Seed Science Research is the official Journal of the International Society for Seed Science

The contents of this journal are available to subscribers online at
journals.cambridge.org/SSR

Aims and Scope

Seed Science Research provides an international vehicle for the publication of original papers and review articles on the fundamental aspects of seed research. The emphasis is on the physiology, biochemistry, molecular biology and ecology of seeds, covering the following key topics:

- germination
- dormancy
- ecophysiology
- reserve mobilization
- viability
- longevity
- vigour
- establishment
- seed and embryo development
- maturation
- seed–soil and seed–animal interactions
- computer modelling
- chemical and structural defences
- biotechnology
- physiology of seed pathology
