Volumes 117-122

eISSN: 1096-0287; ISSN: 0033-5894

Editors

Derek B. Booth, University of Washington
Nicholas Lancaster, Desert Research Institute
Lewis A. Owen, North Carolina State University

Guest Editors

Yassine Ait Brahim, University Mohammed VI Polytechnic
Andrea Columbu, Pisa University

Associate Editors

Lesleigh Anderson, U.S. Geological Survey
Pat Bartlein, University of Oregon
Robert Booth, Lehigh University
Louisa Bradtmiller, Macalester College
John Dodson, Institute of Earth Environments, Xi'an, China and University of Wollongong
Jason Dortch, University of Kentucky
Mary Edwards, University of Southampton and University of Alaska
Tyler Faith, Natural History Museum of Utah and University of Utah
Jaime Urrutia Fucugauchi, National University of Mexico and Instituto de Investigacion y Estudios Avanzados Chicxulub
Radu Iovita, New York University
Kathleen R. Johnson, University of California, Irvine
Terri Lacourse, University of Victoria
Pete Langdon, University of Southampton
Thomas Lowell, University of Cincinnati
Curtis W. Marean, Arizona State University
Jim O'Connor, U.S. Geological Survey
Wyatt Oswald, Emerson College
Yeong Bae Seong, Korea University
James (Jamie) Shulmeister, University of Canterbury, Christchurch
Ximena Villagran, Museu de Arqueologia e Etnologia, Universidade de São Paulo
Xiaoping Yang, Zhejiang University

Editorial Board

Zhisheng An, Institute of Earth Environment, Chinese Academy of Sciences
Gail Ashley, Rutgers University
Julie Brigham-Grette, University of Massachusetts
John Dodson, Institute of Earth Environments, Xi'an, China and University of Wollongong
Yehouda Enzel, Hebrew University of Jerusalem
David Fink, Australian Nuclear Science and Technology Organisation
Sheri Fritz, University of Nebraska – Lincoln
Alan R. Gillespie, University of Washington
Lisa Graumlich, University of Washington
Vance T. Holliday, University of Arizona
Richard G. Klein, Stanford University
Melanie Leng, British Geological Survey, University of Nottingham
Danial R. Muhs, U.S. Geological Survey
Colin V. Murray-Wallace, University of Wollongong
Jay Quade, Department of Geosciences, University of Arizona
Maria Socorro Lozano-Garcia, Universidad Nacional Autónoma de México
Cathy L. Whitlock, Montana State University
Yurena Yanes, University of Cincinnati
Liping Zhou, Peking University

Information about editors and editorial board members correct as of 1st January 2024. For the latest information please see <https://www.cambridge.org/core/journals/quaternary-research/editors-and-advisory-board>

Aims & Scope

Quaternary Research is an international journal devoted to the advancement of the interdisciplinary understanding of the Quaternary Period. We aim to publish articles of broad interest with relevance to more than one discipline, and that constitute a significant new contribution to Quaternary science. The journal's scope is global, building on its 50-year history in advancing the understanding of Earth and human history through interdisciplinary study of the last 2.6 million years.

Research areas include geoarcheology, geochemistry and geophysics, geochronology, geomorphology, glaciology, neotectonics, paleobotany and paleoecology, paleoclimatology, paleogeography, paleohydrology, paleontology, paleoceanography, paleopedology, Quaternary geology, volcanology and tephrochronology.

Quaternary Research Center

The QRC is a community of scholars collaborating and fostering interdisciplinary environmental research at the University of Washington through strategic investments in seed grants, expeditions, seminars, workshops, and the publication of *Quaternary Research*.

