The year 1933 will see the appearance of a new journal, limited only to a portion of our speciality. It will be called the *Archivio Italiano per le Malattie della Trachea-Bronchi-Esofago*. It will be a quarterly journal containing about thirty pages and the subscription will be thirty lire per annum. Further particulars can be obtained from Professor Lasagna of Parma, who has secured the collaboration of Chevalier Jackson, von Eicken, Guisez and others.

We are very disappointed to find so few applications for the Ten Year Index of the *Journal* which was prepared with considerable trouble and expense. Members who have seen it realise how valuable an addition it is to their bound volumes of the *Journal* and we would urge those who have not already applied for a copy to do so.

We are pleased to learn that Sir James Dundas Grant and Mr. V. E. Negus have been elected Honorary Members of the Italian Society of Laryngology, Otology and Rhinology.

Peroral Endoscopy Table

Fitted with Head Rest for BRONCHOSCOPY, ŒSOPHAGOSCOPY,
NASAL OPERATIONS Etc.

Designed by V. E. NEGUS, M.B., B.S., F.R.C.S.

The head rest enables the operator himself to place the patient in the desired position for a variety of operations. All parts touched by the operator are sterilisable.

The apparatus is an elaboration of Haslinger's Bronchoscopic head rest, but its range of utility is extended to enable the patient to be supported with the shoulders beyond the end of the table for œsophagoscopy, and to be kept in the correct attitude during operations performed in the sitting or semi-sitting position.
