

*Tables* should be as simple and as few as possible. When constructing tables, it would be helpful if authors would take into account the size and shape of the pages of *Animal Production*.

*Summary*: Every article should have a short summary (not more than 250 words) complete in itself and understandable without reference to the paper. *The summary will be printed at the beginning of the paper.*

*References*: Only papers closely related to the author's work should be referred to; exhaustive lists should be avoided. Bibliographical details should be in the following order: author's name, initials, year, title of paper, title of journal (abbreviated according to the World List of Scientific Periodicals), volume of journal, first and last page of paper. References should be listed in alphabetical order. When abstracts are referred to, the page reference should be followed by (Abstr.).

*Examples*:

BLAXTER, K. L. and WILSON, R. S. 1962. The voluntary intake of roughages by steers. *Anim. Prod.* 4: 351-358.

HAMMOND, J. 1932. *Growth and the Development of Mutton Qualities in the Sheep*. Oliver and Boyd, Edinburgh.

In the text, references should be made by giving author and year; at the first mention all authors should be named, thereafter the first author followed by *et al.* should be used for papers with more than two authors.

*Proofs* are supplied once and must be returned corrected to the Editors within seven days. Only essential corrections should be made.

*Reprints*: Twenty-five reprints of each paper will be supplied free to authors on request. Further copies may be purchased if the order is sent at the proof stage.

*Animal Production* is published six times a year in two volumes. Annual subscription is £23.00 (or \$55.00 in the U.S.A. and Canada) and the price for a single part is £4.00 (or \$10.00) net.

*Proceedings of the British Society of Animal Production (New Series)* ceased publication in 1975 and the material is now published as a separate section of the February issue of *Animal Production*.

*Business matters*, including regular subscriptions and sales (current and back numbers of the Journal and the Proceedings) should be addressed to Longman Group, Journals Division, 43/45 Annandale Street, Edinburgh EH7 4AT.

## CONTENTS

	PAGE
HILL, W. G. and THOMPSON, R. Design of experiments to estimate offspring-parent regression using selected parents . . . . .	163
CLAPPERTON, J. L. The effect of a methane-suppressing compound, trichloroethyl adipate, on rumen fermentation and the growth of sheep . . . . .	169
LAND, R. B. and WILMUT, I. The survival of embryos transferred in large groups to sheep of breeds with different ovulation rates . . . . .	183
SPEEDY, A. W. and FITZSIMONS, J. The reproductive performance of Finnish Landrace × Dorset Horn and Border Leicester × Scottish Blackface ewes mated three times in 2 years . . . . .	189
WINFIELD, C. G. and KILGOUR, R. The mating behaviour of rams in a pedigree pen-mating system in relation to breed and fertility . . . . .	197
FORBES, J. M. Development of a model of voluntary food intake and energy balance in lactating cows . . . . .	203
RATHORE, A. K. and SHELDRAKE, R. F. Teat orifice stretchability associated with teat diameter gradient and milk yield in lactating cows . . . . .	215
HORTON, G. M. J. and HOLMES, W. The feeding value for beef cattle of lucerne cobs differing in maturity and date of harvest . . . . .	221
MCILMOYLE, W. A. and MURDOCH, J. C. The effect of dried grass and cereal-based concentrate on the voluntary intake of unwilted grass silage . . . . .	227
WEBSTER, A. J. F., SMITH, J. S. and MOLLISON, G. S. Prediction of the energy requirements for growth in beef cattle. 3. Body weight and heat production in Hereford × British Friesian bulls and steers . . . . .	237
HEMSWORTH, P. H., BEILHARZ, R. G. and GALLOWAY, D. B. Influence of social conditions during rearing on the sexual behaviour of the domestic boar . . . . .	245
VERSTEGEN, M. W. A., HEL, W. VAN DER and WILLEMS, G. E. J. M. Growth depression and food requirements of fattening pigs at low environmental temperatures when housed either on concrete slats or straw . . . . .	253
FAHMY, M. H. and HOLTSMANN, W. B. Evaluation of three- and four-breed cross litters and pigs sired by purebred and crossbred boars . . . . .	261
BRAUDE, R. and NEWPORT, M. J. A note on a comparison of two systems for rearing pigs weaned at 2 days of age, involving either a liquid or a pelleted diet . . . . .	271
BROADBENT, P. J. A note on the effect of omitting the cereal supplement from a finishing diet offered to weaned single-suckled calves . . . . .	275
ÖSTER, A., THOMKE, S. and GYLLANG, H. A note on the use of brewers' dried grains as a protein feedstuff for cattle . . . . .	279
FOLMAN, Y. A note on the relationship between live-weight gain during calfhood and subsequent performance of intact male calves of the Israeli-Friesian breed . . . . .	283
