publication of *Transactions* was suspended at the end of Volume XXII.

Orders should be sent to: THE MANAGER, CAMBRIDGE UNIVERSITY PRESS, BENTLEY HOUSE, 200 EUSTON ROAD, LONDON, N.W.1. Enquiries from the U.S.A. should be addressed to the Cambridge University Press, American Branch, 32 East 57th Street, New York 22, U.S.A.

For the purchase of early parts of the *Transactions*, *Proceedings* and *Biological Reviews* application should be made to the Secretaries. All parts of the *Proceedings* and *Biological Reviews* are available, and prices of sets or single parts will be quoted on application.

*Fellows and Associates of the Society are particularly requested to inform the Secretaries of any change of postal address, and to send their subscriptions to the Treasurer, CAMBRIDGE PHILOSOPHICAL SOCIETY, FREE SCHOOL LANE, CAMBRIDGE.*

All correspondence regarding library exchanges and Fellows' copies should be addressed to the Secretaries at the Society's office.

## PROCEEDINGS of the CAMBRIDGE PHILOSOPHICAL SOCIETY

*edited by*

J. H. WILLIAMSON

*in consultation with*

P. C. CLEMMOW

T. E. FABER

E. R. LAPWOOD

F. SMITHIES

F. URSELL

A. M. WALKER

E. C. ZEEMAN

1. Four parts of the *Proceedings* are issued each year.
2. Communications for the *Proceedings* should be sent to *The Librarian, Cambridge Philosophical Society, Free School Lane, Cambridge*. Papers by Fellows and Associates of the Society should be communicated directly by the author. Other papers must be communicated by a Fellow, who in doing so should give his opinion on the suitability of the paper for publication.
3. Papers occupying more than twenty pages of print can only very rarely be accepted.
4. It is recommended that each paper be prefaced by a short abstract. Copies of a *Guide for the Preparation of Synopses*, prepared by the Abstracting Services Consultative Committee and issued by the Royal Society, may be obtained from the Librarian.
5. Drawings for illustration and diagrams should be on a large scale and on smooth white Bristol board in Indian ink.
6. References should be listed at the end of each paper. World List abbreviations for titles of journals should be used and first and last page numbers given where relevant.
7. Authors are particularly requested to prepare their manuscripts in a form suitable for printing, with adequate margins. A pamphlet on the preparation of papers may be obtained from the Librarian. If a large number of corrections are required in the proofs, the Council reserves the right to make a charge towards the cost.
8. Authors may receive, on request, fifty offprints of a paper in the *Proceedings* without charge.

**The  
Institution  
of  
Electrical  
Engineers**

**COVENT GARDEN 1871**

**THE JOURNAL**

The monthly JOURNAL goes to all members of The Institution, to non-members and subscribers. It contains authoritative articles dealing with all realms of electrical engineering. It also presents a synoptic review of Institution events and serves as the main channel of communication with the professional electrical engineer. Circulation 45,691.

**THE PROCEEDINGS**

**Part 'A'.** Contains original academic papers describing new work in the heavy-current sphere of electrical engineering, covering power generation—transmission—distribution—installation; as well as reviews of progress. Published bimonthly (February, April, June, August, October and December) with a wholly subscribed circulation of 17,800.

**Part 'B'.** Contains original academic papers describing new work in the light-current sphere of electrical engineering, covering telecommunication—radio engineering—electronics; as well as reviews of progress. Published bimonthly (January, March, May, July, September and November) with a wholly subscribed circulation of 14,900.

# The Rotation of the Earth

W. H. MUNK & G. J. F. MACDONALD

A unified treatment of the rotation of the Earth. The authors give an account of certain observed irregularities in the Earth's rotation, caused by events on and within the Earth, and providing a means of studying a number of geophysical problems. *Cambridge Monographs on Mechanics and Applied Mathematics*. 70s. net

# Fourier Transforms

R. R. GOLDBERG

A clear exposition of the elementary theory of Fourier transforms arranged to give easy access to the recently developed abstract theory of Fourier transforms on a locally compact group. *Cambridge Tracts in Mathematics and Mathematical Physics*, 52. 21s. net