QUATERNARY RESEARCH

VOLUME 119, MAY 2024

RESEARCH ARTICLES

- 1 Sedimentological and geochemical traces of metallurgical activity in the Świślina River valley (central Poland) at the Doły Biskupie site
Paweł Przepióra and Tomasz Kalicki
- 12 Update and synthesis of the available archaeological and geochronological data for the Lower Paleolithic site of Loreto at Venosa (Basilicata, Italy)
Alison Pereira, Marie-Hélène Moncel, Sébastien Nomade, Pierre Voinchet, Qingfeng Shao, Christophe Falguères, David Lefèvre, Jean Paul Raynal, Vincent Scao, Marcello Piperno, Suzanne Simone and Jean Jacques Bahain
- 28 Holocene relative sea-level changes along the Caribbean and Pacific coasts of northwestern South America
Juan F. Paniagua-Arroyave, Giorgio Spada, Daniele Melini and José F. Duque-Trujillo
- 44 Lateral and temporal constraints on the depositional history of the Bonneville Salt Flats, Utah, USA
Jeremiah A. Bernau, Brenda B. Bowen, Charles G. Oviatt, Donald L. Clark and Isaac A. Hart
- 65 Glacier fluctuation chronology since the latest Pleistocene at Mount Rainier, Washington, USA
Mary Samolczyk, Gerald Osborn, Brian Menounos, Douglas Clark, P. Thompson Davis, John J. Clague and Johannes Koch
- 86 Latest Pleistocene glacial chronology and paleoclimate reconstruction for the East River watershed, Colorado, USA
Brendon J. Quirk, Isaac J. Larsen and Alan J. Hidy
- 99 The Pleistocene ice-sheet dynamics in north-central Poland based on magnetic fabrics of tills and landform analysis
Artur Teodorski
- 118 The Enmynveem mammoth and vegetation changes in arctic Chukotka during the Late Quaternary
Anatoly V. Lozhkin and P.M. Anderson
- 129 Stratigraphy and evolution of the late Pleistocene (MIS 5) coastal Barrier III in southern Brazil
Renato Pereira Lopes, Jamil Corrêa Pereira, Felipe Caron, Sergio Rebello Dillenburg, Maria Luiza Corrêa da Câmara Rosa, Eduardo Guimarães Barboza, Jairo Francisco Savian, André Oliveira Sawakuchi, Sonia Hatsue Tatumi and Márcio Yee
- 152 Quaternary climatic events as conditioning factors of hydrogeologic characteristics and salinity in costal aquifers at northern Patagonia, Argentina
Eleonora Carol, Santiago Perdomo, Carolina Tanjal, Nicolás Scivetti and María del Pilar Alvarez

CORRIGENDUM

- 162 Holocene climate variability – CORRIGENDUM
Paul A. Mayewski, Eelco E. Rohling, J. Curt Stager, Wibjörn Karlén, Kirk A. Maasch, L. David Meeker, Eric A. Meyerson, Françoise Gasse, Shirley van Kreveld, Karin Holmgren, Julia Lee-Thorp, Gunhild Rosqvist, Frank Rack, Michael Staubwasser, Ralph R. Schneider and Eric J. Steig

Photo Caption: View southwards from tufa towers on the shore of Mono Lake in east-central California, USA. This hypersaline alkaline lake has a productive ecosystem based on the endemic brine shrimp (*Artemia monica*) and alkali flies (*Ephydra hians*). The name “Mono” derives from “Monachi,” a Yokut term for the tribes that lived on both sides of the Sierra Nevada, and the region has an archaeological record extending back into the Early Holocene. Recent freshwater diversions severely lowered lake levels starting in AD 1941. Litigation in 1994 allowed the water to steadily rise. Levels are still far short of early 20th century heights, however, partially because of many years of drought in the American West. Mono Lake Basin has a geomorphic, volcanic, glacial and lacustrine record extending beyond the early Quaternary. It has been the focus of much research over the years, including many prominent papers published in Quaternary Research on glaciation, lacustrine sedimentology, geochemistry, palynology, archeology, and climate change that exemplify the interdisciplinary emphasis of the journal (see Bursik and Gillespie, 1993, 39, 24–35; Benson et al., 1998, 49, 1–10; Davis, 1999, 52, 243–249; Madsen et al., 2002, 57, 382–390; Zimmerman et al., 2011, 76, 264–271; Bacon et al., 2018, 90, 276–302).
